HEADQUARTERS

945 SOUTH LAMAR ST., DALLAS, TEXAS •

We Are Not Prophets...

BUT as this catalog goes to press there is a definite upward trend in business and in the hearts of our people generally, and we believe that 1934 will find us all happier and more prosperous.

We are hoping the time has come when all of us will turn from the demand for the lower prices which have so nearly ruined our economic life, and reestablish a standard of quality and merit.

SQUARE BRAND Seeds and MAGNOLIA Supplies have never been the cheapest in first price on the market. They never will be, because we maintain a standard in merchandise that enables us to come to you year after year, submit our offerings, and get your business. We maintain, however, that you will not get more economical seeds and poultry supplies than those we submit, if you count your cost not on the basis of its laid down first price, but on the basis of value received.

We thank you, our good customers, for your past and future business. We guarantee a continuation of the same high quality seeds—seeds that produce the largest possible yields of marketable crops; the same high-grade supplies, that do for you just what we claim they will do; and the same prompt and efficient service that we have consistently given since we began to serve you in 1922.

Magnolia Seed Co.

945 S. Lamar Street

Dallas, Texas

WEEKLY RADIO VISITS

Every Sunday at 1:30 P. M. there is a Square Brand Seed broadcast over Station WRR, Dallas, Texas. Its entertainment features are for your pleasure, and its educational talk is for your information. Please tune in for a visit with us. We shall be happy also to have any suggestions you may care to make on our entertainment and to answer any questions you may ask.

Plant Square Brand Hi-Germinating Seeds

For

Larger Yields of More Marketable Crops

Square Brand Vegetable Planting Table

Name of Vegetable	Seed for 50 feet of row	Distance Between Rows	Plants Apart In Row	Depth To Plant	TIME TO PLANT	READY TO USE
ARTICHOKE.	1 oz.	3 ft.	2 ft.	1 in.	Feb. and Mar.	 6 months
ASPARAGUS ROOTS.	25-30.	3 ft.	1 1/2 ft.	6 to 8 in.	Feb. and Mar.	 1 to 2 years
BEANS, Bush Snap and Lima.	1/2 lb.	2 ft.	3 in.	1 in.	Feb. to April; Aug. to Oct.	 6 to 9 weeks
BEANS, Pole and Lima.	1/4 lb.	3 ft.	12 in.	1 in.	Mar. to May; Aug. to Oct.	 8 to 12 weeks
BEETS	1 oz.	1 ft.	3 in.	1 in.	Mar. to May; Sept. and Oct.	 6 to 11 weeks

HOW TO ORDER

Sending Money: If your order amounts to more than 50c, send Postoffice or Express money order, cashier or certified check. If you send money with your order, your letter must be **REGISTERED**, as we will not assume responsibility if it is lost. Numbers of orders and letters, with money in them, are lost in ordinary mail yearly, and for that reason all letters and orders containing money should be sent by registered mail.

Stamps: On orders for seeds and supplies, where the amount is less than 50c, we will accept U. S. postage stamps in good condition, the same as cash, but it would be best to wrap them in oiled paper to prevent their sticking to the order. We will not assume any responsibility for their receipt and suggest you **REGISTER** your letter if you send stamps.

C. O. D. Notice: We will absolutely ship no plants or perishable goods C. O. D. We advise against C. O. D. shipments because of delays and high collection costs to our customers. We accept C. O. D. orders for seeds and supplies where 25 per cent of the amount of the order is sent with the order. This deposit covers collection and return charges in case the order is not called for and paid by the customer.

About Warranty: This company gives no warranty, express or implied, as to description, quality, productiveness or any other matter, of seeds, bulbs, plants or nursery

stock they send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once and any money paid for them will be refunded. Crops are dependent for success or failure on so many things besides seed that it is impossible for us to give any warranty or guaranty. We have no control over the seed after they leave our house, especially as to planting, fertilizing, cultivation and other important factors which govern the success of the crop. **NO RESPONSIBLE SEEDSMAN GIVES ANY WARRANTY.**

We Pay Postage on all seeds and supplies listed in this catalog and marked "Prepaid."

You Pay Transportation Charges when your order calls for any seed or supplies that are marked "**Not prepaid**," or "**F. O. B. Dallas**." If your order is to be shipped parcel post, it will be necessary for you to send postage covering it as we do not send orders C. O. D. for postage, unless instructed to do so, since collection charges are very high. When postage is not sent, our shipping department cuts down the amount of merchandise ordered, to care for postage, or your order is delayed until we can write you. When your order is to come by express or freight, we can send it collect for transportation charges and you may pay such charges on delivery.

HOW TO FIGURE POSTAGE

Do not send stamps, but just add the amount for postage to the cost of the merchandise and include it in your remittance. We will return any money left over if you send too much.

If the total weight of the goods you are ordering is a fraction over a pound it will add a pound to the rate. Packages up to 8 ounces in weight are carried at the rate of 1½ cents for each 2 ounces or

fraction thereof, regardless of distance. For rates on packages over 8 ounces, see table below.

Within zones 1, 2 and 3, packages up to 70 pounds in weight are carried. The weight limit for all other zones is 50 pounds.

Explosives, Inflammable Articles, Poisons, and Articles measuring more than 84 inches, length and girth combined, cannot be shipped by parcel post, according to the United States postoffice rulings.

FOR ANY OTHER INFORMATION REGARDING RATES OR OTHER PARCEL POST MATTERS ASK YOUR POSTMASTER

PARCEL POST RATES

	ZONES 1 and 2 —Not over 150 miles from us.	ZONE 3—151 to 300 miles from us.	ZONE 4—301 to 600 miles from us.	ZONE 5—601 to 1000 miles from us.	ZONE 6—1001 to 1400 miles from us.	ZONE 7—1401 to 1800 miles from us.	ZONE 8—1801 miles and over from us.
For weights over 8 oz. up to 1 pound the postage is	7 Cents	8 Cents	8 Cents	9 Cents	10 Cents	12 Cents	13 Cents
For each additional pound or fraction of a pound add	1 Cent	2 Cents	4 Cents	6 Cents	8 Cents	10 Cents	12 Cents

EXAMPLE—Your shipment weighs 8 pounds 5 ounces. You must figure postage on 9 pounds. If you live in the first or second zone from us you would add 8 pounds at 1 cent per pound or 8 cents to the cost of the first pound, 7 cents, sending a total

of 15 cents for the 9 pounds. If you live in the second zone, you would need to send 8 cents for the first pound and 2 cents each for eight additional pounds or 24 cents; third zone would figure 40 cents, etc.

Your New Lawn

If your lawn is to be graded, remove the top soil to a depth of six to eight inches, then grade and replace the top soil after the grade is completed. The top soil should be thoroughly harrowed and raked to reduce to as fine a condition as possible; also, be sure to level it, as an uneven surface detracts from the appearance of a lawn. You should then apply Vigoro Plant Food at the rate of 4 pounds to the 100 square feet, after which the grass seed should be sown and the lawn raked or harrowed, as well as rolled if possible. This work may be done either in the spring or fall of the year. After planting the seed, the ground should be kept well watered and Vigoro should be applied at least two additional times during the first season.

Your Old Lawn

If your old lawn has become unsightly there may be a number of reasons. During the past several years a large amount of cheap commercial fertilizer has been used. It runs a 16 to 18 per cent nitrogen analysis, usually consisting either of Acid Phosphate or Sulphate of Ammonia. Continued applications have resulted in a coarsening of the grass. On such lawns about all that can be done is a thorough plow-up, harrowing and fertilizing with Vigoro Plant Food. If the lawn is of Bermuda Grass the roots will come back and form a satisfactory turf in the spring, although reseeding it will improve the quality of the grass. Use good plant food on your lawn. More lawns are ruined from unbalanced fertilizer than from any one other cause.

Square Brand Lawn Grass Seeds

No one kind of grass will produce a lawn which will keep green through the entire year, and for that reason we have a number of different kinds of mixtures. If you have a satisfactory summer lawn, then our Winter Grass Mixture may be used to produce a winter lawn. Winter lawns must be reseeded every year unless they are allowed to go to seed in the spring before cutting, which is not usually done. If you have shady spots, then plant our Shady Mixture in those places. Bermuda will not grow in shady spots.

Our Evergreen Mixture will insure a year round green lawn for one year, but after the first year, Winter Grass should be added each fall.

SQUARE BRAND BERMUDA GRASS—Bermuda Grass seed is the best for sunny exposures and summer lawns. It should be planted either in the spring or late summer when the weather is warm and the soil moist. If sown before a rainy season the seed will come up in a short time, but otherwise it germinates slowly. Sow 6 lbs. for every thousand square feet. When mixed with dry sand it is easier to get an even distribution. **Postpaid: Lb. 50c; 2 lbs. 90c.**

SQUARE BRAND CARPET GRASS—This grass is growing more popular for lawn purposes, especially in localities where there is ample rainfall. It is preferred to Bermuda because it is more easily controlled. A plow-up kills carpet grass whereas it does not affect Bermuda. It is not desirable to withstand long drouths, however. **Postpaid: Lb. 50c; 2 lbs. 90c.**

SQUARE BRAND EVERGREEN MIXTURE—A mixture composed of fine leaved, hardy grasses, which will not only stand the heat of summer but be beautiful and green all winter. After the first winter, however, be sure to add Square Brand Winter Lawn mixture each year unless the winter grass is allowed to go to seed in the spring of the year and thus reseed itself. Sow seeds thickly. We recommend one pound to two hundred square feet. **Postpaid: Lb. 60c; 2 lbs. \$1.00.**

SQUARE BRAND WINTER LAWN MIXTURE—Sow during September or October at the rate of one pound to two hundred square feet. Before sowing mow the lawn very close and if the Bermuda is very thick, give it a top dressing of one inch loamy soil and Vigoro. Afterward rake the lawn thoroughly so as to mix the seed and soil and then keep it well watered until the grass begins to grow. If allowed to go to seed in the spring of the year this grass will reseed itself, but if kept cut it must be replanted each year. **Postpaid: Lb. 35c; 2 lbs. 65c.**

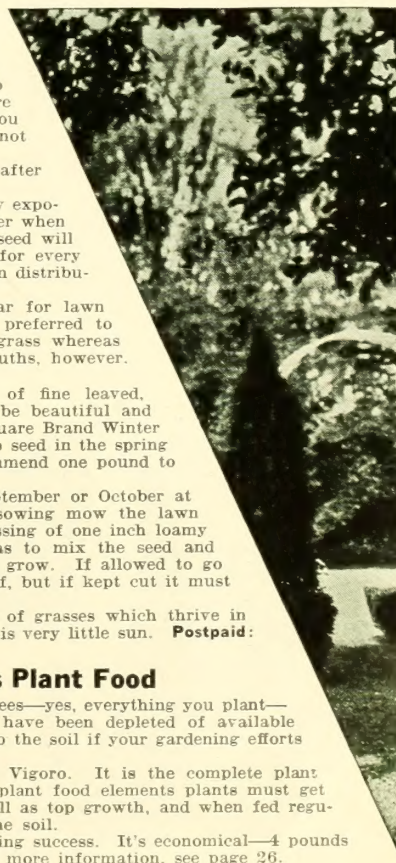

SQUARE BRAND SHADY LAWN MIXTURE—A mixture of grasses which thrive in shady locations, under trees or close to walls where there is very little sun. **Postpaid: Lb. 60c; 2 lbs. \$1.00.**

Everything You Grow Needs Plant Food

Your lawn, flowers, vegetable garden, shrubs, and trees—yes, everything you plant—needs nourishment—a balanced ration. Most soils have been depleted of available plant food. That is why you must add plant food to the soil if your gardening efforts are to be successful.

We recommend that you feed everything with Vigoro. It is the complete plant food containing, in a balanced form, all of the plant food elements plants must get from the soil. It encourages root growth as well as top growth, and when fed regularly to the lawn it helps produce humus in the soil.

Use Vigoro this year and achieve real gardening success. It's economical—4 pounds feeds 100 square feet of gardening area. For more information, see page 26.

Square Brand Garden Beans

INCREASE YOUR CROP AND IMPROVE YOUR SOIL BY INOCULATING WITH NITRAGIN

CULTURE—Beans are very sensitive to both cold and wet and it is useless to plant them before the ground has become dry and warm. The largest returns will result from planting in drills two feet apart.

Cover the seed 1½ inches deep and thin the young plants three to six inches apart in the row. The plants up to the time of blossom should have shallow cultivation. If any mutilation of the roots by cultivation after the plants have come into bloom should occur it is likely to cause the blossoms to blast, and thereby cut off the crop. A light, rich, well-drained loam which was manured for the previous crop is most desirable. A packet will sow 25 feet of row, one pound to 100 feet, and 60 pounds to an acre.

Green Pod Bush Beans

GIANT STRINGLESS GREEN

POD—A fine, stringless variety. Early; large, round pods, very crisp and meaty. Extensively used for canning. Recommended to Market Gardeners for quality, salability and ease of picking

BURPEE STRINGLESS GREEN POD—Another fine quality stringless variety. Early and very prolific. Fine for snap beans and canning. Another good market variety and much enjoyed by home gardeners. Round pods, fleshy and rich in flavor.

IMPROVED EARLY ROUND POD RED VALENTINE—Especially desirable for its hardiness. Will stand more adverse weather conditions than most bush beans. Extra early, usually ready for harvesting from 40 to 45 days after planting. Fine flavor, very fleshy, crisp and tender.

Postpaid prices: Pkt. 10c; ½ lb. 25c; lb. 35c.

SEE SPECIAL LIST FOR QUANTITY PRICES

Burpee's Stringless.

BLACK VALENTINE—Large round pods, about 6 inches long. Good for long distance shipping. Another hardy, early type, frequently popular with gardeners.

LONGFELLOW—Unusually early round pod bean. Splendid table variety. Pale green in color, very long pods. Beans are small, mottled dark red. Has an excellent flavor.

REFUGEE or 1000 TO 1—A second early variety, especially resistant to drouth and unfavorable growing conditions. Extensively used for shipping and canning. Pods about 5 inches long—round and light green.

Postpaid prices: Pkt. 10c; ½ lb. 25c; lb. 35c.

Improved Red Valentine.

TENNESSEE GREEN POD—This bean is increasing in popularity—especially with market gardeners. It may be planted earlier than other beans, withstands cold and inclement weather and yields heavily. Pods long and flat and a beautiful green. Matures earlier than most varieties.

BOUNTIFUL—Another good market variety. Large long pod, practically rust and mildew-proof. Absolutely stringless. A splendid snap bean, light green in color and very tender.

FULL MEASURE—A round pod, medium early bean, fleshy, fine grained and stringless. Very pleasing for home use. Try some this year.

Postpaid prices: Pkt. 10c; ½ lb. 25c; lb. 35c.

Wax or Yellow Pod Bush Beans

IMPROVED GOLDEN WAX—The most popular of the wax varieties. Pods large, slightly flattened and bright yellow in color. Brittle and stringless. Plants compact and vigorous. Moderately early and exceptionally prolific. Desirable for home and market planting.

PENCIL-POD BLACK WAX—A splendid variety of the round podded, black seeded type. Medium early, usually bearing in from 50 to 55 days. Attractive golden yellow pods are curved, fleshy, stringless and brittle. Excellent quality.

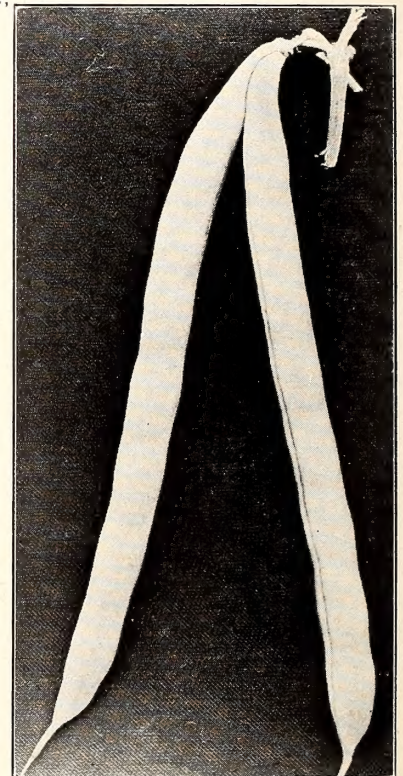

WARDWELL KIDNEY WAX—A very prolific type and one of the hardiest. Pods long, broad and flat and exceptionally attractive in appearance. Fine flavored and among the best of the market crops. Creamy white in color, very tender and delicious. You should try these.

PROLIFIC BLACK WAX—One of the earliest of the wax varieties. Pods straight, yellow and very tender. This is an improved strain of the German Black Wax. Popular for both home and market use.

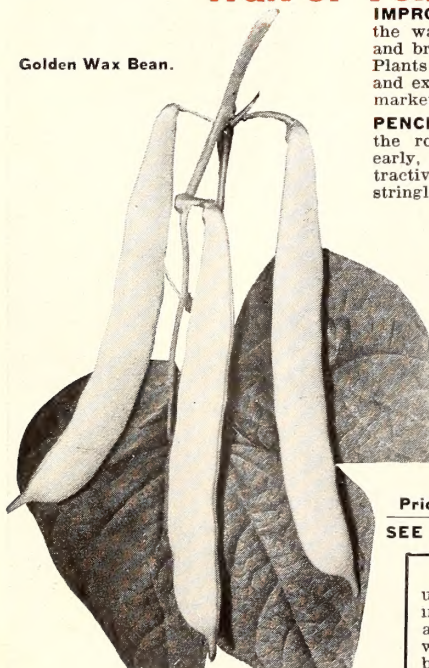

SURE CROP WAX—An especially satisfactory wax bean for market gardeners and shippers. Pods deep yellow, fleshy and stringless. Plant large and prolific.

Prices postpaid: Pkt. 10c; ½ lb. 25c; lb. 35c.

SEE SPECIAL LIST FOR QUANTITY PRICES.

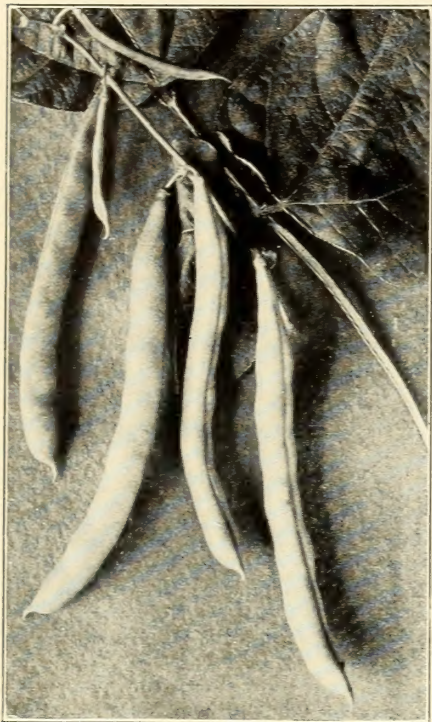

Giant Stringless.

Golden Wax Bean.

MR. R. R. BURK, Trawick, Texas, writes us: "I thank you for your fair treatment in the years past that I have dealt with you and assure you I have nothing but a good word for your seeds. They have always been the best."

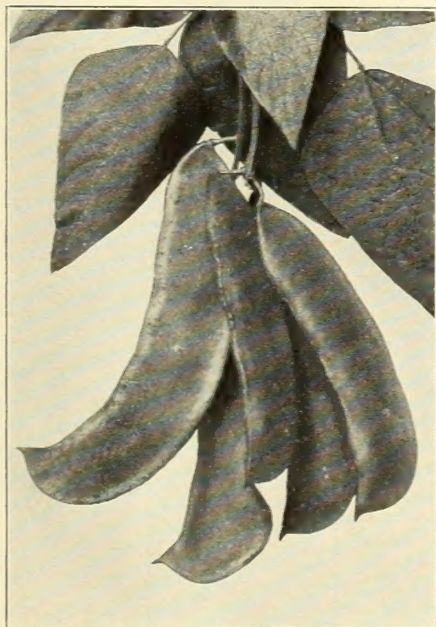

White Creaseback.

STRIPED CREASEBACK—Just what you need to increase the productivity of your cornfield and at the same time make a good table crop. We suggest inoculating this seed with Nitragin to increase legumes and then plant your seeds early enough to get one or two plowings before laying by your corn. Pods are long, round and creaseback. A very satisfactory bean for table use.

Postpaid prices: Pkt. 10c; 1/2 lb. 30c; lb. 40c.

Bush Lima or Butter Beans

CULTURE—Plant when ground is dry and weather warm in rows 2 feet apart, dropping the beans 6 inches apart in the row, eye down, covering with 1 inch of soil. May also be planted in hills, 3 feet apart one way, 2 feet apart the other way, using 4 to 6 beans to the hill. One pound will plant 100 hills, or 100 feet of row; 60 pounds will plant an acre.

Henderson's Bush Lima.

Pole or Running Beans

CULTURE—Pole beans are more sensitive to climatic conditions than are the bush varieties, but are superior in quality and productiveness. When the ground is warm, set poles 4 to 8 feet long, slanting slightly to the north in rows four feet apart, extending north and south, the poles being 3 feet apart in the row. When the poles are arranged this way the vines can climb more readily and the pods are straighter and more easily seen. Around each stake plant 5 to 8 beans, 2 inches deep and when well started, thin to 4 plants. Use 1 packet to 20 poles; 1 pound to 100 poles; 30 pounds to the acre.

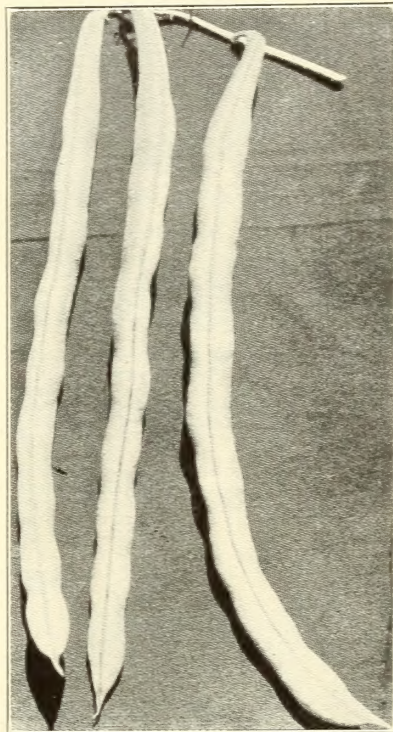

KENTUCKY WONDER—The most popular and widely planted of all pole beans, early and very productive. Vines are very vigorous, bearing pods in large clusters that are green round, meaty, tender and practically stringless and measure 6 to 12 inches long.

KENTUCKY WONDER WAX—Earliest of all pole wax beans, splendid climber and very productive. Pods wavy, yellow, 8 inches long, practically stringless, brittle and tender.

IDEAL MARKET—A very fine flavored, black seeded bean, which is extremely popular with market gardeners. Yields very well. Pods round, stringless, fleshy and very tender. Plants hardy and may be planted very early. This is a good variety for both home and market use.

WHITE CREASEBACK—Earliest of the pole beans. Very hardy and productive. Pods round, slender, brittle and tender. A fine market crop. Especially suitable for early fall planting. Prolific.

BALDWIN WONDER WAX—A long podded wax pole bean, semi-flat. A good variety for home use, as well as being an established market type.

Kentucky Wonder.

SPECKLED BUSH LIMA—The most productive and one of the earliest of the bush limas. It bears in great profusion broad, flat pods, each having from 3 to 5 medium size beans which cook quickly. This variety is good for summer use and as a winter shell bean, and is a splendid bean for the home garden.

HENDERSON BUSH LIMA—The earliest of all bush limas, two weeks earlier than any of the climbing varieties. Plants are without runners but continue to grow and set pods until stopped by frost. Used extensively by canners as well as for home and market use.

Postpaid prices: Pkt. 10c; 1/2 lb. 30c; lb. 40c.

FORDHOOK BUSH LIMA—A good variety. Bushes erect and branching freely. Beans thick and meaty. Postpaid prices: Pkt. 10c; 1/2 lb. 35c; 1 lb. 55c.

Pole Lima Beans

CULTURE—Same as other pole beans, except the seed is planted two weeks later. One pound will plant 100 hills; 30 pounds will plant an acre.

CAROLINA or SIEVA (Small White Lima)—A very early small-seeded lima or butter-bean, especially adapted for the South. Pods are dark green, short, about 3 inches long, curved and flat.

FLORIDA SPECKLED BUTTER BEAN—A very early variety that blooms and bears profusely all the season. Bears pods from the very first bloom that appears on the plants. The seeds and pods are about the size of the Carolina or Sieva Lima but are speckled white and brownish-red.

KING OF THE GARDEN—A mid-season variety. Pods are large, numerous and well-filled measuring from 4 to 5 inches long, very flat and contain from 3 to 4 beans.

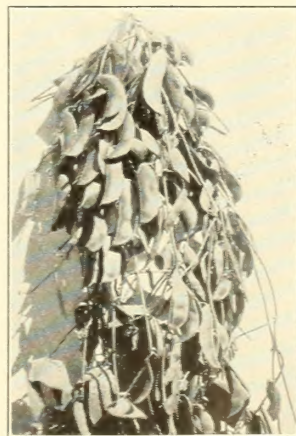

Postpaid prices: Pkt. 10c; 1/2 lb. 30c; lb. 40c.

English Peas

WITHOUT WHICH NO GARDEN IS COMPLETE.

CULTURE—For early peas the soil should be light and warm, but for general crop, a moderately heavy soil is better. Fresh manure and very rich or wet mucky soil should be avoided, as they cause a large growth of vine at the cost of the quality of the peas. The seed should be planted in rows at a depth of 1½ to 2 inches. Rows should be 21 to 28 inches apart for dwarf varieties and 28 to 42 inches for the taller sorts. The wrinkled varieties are more sensitive to wet weather than the smooth-seeded sorts, but are of superior quality. The crop should be gathered as fast as it is fit for use. If even a few pods begin to ripen, not only will new pods cease to form, but those partly advanced will stop growing. A packet will sow 20 feet of drill; a pound, 100 feet; 90 to 120 pounds per acre.

Extra Early Varieties

FIRST AND BEST—The earliest pea that is grown. A smooth sort, with wonderful ability to mature quickly; unsurpassed in extra early qualities, in flavor, and in size of pod. Free from runners, and the entire crop can be taken off at two pickings. Plants about 2½ feet high; mature in 48 days.

Postpaid prices: Pkt. 10c; ½ lb. 25c; 1 lb. 35c. See Special List for quantity prices.

ALASKA—A smooth blue pea of unequalled evenness in growing of vine, and early maturing of pods, which are filled with medium sized bright green peas of good flavor. Plants are of medium height, from 2 to 3 feet. Pods are of good size, about 2½ inches long. Matures all of its crop at one time; a valuable variety for market gardeners and canners.

Early Varieties

THOMAS LAXTON—The most popular of the early wrinkled varieties. Pods large—often four inches long, with square ends and uniformly well filled, containing 7 medium dark green peas of superior quality. Produce very satisfactory fall crop, as well as early spring crop. A variety that appeals to market gardeners because of its productivity, sweet flavor and heavy market demand.

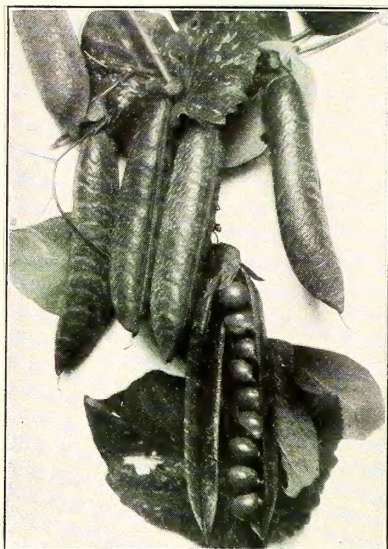

AMERICAN WONDER—An old favorite. Small, dwarf-like bushes, heavily laden with peas of very fine quality. Appeals especially to the home gardener.

LAXTON'S PROGRESS—An improved Laxtonian variety. The earliest of the large podded dwarf peas. Vines vigorous and very productive. Pods large, pointed and deep green in color containing 8 large dark green peas of good flavor.

LITTLE MARVEL—A very good pea for home gardening. Pods are three inches long, blunt ended and closely packed with medium sized peas. Peas are very sweet and delightfully flavored.

HUNDREDFOLD—A large podded type, which ships well. Quite prolific and hardy. An old favorite.

Postpaid prices: Pkt. 10c; ½ lb. 25c; 1 lb. 35c.

Bliss Everbearing.

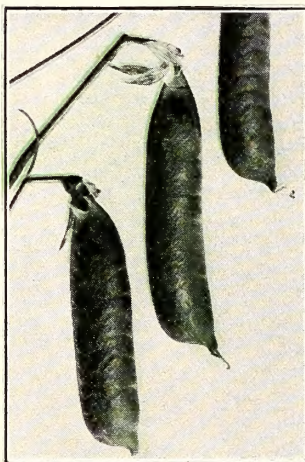

Early Varieties

PREMIUM GEM—A very desirable early green wrinkled dwarf variety. Vines are very productive, 15 to 18 inches high; pods of medium size, about 2¾ inches long, and crowded with 6 and 8 large peas of fine quality.

NOTT'S EXCELSIOR—The best very early dwarf pea. Vines are large and productive and average about 12 inches high; pods about 2¾ inches long. The peas, in sweetness and quality, are unsurpassed. A desirable early sort for the market gardener, and home use.

DWARF TELEPHONE—A healthy stocky grower, and is very productive; does not require staking. The green pods frequently measure 5 inches in length, containing 9 to 10 peas.

Postpaid prices: Pkt. 10c; ½ lb. 25c; 1 lb. 35c.

Alaska.

Later Varieties

BLISS EVERBEARING—This is the most desirable of the later varieties, for your main crop of English Peas. Has delightful flavor. Vines stout, of medium height, and if peas are picked as they mature, plant branches and bears longer than any other pea. By all means, plant some of these.

CHAMPION OF ENGLAND—A very productive main crop. Vines grow tall. Pods are nearly round and blunt-ended, containing 8 light green peas.

WHITE MARROWFAT—The vines of this tall variety are about 5 feet high, and of strong growth; pods about 3 inches long, cylindrical, surface somewhat roughened, light colored, and well filled. Most desirable for summer use.

IMPROVED TELEPHONE—The leading variety with market gardeners. Vines are tall and vigorous, growing about 4 feet high, and producing an abundance of pointed pods of large size, 4 to 5 inches long.

Postpaid prices: Pkt. 10c; ½ lb. 25c; 1 lb. 35c.

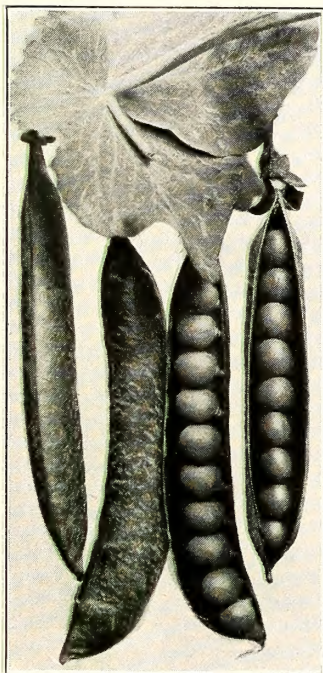

Edible Pod

MAMMOTH MELTING SUGAR—A tall, late prolific variety, produces large broad pods, tender and sweet; whole pod can be cooked and served like snap beans. Pods best when they are about half-grown. Vines grow four to five feet high.

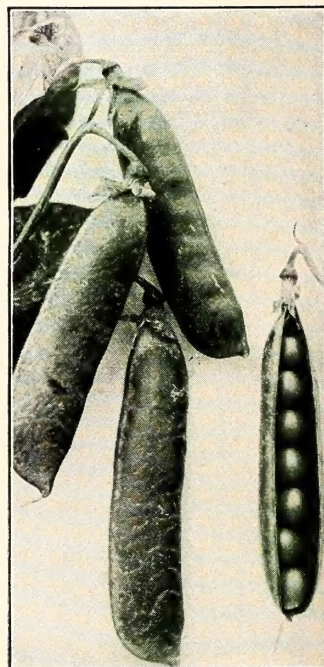

Postpaid prices: Pkt. 10c; ½ lb. 25c; 1 lb. 35c.

SEE SPECIAL LIST FOR QUANTITY PRICES.

MRS. W. C. OATES, Rt. No. 5, Box 82, Temple, Texas, wrote us on September 5th: "I find your seed to be the best I have ever used for good germination. I will send another list for seed in about a week or ten days if we have a rain. Please send me your new seed book just as soon as it comes off the press for I plant my garden early. I did not get my book in time this year."

Tall Telephone.

Thos. Laxton

Stowell's Evergreen Sweet Corn.

Tender Roasting Ear Corn

USE CROW REPELLENT TO PROTECT YOUR SEED CORN FROM PESTS.

CULTURE—When planted in rows the rows should be 3 to 4 feet apart; plant the seed 12 to 16 inches apart in the row, covering 2 inches deep with fine soil firmly pressed down. If planted in hills, plant 4 to 6 grains to the hill; later thin so as to leave 2 to 3 stalks to the hill. One pound will plant about 200 hills; one peck (14 lbs.) to the acre.

Sugar Varieties

COUNTRY GENTLEMAN—A distinct and outstanding corn. Ears 8 to 9 inches long, exceptionally slender cob, densely packed with long kernels, growing in irregular pattern. Delightfully sweet. Plants grow from 6 to 7 feet long and frequently produce three ears. Adapted for canning, as well as garden and market use.

STOWELL'S EVERGREEN—The standard main crop variety, much used for home gardens, market and canning. Hardy and productive, very tender and sugary, remaining suitable for boiling a long time. Ears about 10 to 12 inches long. Very white grain. Matures in 95 to 100 days.

GOLDEN BANTAM—A very early sweet corn with golden-yellow grains, very tender, sweet, and of excellent quality. Ears are 6 to 7 inches long. Broad, meaty kernels. This is a variety that should be planted in every home garden. Matures in 78 to 80 days, after planting.

Postpaid prices: Pkt. 10c; lb. 25c.

Sweet Field Varieties

EARLY ADAMS—A splendid variety, maturing 60 days after planting. Ears 7 to 8 inches long and filled with large white grains. Vigorous stalks growing about 6 feet in height and well bladed. Postpaid prices: Pkt. 10c; lb. 25c.

SURECROPPER—As its name implies, this is a fine, hardy type that makes it extremely popular. Matures in about 100 days. Large ear, white kernels of good quality.

HICKORY KING—This white variety of corn has the largest grains and the smallest cob of any corn in existence. Many market gardeners plant it because the stalks are very vigorous and productive, and the corn is unusually marketable. Matures in about 100 days.

WHITE PEARL—A northern field corn that produces large, uniform, well filled ears with large, pure white grains. Used extensively for roasting ears by local gardeners.

Postpaid prices: Pkt. 10c; lb. 20c.

TRUCKERS' FAVORITE—A wonderful early table corn, only a few days later than the Early Adams. Ears average from 12 to 14 inches in length. Slightly sweet, resembling sugar corn in taste. Ready for table use in about 67 days after planting.

IOWA SILVER MINE—Planted largely for early roasting ears by market gardeners. Ears are from 9 to 12 inches long and are ready for use in 70 days after planting.

Postpaid prices: Pkt. 10c; lb. 20c.

Best Pop Corn Varieties

A profitable crop, yields well even in unfavorable weather. Cultivate the same as field corn. It should be planted in March and April. One pound will plant 200 feet of drill; 12 pounds to the acre.

WHITE RICE—This variety has white, large pointed grains that pop nicely and is the best white variety for home popping. A good yielder; ears are medium sized.

SOUTH AMERICAN—Very popular variety on account of its rich yellow color. It is the standard yellow pop corn for the South. Pops into a very large white fluffy piece.

JAPANESE HULLESS or LITTLE BUSTER—A very prolific white variety used to a great extent by commercial poppers. It is a fine variety to shell and sell to commercial poppers.

Postpaid prices:

Pkt. 10c; 1/2 lb. 20c; lb. 25c.

Pop Corn.

Where difficulty has been experienced with growing corn, due to seed-borne diseases, we suggest the use of Semco Jr. Yields of corn have been increased from 25 to 100 per cent through its use. We shall send full information upon request.

Numerous complaints come to us as a result of growers destroying corn crops. We have known of many instances where complete replanting had to be made. This is entirely unnecessary. The use of Crow Repellent eliminates this trouble and it is very inexpensive to use.

SEE SPECIAL LIST FOR QUANTITY PRICES.

SPECIAL CROSBY EGYPTIAN—

The most popular of all beets. The small top of this variety makes it especially desirable for bunching. Roots are flattened, globe shape and very smooth. Exterior color of the root is bright red and the flesh is bright vermilion-red zoned with a lighter shade. Very sweet and tender. This Crosby is the variety demanded by the Dallas market—a very salable and uniform beet, produced after three years of intensive and careful breeding. Mature early.

Prices: Pkt. 10c; oz. 20c; ¼ lb. 40c; postpaid.

Special Crosby Egyptian.

EARLY ECLIPSE—An extra early variety with globular roots and short tops. Round, smooth and dark red, circled with lighter red. Good for home and market gardens.

LONG SMOOTH BLOOD—This is a good late variety which has long, smooth, blood-red roots. Exceptionally hardy and resists drouth well. Grows well down into the soil.

CROSBY EGYPTIAN—This Crosby is the same general type as the Special Crosby Egyptian, but instead of being light in color is a darker red. Most markets prefer dark beets and where the dark Crosby is desired, order this type. Our frank opinion is that the darker red beet is a better beet than the lighter shade, but the light strain is demanded by the Dallas market.

Postpaid prices: Pkt. 5c; oz. 15c; ¼ lb. 30c.

Danver Half-Long Carrot.

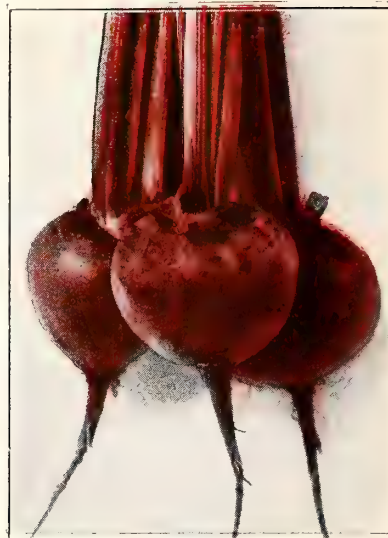

Root Crops Are Healthful Table and Canning Beets

CULTURE—The best results are obtained on a deep, rich, sandy loam. Sow as early as the ground can be prepared in drills 18 inches apart and thin out to 3 or 4 inches in rows. Planting in succession you can still be having tender greens when the roots are pulled for canning. Beets are easily stored for use during the winter. Always sow in freshly prepared soil, which should be pressed firmly over the seed. A packet will sow a row 25 feet long; 1 ounce 75 feet; 5 pounds per acre.

DETROIT DARK RED—One of the best beets for market and home garden and on account of its uniformly rich color the most desirable for canning. Roots are medium-size, globular or nearly round, very smooth and dark blood-red. A desirable bunching variety, although a little later than the Crosby Egyptian.

LONG SMOOTH BLOOD—A long deep red beet, by far the best for winter or spring use. Roots are deep red, long, smooth and uniform in shape. A fine variety for the home garden.

EARLY BLOOD TURNIP—Roots nearly round or slightly flattened, and bright red with zonings of a lighter shade. A good variety for the home garden.

Detroit Dark Red.

Salsify.

Salsify or Oyster Plant

A delightful vegetable which should be planted more in this territory. May be used like carrots; or, after having been boiled, it may be made into cakes and fried like oysters, which it resembles in flavor.

CULTURE—Sow in rows 12 to 18 inches apart. Thin to 6 or 7 inches apart in the row. Cover the seeds firmly with one-half inch fine soil. Cultivate the same as carrots or parsnips.

MAMMOTH SANDWICH ISLAND—The best variety. Grows to a large size and is very mild and delicately flavored. Grown extensively by gardeners where markets have been established.

Postpaid prices: Pkt. 10c; oz. 20c; ¼ lb. 60c.

Square Brand Carrots

Delicious in salads—rich for flavoring soups—colorful for garnishing.

CULTURE—While a sandy loam made rich by manuring the previous year is the best soil for the carrot, any good land, if thoroughly and deeply worked, will produce satisfactory crops. It is advisable to sow as early in the spring as the ground is fit to work. For table use, sow the small varieties early in rows 16 to 18 inches apart. For field culture, sow in drills 18 to 24 inches apart. Cover one-half to one inch deep and see that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe and thin to 2 to 6 inches apart in the row, according to the size of the variety. Use a packet to 6 feet of drill; an ounce to 100 feet of drill; 3 to 4 pounds to the acre.

CHANTENAY—A splendid bunch sort and very popular with market gardeners and truckers. Tops are medium sized with small neck. The mature roots are thick, 5 to 6 inches in length, uniformly half-long, stump-rooted but taper slightly, are smooth and of a deep orange-red.

DANVER HALF-LONG—Very productive and popular variety for home and market gardens. The tops are of medium size and the roots are from 6 to 8 inches long, uniformly to the blunt point; flesh deep orange and very tender.

IMPROVED LONG ORANGE—Roots are long and comparatively thick, often 12 inches in length and 3 inches in diameter at the crown, tapering regularly to a point. Late-maturing, suitable for table use as well as stock feed.

Postpaid prices: Pkt. 5c; oz. 15c; ¼ lb. 40c.

SEE SPECIAL LIST FOR QUANTITY PRICES.

Chantenay.

Early Scarlet Turnip—White Tip.

CRIMSON GIANT—A round radish of exceptionally large size, and early. Roots are nearly globe-shaped of beautiful crimson color; desirable for general outdoor planting and for forcing where a very large round radish is wanted.

VICK'S EARLY SCARLET GLOBE—A slightly olive-shaped variety, rich bright scarlet in color. Flesh white and tender. We especially recommend this type to gardeners. Large fast early forcing radish which sells readily. Very desirable for the home gardener also. Be sure to plant some of these.

ROUND BLACK SPANISH—Almost round and measure three to four inches through. Skin black, flesh white, solid and pungent. A fine keeper.

Postpaid prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 85c.

Long Varieties

CHARTIER—One of the very best long radishes for planting outdoors for early summer use in the home garden. Also a desirable market type. This is scarlet at the top and shades to a clear white at the tip. Delicious flavor, remains crisp and tender for a long time.

White Icicle Radish.

CINCINNATI MARKET—A desirable market variety with roots similar to early Long Scarlet Short Top, but longer—and a deeper red. Remains in condition for use quite long and is a good shipper.

LONG SCARLET SHORT TOP—An extra early, long radish, ready for use in 25 days. Roots grow 5 to 6 inches long with a third of their length above the ground. Flesh is crisp and tender until fully grown; tops short and small.

WHITE ICICLE—The leading long white radish, and one of the earliest. Tops medium size; roots clear white, slender, smooth, and average when mature 6 to 7 inches long. Very crisp and tender.

CHINA ROSE WINTER—Extensively grown for fall and winter use. Roots are cylindrical, or largest near the bottom, and blunt at both ends. Skin smooth and of a bright deep rose color. A desirable late maturing garden variety.

LONG BLACK SPANISH—Especially adapted for winter use. Roots long, thick, almost black, somewhat wrinkled. Flesh white, of firm textures, decidedly pungent.

Postpaid prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 85c.

SEE SPECIAL LIST FOR QUANTITY PRICES

SITZLER'S CITY GREENHOUSES, BONHAM, TEXAS, wrote us on May 15, 1933, as follows: "We want to say that the seeds and supplies we bought of you were as good as we could wish for. We believe we got 99 per cent germination on seed."

SQUARE BRAND SEEDS ARE HIGH GERMINATING SEEDS. PLANT THEM FOR LARGER YIELDS OF MORE MARKETABLE CROPS.

Roots Ready to Serve

Square Brand Radishes

CULTURE—For open ground culture, sow in rich, sandy soil as soon in the spring as it is fit to work, in drills 12 to 18 inches apart, and thin out the plants to prevent crowding. They should receive plenty of water, and in order to raise the best radishes, they should be grown quickly. Crisp radishes cannot be produced in heavy soils. Successive sowings from one week to ten days apart will keep up a supply. A packet will sow 20 feet of drill; an ounce 100 feet; 8 to 10 pounds per acre. Thin out the small varieties one inch apart and the larger varieties 3 to 4 inches.

Round Varieties

EARLY SCARLET TURNIP—An excellent extra early forcing radish. Roots are small, nearly round, and of bright scarlet color; tops very small; flesh white, crisp, and well flavored. One of the best of the forcing varieties.

EARLY SCARLET TURNIP WHITE TIPPED—(Sparkler Strain)—Small round roots of rich scarlet color with a pronounced tip of pure white, well adapted for forcing. Remains solid and crisp a long time. Ready for table use in 20 days after planting. One of the best market types.

FRENCH BREAKFAST—A quick growing, small, olive-shaped radish about 1 1/2 inches long by 3/4 of an inch in diameter when full grown. Color beautiful deep rose scarlet, except a little clear white about the tips.

Kohl Rabi.

Kohl Rabi

CULTURE—Sow seed in early spring and when well established thin to 6 inches apart in the row. Plantings may be made in July for fall use. A packet will sow about 40 feet of drill; an ounce 200 feet; 3 pounds to the acre.

EARLIEST WHITE VIENNA—Extremely early, with distinctly small tops. Bulbs medium size, very light green, nearly white. Very mild and flavor most delicious. **Prices:** Pkt. 10c; oz. 20c; ¼ lb. 75c; postpaid.

Parsnips.

Parsnips

CULTURE—Excellent for table use, prepared like turnips or carrots. More nutritious than turnips, and surplus may be fed to stock, especially milk cows. Succeeds best on rich, mellow soil. Sow in early spring and cover seed ½-inch, pressing soil down firmly. When well established, thin to 6 inches apart in drill. A packet will sow 40 feet of drill; an ounce 200 feet; 4 to 5 pounds per acre.

HOLLOW CROWN—An excellent variety for the table. Roots long with smooth white flesh, uniform in shape, very tender. **Postpaid prices:** Pkt. 5c; oz. 15c; ¼ lb. 35c.

Turnips and Rutabagas

CULTURE—For summer use, sow early in spring in light, rich or new soil in drills 1½ to 2 feet apart and cover one-half inch deep. They may be sown broadcast, but in either case be sure to have the ground rich and freshly stirred. It is important to get the spring and summer crops started early so that the turnips may have time to grow to sufficient size before hot weather causes them to become tough and bitter. For the fall or main crop, sow from the middle of July to the middle of September and in the manner given for spring sowing. A packet will sow about 50 feet of drill; an ounce 250 feet; 3 to 4 pounds per acre in drills, or 6 to 8 pounds broadcast.

WHITE EGG—Early oval, or egg-shaped variety, with smooth clear white roots of medium size; flesh clear white, firm, fine-grained, and sweet.

White
Egg
Turnip.

POMERANIAN WHITE GLOBE—One of the most productive varieties. Roots are globe-shaped, or slightly flattened, skin very white and smooth. Best for table when the roots are not more than 4 to 5 inches in diameter. A favorite with home gardeners and canners when the tops are used for greens.

LONG WHITE COWHORN—Roots of this variety are often 12 to 15 inches long and 3 inches in diameter, carrot-like in form and slightly crooked. Best for table use when 3 or 4 inches long, but can be grown longer for stock feeding.

SEVEN TOP (For Turnip Greens)—Cultivated extensively for the tops, which are used for greens. Very hardy and the growth usually continues throughout the winter. Not generally depended upon for the root.

RUTABAGA—IMPROVED AMERICAN PURPLE TOP—A strain of purple-topped Rutabaga, with a smaller top and much shorter neck than other varieties. Roots are globular shaped and grow to a large size. Excellent for both table use and stock feeding.

GOLDEN BALL—A very good table beet. Hardy. Flesh firm and sweet. A good yellow variety.

SOUTHERN PRIZE—Grown strictly for greens. Popular for winter and spring salads.

EARLY WHITE FLAT DUTCH (Strap Leaf)—Very early white turnip, extensively used for the table. Roots are medium-sized, flat, very white-fleshed, fine-grained, and sweet.

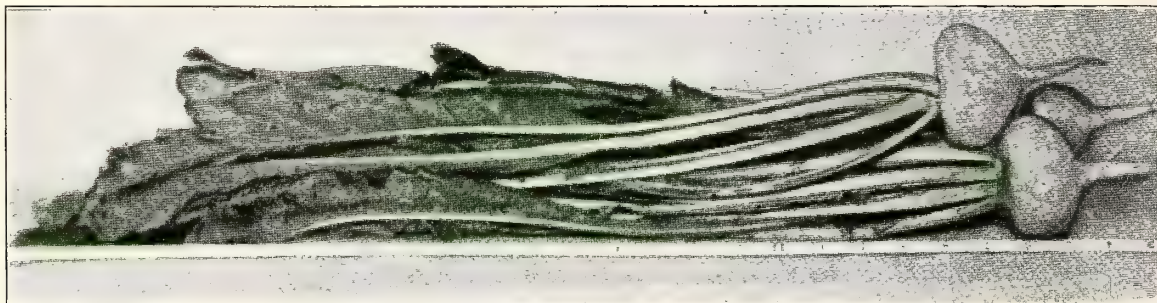

Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

SHOGIOIN or JAPANESE—A new variety extremely useful, especially valuable for turnip greens. Leaves grow upright about 2 feet high when fully developed, and due to its rapid growth, it is practically free from insect attacks. Roots pure white, between flat and globe in shape; very popular with the canners. Sometimes sold as louse-resistant turnip. **Postpaid prices:** Pkt. 5c; oz. 15c; ¼ lb. 25c; lb. 65c.

SEE SPECIAL LIST FOR QUANTITY PRICES.

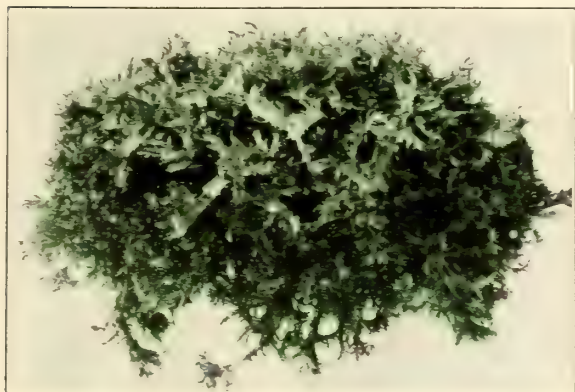

Rutabaga.

Shogoin or Japanese.

For Garnishing and Salads

Large Green Curled Endive.

Lettuce

CULTURE—To have the best lettuce, it should be kept growing rapidly. A light, rich soil will do this. For the earliest, start the seed in a cold-frame in the fall and protect through the winter. Transplant to open ground as soon as the ground can be worked. For later use, sow the seed in the open ground when the season will permit, in rows a foot apart. Thin the plants in the rows to 4 to 6 inches, depending on the variety. A packet will sow about 25 feet of drill; an ounce 150 feet; 3 pounds to the acre.

BIG BOSTON—Very popular for outdoor culture and is also in demand as a compact, large-heading, forcing variety for cold-frames. Leaves are bright light green, heads slightly tinged with reddish-brown. Heads up under cold weather conditions better than any other variety; is grown extensively in the South for shipment to northern markets. Prices: Pkt. 10c; oz. 15c; 1/4 lb. 50c; lb. \$1.50; postpaid.

Improved Hanson.

IMPROVED HANSON — The most desirable late summer variety; stands the hot, dry weather better than most summer varieties. Thin-leaved, curly, tight-headed, used extensively for the home garden as well as the market. Prices: Pkt. 10c; oz. 15c; 1/4 lb. 45c; lb. \$1.40; postpaid.

PARIS WHITE COS or ROMAINE — Is sometimes called Celery Lettuce, as the shape somewhat resembles a celery plant. Inner leaves nearly white, slightly tinged with green and decidedly firm and sweet. Prices: Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.50; postpaid.

SIMPSON'S EARLY CURLED—Very extensively used for an early loose-leaved or clustering variety. Especially adapted for sowing thickly and cutting when the plants are young. Prices: Pkt. 10c; oz. 15c; 1/4 lb. 50c; lb. \$1.50; postpaid.

ICEBURG—A large crisp cabbage-heading variety, with very firm and hard heads and well blanched, usually sown in August for fall use. Leaves are medium green in color with faint brown tracing on the border. Prices: Pkt. 10c; oz. 20c; 1/4 lb. 50c; lb. \$1.50; postpaid.

WONDERFUL or NEW YORK—Also known as Los Angeles Lettuce. Much used as a fall and winter market variety. Plants are very large, strong and robust, withstanding both hot and dry weather, and are slow to run to seed. The inner leaves form a large head, and are a beautiful yellowish color. Prices: Pkt. 10c; oz. 20c; 1/4 lb. 65c; lb. \$2.10; postpaid.

SIMPSON'S BLACKSEEDED—Best variety for sowing outdoors where an exceedingly tender leaf is desired. This curly and thin-leaved bunching variety is uniformly attractive and remains of excellent quality a very long time. Prices: Pkt. 10c; oz. 15c; 1/4 lb. 45c; lb. \$1.40; postpaid.

EARLY PRIZEHEAD—This is a crisp, tender and strictly loose-leaved, non-heading variety. Plant is medium large, leaves broad, crumpled and frilled, outside leaves tinged red, inner leaves wholly green. Very popular for the home garden, but will not stand shipping or handling on the market. Prices: Pkt. 10c; oz. 15c; 1/4 lb. 45c; lb. \$1.40; postpaid.

Endive

CULTURE—For late spring and summer use, sow the seed in open ground during February or March. For fall use sow in July or August. Requires about 60 days to mature a crop. A fine salad crop; leaves are also used for garnishing and flavoring. Use a packet to 25 feet of drill; an ounce to 150 feet; 4 to 5 pounds per acre.

LARGE GREEN CURLED—Very hardy, vigorous-growing variety, with bright deep green leaves; highly esteemed for the market and home garden, and much used for salads. Prices: Pkt. 5c; oz. 15c; 1/4 lb. 30c; lb. \$1.00; postpaid.

Parsley

CULTURE—Parsley succeeds best on rich, mellow soil. The seed is slow in germinating and should be sown as early as possible in the spring and drill 1 to 2 feet apart. Cover not more than 1/2-inch with fine soil firmly pressed down. When the plants are well up, thin 8 to 12 inches apart in the row. Use a packet to 25 feet of drill; an ounce to 150 feet; 5 pounds to an acre.

DOUBLE CURLED—A vigorous compact growing variety, excellent for garnishing and flavoring, and a handsome decorative plant. Leaves are finely cut, and the edges heavily crimped. Most popular for both the market and home garden. Prices: Pkt. 5c; oz. 15c; 1/4 lb. 30c; lb. 90c; postpaid.

Square Brand Selected Tomato Seed

June Pink.

Use Hotkaps to mature tomatoes for early market and increase yield.

EARLY TEXAS SPECIAL—A bright scarlet variety not only on the surface, but all the way through. Fruits are large, regular in shape and a semi-globe type. Vines vigorous and prolific and bear their fruits in clusters. Very desirable for salad or slicing; also for canning. Fruits average from 7 to 8 ounces in weight and mature in 90 days after planting.

EARLY DETROIT—Another among the fine early purplish-pink varieties. Vines strong and very productive. Fruits smooth, uniform in size, nearly globe-shaped, firm and excellent quality. Good for shipping, marketing and home use.

JOHN BAER—An extra early scarlet-fruited variety. Vines very hardy and exceptionally productive. Fruits largest of the extra early varieties, nearly round, smooth, firm and of excellent quality. A desirable variety for market gardeners, shippers and canners.

ACME—An early, well-known, hardy and productive variety. Fruits are purplish-pink, round, smooth and of medium size, free from cracks. Stand shipment very well. A very good home garden variety also.

CHALK'S EARLY JEWEL—Fruits are a bright deep scarlet-red, nearly round, somewhat flattened, smooth and of large size. Ripen very early and the pickings continue through a long season. A fine variety for the home garden.

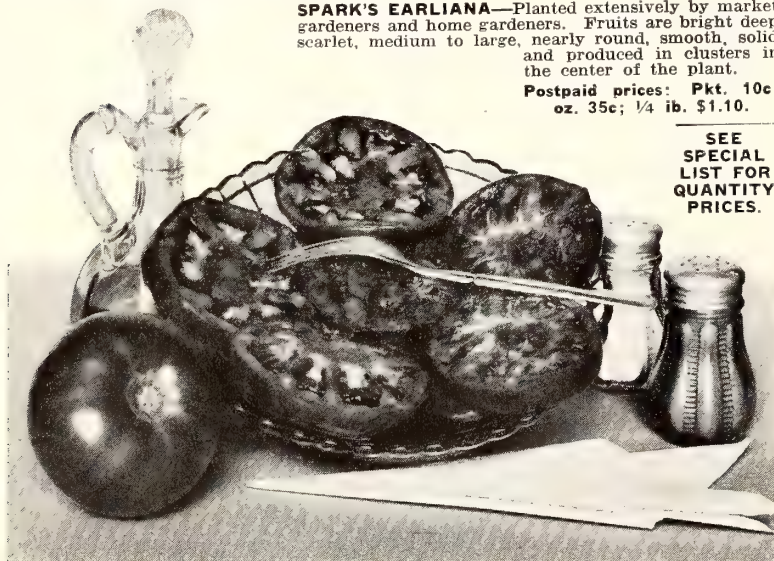

GULF STATE MARKET—Suitable for home or growing for local markets. Vines very hardy and fruits are true globe-shaped, free from cracks or blemishes around the blossom end. Ripen uniformly. The fruit colors a rich purplish-pink clear to the stem after picking.

BREAK O' DAY—A tomato developed by Dr. Fred J. Pritchard of the Department of Agriculture. A cross between Marvano and Marglobe. Fruit is the same color, shape and size as Marglobe, but is from 10 to 12 days earlier in maturity. Yields along with Bonny Best and other early varieties. A heavy yielder, globe-shaped, with few seeds.

SPARK'S EARLIANA—Planted extensively by market gardeners and home gardeners. Fruits are bright deep scarlet, medium to large, nearly round, smooth, solid and produced in clusters in the center of the plant.

Postpaid prices: Pkt. 10c; oz. 35c; 1/4 lb. \$1.10.

SEE
SPECIAL
LIST FOR
QUANTITY
PRICES.

Dwarf Champion.

CULTURE—Tomatoes do best on light, warm, not over-rich soil, and success depends largely upon securing a rapid, vigorous, and unchecked growth during the early part of the season. Sow in January and February in hotbeds for early crops. Set out the plants as soon as danger from frost is over, but before doing so, harden off the plants by gradually exposing them to the night air and by the withdrawal of water until the wood becomes hard and the leaves thick and of a dark green color. Transplant care-

fully and cultivate well as long as the vines will permit. If to be grown without training, the plants are usually set from three to four feet apart each way, according to the growth of the variety. All our tomato seed are from carefully selected seed stocks and we invite comparison of our stocks with any offered. A packet will produce about 100 plants; an ounce about 1,500 plants; 4 ounces will produce sufficient plants to set out an acre.

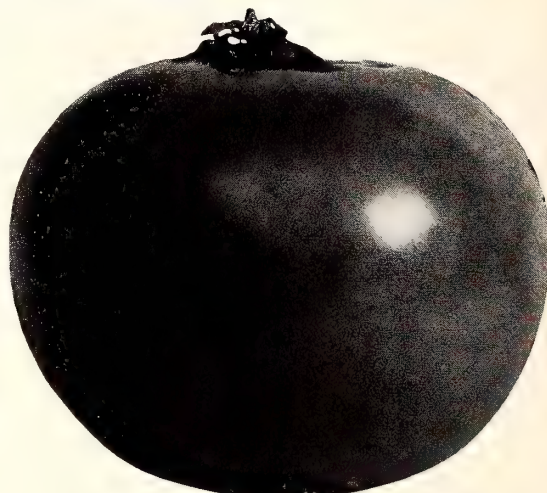

Early Varieties

JUNE PINK—The best and earliest of the pink varieties. Sets fruit in clusters of from six to eight. Fruit similar to the popular Earliana. Uniform, smooth and solid. Excellent for shipping. Recommended for market gardening. Matures early and continues bearing until frost. A very fine variety.

BONNY BEST—This variety is a favorite for forcing—just the size wanted; color rich scarlet red, very smooth, fruit set in bunches and in great abundance. Vines vigorous and very productive. Crop ripens uniformly. Very satisfactory for either market or home use.

CLARK'S EARLY—A variety which has proven very satisfactory to canners and shippers. Bright scarlet in color. Fruits large, semi-globe and remarkably regular in shape. Deep from stem to bloom end. Small core, small seed pockets and heavily meaty. Vines are vigorous and prolific. Fruits borne in most attractive clusters.

LOUISIANA PINK—Another very fine pink early variety, and an old and very popular variety. Fruits large, smooth and excellent for shipping. Vines strong and produce a remarkable quantity of fruit. Splendid for market.

Clark's Early.
Main Varieties

REDFIELD BEAUTY—A fine selected strain of Beauty Tomato. Large, smooth, flesh of finest quality. A glossy crimson. Vines extremely hardy and its comparative freedom from rotting under the most trying conditions makes it a favorite everywhere.

DWARF CHAMPION—A second early purplish-pink variety, especially desirable where garden space is limited. Vines about two feet high, vigorous, upright and compact. One of the best of the small tree varieties.

COOPER'S SPECIAL—Vines about 3 ft. tall. Produce good sized clusters of attractive fruit, medium size, globe shape, light purplish-pink color, solid and meaty. Flavor very fine. Exceptionally valuable for Southern shippers and equally valuable in the home garden.

LIVINGSTON GLOBE—A fine shipping type. Large, pink, round fruit grown on vigorous and prolific vines. Fruits are smooth and mature earlier than most mid-season varieties. You really should try these.

GREATER BALTIMORE—A good canner. Fruits medium to large sized, solid and meaty, of a rich bright red color. Very productive.

MARGLOBE—Another good shipping variety, as well as very desirable for home gardens. Fruits of deep red color, globe-shaped. Bred for resistance to disease—particularly nail head rust and wilt. Small core.

DWARF STONE—A splendid tree type. Late maturing; color bright red, exceedingly smooth and very solid. Desirable for the home garden. Growing in popularity.

SEE NEXT PAGE FOR PRICES.

Chalk's Early Jewel.

Small Fruited Tomatoes

For Preserving

RED CHERRY—A miniature tomato chiefly grown in the home garden for use in preserves. Mature in 70 days to a uniformly round shape and even size. Fruit scarlet red, tough skin and firm, mild flesh.

YELLOW PEAR—This attractive small fruit is extensively used for preserves in various ways. A rich clear yellow, well flavored. Ripen in 70 days.

Postpaid prices: Pkt. 10c; oz. 50c; ¼ lb. \$1.75.

See Page 19 for Tomato Plants.

Pepper

INDISPENSABLE FOR SAUCES AND SALADS
PLANT AT LEAST TWO VARIETIES

CULTURE—Sow seed early in hotbed, and when three inches high transplant in rows about 2½ feet apart and 2 feet apart in the row. Cultivate and keep free from weeds. Packet will produce about 100 plants; an ounce about 1000 plants; one-half pound will sow on acre.

Hot or Pungent Varieties

RED CHILI—A late variety. Pods are bright rich red, about 2 inches long, one-third to one-half inch in diameter at the base, tapering to a sharp point, and exceedingly hot when ripe.

LONG RED CAYENNE—A well-known, medium early variety, having a slender, twisted and pointed pod, about 4 inches long. The color is deep green when the fruit is young, and bright red when ripe. Flesh is extremely strong and hot.

Postpaid prices: Pkt. 10c; oz. 35c; ¼ lb. \$1.00.

Sweet Varieties

CALIFORNIA WONDER—A splendid new variety. Fruits are a dark green, smooth surface, square in cross-section, and very large, usually about 4 inches across, and 4 to 5 inches deep. Flesh usually ¼-inch thick, the thickest flesh of any pepper. Very desirable for the home garden and exceptionally profitable for commercial growers. Prices: Pkt. 10c; oz. 50c; ¼ lb. \$1.50; postpaid.

BELL, or BULL NOSE—Not as tall-growing as the later varieties, but vigorous, sturdy, and productive. Fruits are a medium size square shape, and when immature they are deep green in color, turning to a bright scarlet-red when ripe. Prices: Pkt. 10c; oz. 35c; ¼ lb. 90c; postpaid.

CHINESE GIANT—Plants vigorous and upright, about 2½ to 3 feet high. Fruits a rich deep green when immature, and bright scarlet-red when ripe. A desirable sort for the home garden and commercial growers. Flesh thick, mild and sweet, exceptionally desirable for use in salads; one of the best varieties for stuffing. Prices: Pkt. 10c; oz. 50c; ¼ lb. \$1.50; postpaid.

RUBY KING—An improved American variety, very large and attractive. Plants about 2½ feet high, vigorous, and compact. Fruits 4½ inches long, of deep green color when young, and bright red when ripe. Flesh thick and mild, one of the most popular varieties for stuffing. Prices: Pkt. 10c; oz. 30c; ¼ lb. 90c; postpaid.

WORLD BEATER—One of the largest varieties of sweet pepper. A cross between Ruby King and Chinese Giant, having the good qualities of both. When ripe it is bright scarlet, and the flesh is very thick, mild, and of a very fine flavor. Desirable for home or market use. Prices: Pkt. 10c; oz. 35c; ¼ lb. \$1.00; postpaid.

SEE SPECIAL LIST FOR QUANTITY PRICES.

Tomatoes (Continued)

McGEE—Yields where others fail. A very prolific variety. Fruits large, solid with very few seeds, of fine flavor and are a bright crimson color. Has proven exceptionally good for the black land belt.

NEW STONE—Unsurpassed for slicing and canning. Vines large, vigorous and quite productive. Fruits bright deep scarlet oval shape, especially smooth and uniform. Desirable for market or home gardeners.

KANSAS STANDARD—A fine variety, well adapted to growing in the Southwest. Fruits bright glossy red, round, slightly flattened and smooth. Few seeds. Flesh firm and well flavored. Keep well.

RED PONDEROSA—A large deep pink. Vines vigorous and very productive. Fruits solid with exceptionally few seeds, fairly smooth, and larger than any other variety. Good for slicing and well flavored.

GOLDEN PONDEROSA—Equal to the red type. Sliced and served with the Red Ponderosa, it makes a most decorative and appetizing salad. Runs nearly true to type, with a small percentage of mixed fruits.

Postpaid prices: Pkt. 10c; oz. 35c; ¼ lb. \$1.10.

Red Cayenne.

Use Hotcaps
for Earlier
and Larger
Yields.

Sweet Varieties (continued)

RUBY GIANT—Very attractive, grows to large size, exceptionally mild, and when ripe is of a bright scarlet color. Excellent for stuffing and a desirable sort for home or market gardens. Prices: Pkt. 10c; oz. 35c; ¼ lb. 95c; postpaid.

Pepper Plants

Ready for shipment about the middle of May. Prices: Postpaid—25 plants 35c; 50 plants 65c; 100 plants \$1.00. Write for prices in larger quantities.

Market Gardeners and Truckers should be sure to call for quantity prices before buying their requirements of Pepper Plants.

Greens are Energy Builders

Collards

Southern or Georgia Collard.

CULTURE—A tall, loose leaved cabbage-like plant grown for winter greens. Largely used in home gardens for table use; also grown by many truckers for the market. Seed should be sown thickly, transplanting when 4 inches high, or sow in drills where plants are to remain, and when well started thin to 2 or 3 feet apart in rows. One ounce to 200 feet of row; half pound for acre.

SOUTHERN or GEORGIA—An old-time favorite, very hardy. Plants grow 2 to 3 feet high, forming a cluster of tender leaves at the top of its rather long stem, and these leaves are used as greens.

CABBAGE or WHITE—A white heading variety that is as hardy as the ordinary collard but with better eating qualities.

Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 25c.

Swiss Chard or Spinach Beet

An outstanding green-leaved Swiss Chard. Leaves are almost identically like that of spinach, dark green in color. Will produce greens all summer, and is therefore available when spinach cannot be obtained. May be cooked and served as "boiled greens". Raised extensively by poultry growers, for green feed. This vegetable should be in every home garden. Postpaid prices: Pkt. 5c; oz. 15c; ¼ lb. 35c.

Swiss Chard or Spinach Beet.

Dwarf Green Curled Kale.

Kale or Borecole

A good cooked green—also splendid for poultry.

CULTURE—Plant during fall, winter or spring in rows 2 feet apart. Thin or transplant to 1½ to 2 feet apart in the row. One packet will plant 25 feet of drill; an ounce to 200 feet; 4 pounds will sow an acre.

DWARF GREEN CURLED—Finely curled, spreading, low-growing variety; very hardy and much used for greens. Largely planted for the home garden. Leaves are long and are of a bright green color.

TALL GREEN SCOTCH—The plant of this variety grows to 3 or 4 feet high, bearing long plume-like light green leaves which are deeply cut, also finely curled at the edges.

Postpaid prices: Pkt. 10c; oz. 15c; ¼ lb. 35c.

Reselected Bloomsdale Savoy.

Mustard

CULTURE—Mustard is only used as a condiment, but the green leaves are used as a salad, or cut and boiled like spinach. Sow as early in the spring as the ground will permit in drills about 18 inches apart, covering ½ inch deep. The seed may also be sown in autumn, and the plant used early in the spring as a salad and for greens. A packet will sow about 25 feet of drill; an ounce 100 feet; 2 to 3 pounds will plant an acre.

SOUTHERN GIANT CURLED—Leaves are large, light green with a tinge of yellow, much crimped and frilled at edges; plant upright or slightly spreading in growth. Highly esteemed in the South for the market as well as the home garden.

FLORIDA BROAD LEAF

Leaves are round and unfurled rough, and a very dark green. A little slower growing than the frilled varieties but longer standing.

CHINESE SMOOTH-LEAF

An excellent variety with very large light green plain, comparatively smooth leaves. Plant is of very quick growth.

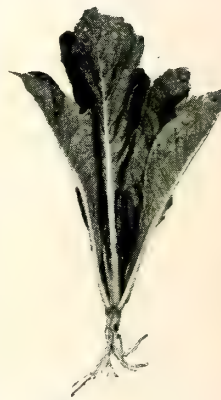

Florida Broad Leaf Mustard.

fairly upright when young, becoming somewhat spreading at maturity.

TENDERGREEN or JAPANESE MUSTARD SPINACH—A tender delicious quick-growing green. Is practically an all-season plant, and is ready for market 30 days from planting. It will stand extreme summer heat, also resistant to cold weather. Leaves are cooked and prepared for the table the same as Spinach, Turnip or Mustard Green.

Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 20c.

Tendergreens—A Delicious Green.

Reselected Spinach

CULTURE—The seed should be planted in very rich ground in drills 16 to 20 inches apart. Plants should be thinned out six inches apart in the row when the leaves are an inch wide. Seed may also be sown broadcast. The main crop is sown in September or October for winter use, and in February and March for spring use. A packet will sow about 25 feet of drill; an ounce 100 feet; 12 to 15 pounds per acre in drills; 20 to 25 pounds broadcast.

RESELECTED BLOOMSDALE SAVOY—A very early variety, and one of the best to plant in autumn for early spring use. Plants upright, with thick, glossy,

Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 20c.

dark green leaves of medium size, pointed but quite broad and crumpled.

VIROFLAY—Desirable for either spring or fall sowing. Leaves are very large, broad, thick, and arrow-shaped, much crumpled, and dark green in color. Desirable for canning.

NEW ZEALAND—Not related to true spinach but the leaves bear a resemblance to spinach and are useful as greens. Best for hot weather. The tender shoots are good quality, and may be cut throughout the summer. Plant three or four seeds in holes two feet apart each way. Germination of the seed can be hastened by soaking in warm water twenty-four hours before planting.

SEE SPECIAL LIST FOR QUANTITY PRICES.

The Delicious Cabbage Family

CULTURE—For early crop sow seed of the early varieties in hotbeds, or in a box that can be housed any time from the middle of December to the end of January. Plant out at the end of February or beginning of March in rows 2 feet apart and 18 inches between plants in row. For late or winter crops, the seed is sown in May and the plants set out in July.

Don't have the soil in the seedbed as rich as the field to which the cabbage is transplanted, or the plants will be starved after transplanting. Don't seed too thickly or force the growth too rapidly or the plants will grow too tall, slim and tender, and the growth be more seriously checked by adverse conditions. Root deeply to resist drought. When planting out, set to the first leaf on stems. Supply plenty of manure. A packet will produce 150 plants; an ounce 1,500 plants; $\frac{1}{2}$ pound will produce sufficient plants to set on an acre.

Early Varieties

EARLY JERSEY WAKEFIELD—The earliest and surest heading of the early cabbages for the market or home garden. Plants are exceedingly hardy, not only resisting cold but other unfavorable conditions; compact and erect with few outer leaves, which are smooth, thick, nearly oval and a deep green; the stem is short and the heads are of medium size, very solid and uniformly pointed.

COPENHAGEN MARKET—The earliest large round-headed cabbage; heads are very solid and of most excellent quality. Plants are vigorous but compact with short stems and few outer leaves. An excellent sort both for market and home garden.

CHARLESTON or LARGE WAKEFIELD—Finest spring variety for the South. Heads, when mature, average from 10 to 12 pounds each, very solid and hard. Remarkable for its quick growing habit, being two weeks earlier than the flat-head variety.

EARLY DRUMHEAD—A round flat type which produces a large head. Postpaid prices: Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c.

Copenhagen Market.

Pe-Tsai.

Second Early Varieties

ALL SEASON—A desirable large cabbage of intermediate season, adapted for fall and late summer use. Heads are nearly round or somewhat flattened, very solid and of excellent quality.

CHINESE or PE TSAI—This variety is straight and has short leaves. Makes a solid head with few outer leaves and matures quickly. The shape of the head somewhat resembles celery and for that reason this variety is sometimes called Celery Cabbage. If boiled like cabbage it must be cooked quickly.

STEIN'S FLAT DUTCH—The best and largest early flat cabbage for the South. Heads often weigh 20 pounds and are very solid. Mature earlier than any other variety of equal size. Highly suitable for every growing season.

LARGE LATE FLAT DUTCH—One of the best varieties for fall and winter use, largely planted by our local gardeners. Plants are exceptionally vigorous with large broad outer leaves which are moderately smooth.

SUCCESSION—Plant both spring and fall. Produces medium to large solid heads. This is a good variety for general purpose.

Postpaid prices: Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c.

FOR CABBAGE PLANTS SEE PAGE 19.

Cauliflower

CULTURE—For spring and early summer crop, sow in February or March in a hotbed. Transplant to cold frames when large enough to handle. Set out after all danger of hard freezing is past. The soil should be like that used for cabbage.

For a fall crop, sow in July or August and treat the plants as explained above. To bleach the heads, tie the leaves over them. A package will produce about 150 plants; an ounce about 2,000 plants.

EARLY SNOWBALL—Unquestionably the earliest maturing variety. Adapted for forcing or wintering over for early crop; also one of the best sorts for late summer and fall crop, most desirable for the home garden. Heads are of medium to large size, solid, round, very white and are developed earlier than those of any sort.

Postpaid prices: Pkt. 10c; $\frac{1}{2}$ oz. 75c; oz. \$1.25

Broccoli

Plant a packet this year—and you'll want this fine vegetable every year hereafter.

CULTURE—The same as Cauliflower. A packet will produce about 100 plants; one ounce will produce 1,500 plants.

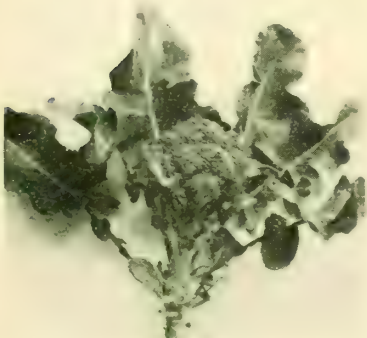

CALABRESE GREEN SPROUTING—A variety that is very popular in this section. The head is a compact cluster of tightly closed flower buds and resembles cauliflower only in shape. Served the same as asparagus. It is adapted to growing in spring, summer and fall.

Postpaid prices: Pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. \$1.25.

SEE SPECIAL LIST FOR QUANTITY PRICES.

Early Snowball Cauliflower.

Brussels Sprouts

A delightful vegetable, used extensively for boiling. Very good when served in cream sauce. Sprouts resemble miniature cabbages, growing closely on the stalk of the plant. Plant is very hardy and will live through the winter in most sections of the South. Plant and cultivate like cabbage. Be sure to plant some this year. Postpaid prices: Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 75c.

Asparagus.

Square Brand Egg-Plants

ARE DELICIOUS
STUFFED OR FRIED

CULTURE—Sow in hotbed in early spring and transplant to cold-frame when plants have two rough leaves on them. Set in open when all danger of frost or cold nights is past, and it is best to shade the young plant from the hot sun. Hoe frequently, keeping the soil loose and fine. Matures in about 120 days. A packet will produce about 150 plants; an ounce about 1,000 plants; ¼ pound for an acre.

BLACK BEAUTY—The earliest large Eggplant. Fruits are a rich dark purple. Disease-resistant and a very desirable sort for the market. Very popular with truckers in south and southwest Texas.

FLORIDA HIGH BUSH—A good variety for shipping and home garden use. Fruits are borne higher off the ground than any other variety. Not quite as early as Black Beauty.

NEW YORK PURPLE SPINELESS—A general favorite for the market and home garden. Fruits are large and free from thorns. Is only a few days later than Black Beauty in maturing.

Postpaid prices: Pkt. 10c; oz. 35c; ¼ lb. \$1.00.

SEE PAGE 19 FOR EGGPLANT PLANTS.

Okra

CULTURE—The young pods are used in soups, stews, catsups, etc. After danger of frost is past, sow in rows about 2½ feet apart covering with about an inch of fine soil firmly pressed down. When about three inches high, thin to about 1 foot apart in the row. Cultivate and keep free from weeds. The pods are in best condition for use when from 1 to 3 inches long. Use a packet to about 25 feet of drill; an ounce to 100 feet; 8 pounds per acre.

DWARF STALK LONG GREEN POD—A sturdy dwarf-growing variety, quite early and productive. Pods are long and corrugated, attractive dark green in color. Very good for the home garden, and is of the type most used for canning.

TALL LONG GREEN—Tall stalks, long green pods.

Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

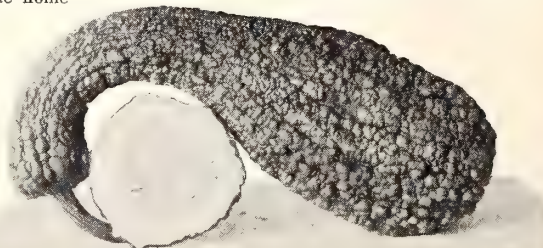

Dwarf
Long
Green
Pod
Okra.

Black Beauty Egg Plant.

WHITE VELVET—The standard variety planted for home use and local shipment. Pods are almost altogether free from ridges. Plants are about 3½ feet high and very productive.

Early Summer Crookneck Squash.

EARLY SUMMER CROOKNECK—Popular type of summer crookneck squash with bush vines. Fruits rather small, golden-yellow, and thickly covered with warts.

FORDHOOK VINING—A summer variety, adapted also for winter use. Fruits are about 8x3 inches in size; skin a light cream, while the sides are ridged or scalloped and taper toward the stemmed end; flesh extremely thick and sweet. It can be baked as you would bake sweet potatoes.

HUBBARD WARTED—Fruits are bronze-green and very attractive. A desirable winter squash. Fruits weigh 15 pounds.

GIANT STRAIGHTNECK—A very popular summer variety, preferred by many gardeners because necks do not break off so easily as the crookneck. Similar in size and flavor to the crookneck.

EARLY YELLOW BUSH—Very similar to Early White Bush except color is a golden yellow. Fruit somewhat sweeter. Mature in 60 days.

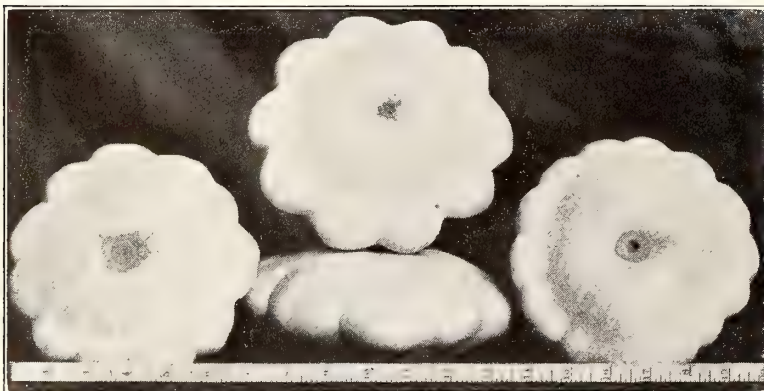

Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 30c.

SEE SPECIAL LIST FOR QUANTITY PRICES.

Square Brand Squash Seed

CULTURE—Plants are very tender and sensitive to cold and planting must be delayed until warm weather. The general principles of Culture are the same as those given for cucumbers and melons, but plants are less particular as to soil. Summer varieties should be planted four feet apart each way and the winter sorts eight feet. Three plants are sufficient for a hill. A packet will sow about 8 hills; an ounce 30 hills; 3 to 4 pounds per acre.

EARLY WHITE BUSH SCALLOP—The most popular of white summer types of squash. Fruits are rather small, quite flat, with ridges or scalloped edges. Extremely prolific, and disease-resistant.

Early White Bush.

Celery

CULTURE—Sow in February, March and April in a hotbed and transfer to a cold-frame to make them stocky and strong. Seed should be covered lightly, and keep the bed moist to insure quick germination. A packet will produce about 300 plants; an ounce about 3,000 plants.

GOLDEN SELF-BLANCHING—The finest early and most profitable celery in cultivation. It has a natural golden yellow plant, and blanches quickly. Postpaid prices: Pkt. 10c; oz. 60c; ¼ lb. \$1.80.

Square Brand Cucumbers

Offer a wide variety of uses. May be served sliced, baked, boiled, stuffed, or pickled.

CULTURE—To obtain the largest yield of cucumbers, soil should be well enriched with well-rotted manure, or commercial fertilizer, and the location should be fully exposed to the sun. Plant the seed not over 1 inch deep in hills 4 to 6 feet apart each way, dropping 15 to 20 seeds in a hill. After the plants begin to crowd, thin to 3 plants to the hill. Give frequent but shallow cultivation until the plants make runners. Pick the fruit as soon as it is large enough before it begins to ripen, as the vines will cease setting fruit as soon as any seed begins to mature. In gathering for pickles, cut the stem instead of pulling the fruit off and be careful not to mar the fruit in any way; if the skin is broken, the pickles will not keep so well. Use a package to 14 hills; an ounce to 75 hills; 2 to 3 pounds per acre.

Golden Self-Blanching Celery.

BOSTON PICKLING—A variety very similar to Chicago Pickling. Used for pickling.

EVERBEARING—An extremely productive favorite. Bears continuously until frost and fruits of every age, as well as blossoms, may be found on a single vine. Very hardy.

KIRBY STAYGREEN—A small early shipping cucumber, intensely dark green in color. Especially recommended for earliness and productiveness. Matures in 52 days.

LEMON—As its name indicates, it is a little similar in appearance to a lemon. Used for pickling and in salads. Fruits somewhat larger than a lemon and mature in 52 days.

ARLINGTON WHITE SPINE—One of the oldest types, and most popular. A main crop variety and a little later than improved White Spine. Very productive. Fruits are 9 by 2½ inches, with square block ends and weigh about 2 pounds.

IMPROVED LONG GREEN—The standard cucumber for either slicing or pickling. Vines are very vigorous and productive. It is medium late and the best variety for hardiness and disease resistance. Ends taper somewhat and it is slightly warted.

KLONDIKE—This is a White Spine variety, a little smaller than the Arlington; is used principally for long-distance shipping. Ends taper slightly and the fruits are smooth and symmetrical, measuring 7x2½ inches.

JAPANESE CLIMBING—A variety used for its climbing qualities to cover trellises and fences. The color when ripe is a deep russet, covered with a slight netting. Fruits measure 9x2½ inches.

See Special
List for
Quantity
Prices.

Klondike.

DAVIS PERFECT—A long, smooth cucumber, tapering at both ends, one of the most popular. A deep green color when in the slicing stage, and medium late in maturing.

EARLY CLUSTER—A small variety, fruits growing in clusters near the roots; very early, prolific and uniform, the second most popular of the early pickling strain.

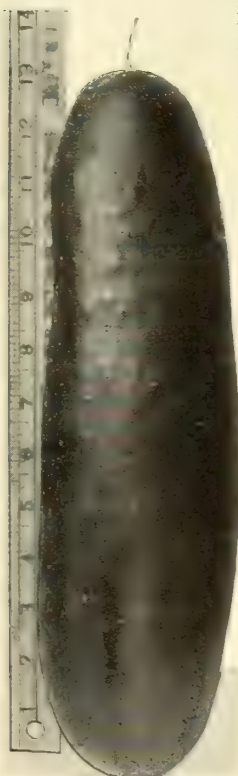

CHICAGO PICKLING—A very productive variety extensively grown for pickles. Vines are vigorous and the fruits are bright green, of medium size, very smooth and symmetrical, flesh crisp and tender.

SMALL GHERKIN—For Pickles. A very small, oval, prickly fruited variety, and should always be pickled when young and tender.

EARLY FORTUNE—The best shipping variety. Very early, productive and disease-resistant. Color a rich

dark green which does not fade when shipped a long distance.

Postpaid prices:
Pkt. 10c;
oz. 15c;
¼ lb. 35c.

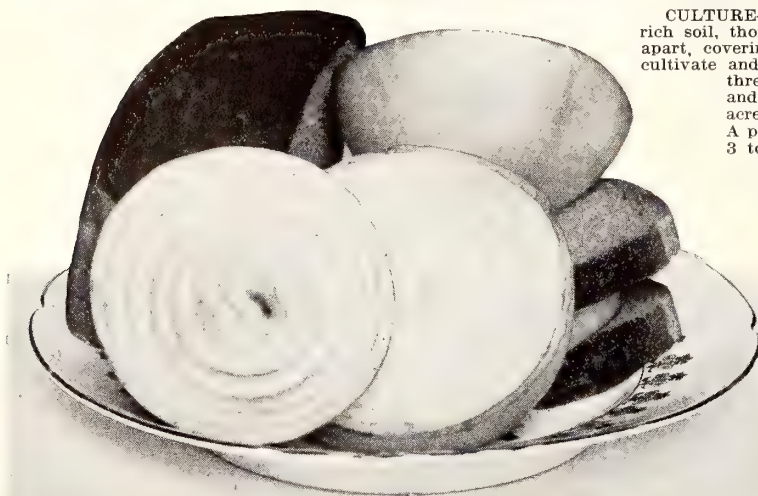

Improved Long Green Cucumber.

Early Fortune Cucumber.

Square Brand Onion Seed

Bermuda.

RED WETHERSFIELD—A variety of large size, very productive and an excellent keeper. Color deep purplish-red, flesh white, moderately grained and very mild.

SILVER SKIN—(WHITE PORTUGAL)—A medium sized onion of mild flavor, with a beautiful clear white skin. A favorite for use when young as a salad or bunching onion, and for pickles. Bulbs nearly round when of bunching size, and somewhat flattened when mature.

MAMMOTH SILVER KING—The largest of the White Onions. Flat and thick, mild in flavor and a good keeper.

WHITE PEARL—Early and popular with market gardeners. Large flat onion of mild flavor. Good for home use also.

GIANT YELLOW PRIZE-TAKER—Successfully grown in all parts of Texas and the Central South. Skin a light straw color, flesh pure white, very fine grained, and can be pulled 60 days after planting.

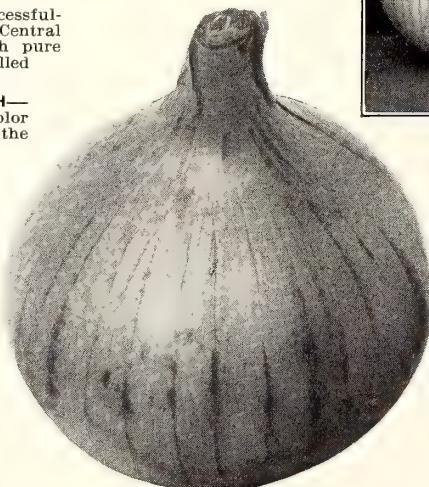

GIANT RIVERSIDE SWEET SPANISH—A globe-shaped onion of bright yellow color and mild flavor, a little larger than the Prizetaker. A good yielder and a splendid keeper; a fine variety for home or market use.

GIANT YELLOW DENIA—The improved yellow Prizetaker; very large, light yellow in color, globe-shaped, small top, and a wonderful shipper. Very mild, and of excellent flavor.

Prices: Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$2.00; postpaid.

Onion Plants.

Giant Yellow Denia.

Bermuda Onion Plants

Be sure to raise an early crop of Onions—from our genuine Bermuda Onion Plants.

For an early crop of onions, you should set out Bermuda Onion plants. A most desirable method to produce your onion crop, less labor and trouble, and you will have onions ahead of those who plant seed. Plants can be set out at the same time as Cabbage plants, in rows 15 inches apart and 3 to 4 inches apart in the rows. The following varieties furnished from January 10th to April 1st:

YELLOW BERMUDA—This variety described fully above.

CRYSTAL WHITE WAX BERMUDA—The most attractive onion grown. Fully described above. Postpaid prices:

25c per 100; \$1.00 per 500; \$1.75 per 1,000.

SEE SPECIAL LIST FOR QUANTITY PRICES.

CULTURE—As early in spring as ground can be worked sow in rich soil, thoroughly pulverized, and level in rows 13 to 15 inches apart, covering one-half inch deep. When the plants are well up, cultivate and keep free from weeds. When large enough, thin to three inches apart. If sets are wanted, sow seed thickly and don't thin out, using from 25 to 40 pounds of seed per acre when sown in beds and 8 to 10 lbs. when sown in rows. A packet will sow about 50 feet of drill; an ounce 150 feet; 3 to 4 pounds per acre.

BERMUDAS

We offer only true Tenerife grown Bermuda Onion Seed grown for us under contract, by the most reliable growers in the Canary Islands.

YELLOW BERMUDA—Sometimes called White Bermuda. Light straw color, and is very popular. Bulbs are somewhat flattened, of medium size, and very sweet. Will keep better and longer than the Crystal White Wax.

CRYSTAL WHITE WAX BERMUDA—Most attractive of all onions; a clear waxy white variety with a delightful mild flavor; somewhat flat, sometimes growing to the size of saucers. A popular variety.

Pkt. 10c; oz. 40c; ¼ lb. \$1.25; lb. \$3.75; postpaid.

OTHER VARIETIES

AUSTRALIAN BROWN—The long-keeping onion; will last through the winter if stored in a dry place. Has a neat round shape, very firm and solid in texture. Has a pungent flavor, and the skin is an amber-brown color.

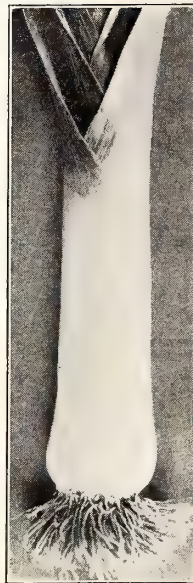

Silver Skin Onions.

Leek

Serve boiled and buttered on toast.

CULTURE—Sow in rows 18 inches apart and ½-inch deep. Seed should be covered firmly. Thin plants to 6 inches apart in the row and draw the earth about them when cultivating. A packet will sow about 25 feet of drill; an ounce 100 feet; 4 pounds to the acre.

LARGE AMERICAN FLAG—A desirable strong-growing, broad leaved leek; hardy and productive. A favorite with many market gardeners, also extensively used for the home garden. Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c; postpaid.

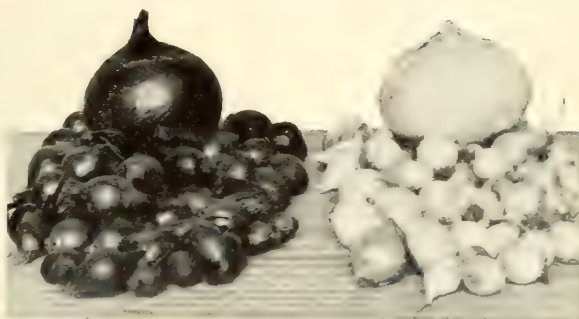

Large American Flag Leek.

Selected Onion Sets

RED—Very hardy and good keepers. Prices: Lb. 35c; 3 lbs. 90c; postpaid. Ask for prices in larger quantities.

YELLOW—Produce medium-sized, globe-shaped yellow onions. Prices: Lb. 35c; 3 lbs. 90c; postpaid. Ask for prices in larger quantities.

WHITE—These sets produce large silvery-white onions, of the finest quality. Prices: Lb. 35c; 3 lbs. 90c; postpaid. Ask for prices in larger quantities.

Onion Sets.

Frost Proof Cabbage Plants

Grown from Square Brand Seeds. Varieties: Early Jersey Wakefield, Charleston Wakefield, Stein's Early Flat Dutch, Copenhagen Market. Plants packed 100 to the bundle and orders filled in multiples of 100 only, one variety to the 100. Plants ready for shipment January 15th. Remittance must accompany order, no plants shipped C. O. D.

Postpaid prices: 100 plants 65c; 200 plants \$1.00. Write for special quantity prices.

Tomato Plants

Grown from Square Brand seeds, and ready for shipment about the middle of March. Varieties: Dwarf Champion, Dwarf Stone, McGee, Marglobe and Gulf State Market. Postpaid prices: 25 plants 35c; 50 plants 45c; 100 plants 65c. Write for special quantity prices.

Seed Irish Potatoes

IT PAYS TO PLANT CERTIFIED SEED AND TO TREAT WITH SEMESAN BEL

It is false economy to save fifty cents a bag by buying ordinary seed potatoes, when certified seed can be had. The most successful potato growers use nothing but certified seed. Certification has done for potatoes what breeding has done for horses, cattle, hogs, etc. Less disease, more No. 1 potatoes and greater profit to the grower. Every bag carries the tag of the inspection authorities; this is an assurance that every safeguard has been applied to have them as pure as is humanly possible.

CULTURE—Plant about four inches deep in rows 28 to 34 inches apart, and drop the potatoes 10 to 15 inches apart in the row. Soil should be well manured or well fertilized. A ridge should be thrown over the potatoes after planting and then leveled down just before the potatoes come through, and cultivate well until in bloom, and then ridge up again and leave alone until harvested.

CERTIFIED BLISS RED TRIUMPH—Those who prefer a potato with a pink skin and white flesh, or who grow for markets where this color is in demand, we recommend our Certified Bliss Triumph. It is one of the very earliest, nearly round, and peels without waste. A fine yielder and always in good demand. Ask for prices.

CERTIFIED IRISH COBBLER—A very good shipper, somewhat larger than the Triumph and white in color. Especially desirable for black soils. Ask for prices.

Certified Irish Cobbler.

Semesan Bel Increases Your Potato Yield

The spotty stand of potatoes on the left grown from untreated seed did not produce as large a yield as the stand of vigorous plants on the right, from Semesan Bel treated seed.

At a cost of only 1½c to 3c for each bushel of seed planted, you can disinfect your seed potatoes and increase your yield. Semesan Bel treats quickly, easily, and effectively. It insures you against scab and rhizoctonia—two virulent diseases that play havoc with potato production. Only by controlling these and other destructive diseases can you hope to obtain the lowest bushel cost and the greatest bushel profit.

A single pound of Semesan Bel will treat from 60 to 80 bushels of seed potatoes. Postpaid prices: 4 oz. tin 50c; 1 lb. tin \$1.75; 5 lb. tin \$8.00; 25 lb. pail \$31.25.

Egg-Plant Plants

Grown from Square Brand seeds. Black Beauty variety only. Plants packed 25 to the bundle, ready for shipment about the middle of April.

Postpaid prices: 25 plants 35c; 50 plants 65c; 100 plants \$1.00. Write for special quantity prices.

Seed Sweet Potatoes

CULTURE—Cover about five inches deep and water moderately. When plants are formed set one foot apart on ridges four feet apart, well drawn up and rather flat.

CERTIFIED PORTO RICAN YAMS—The best keeper. Flesh is fine grained, juicy; color, golden red. Prices: Pk. 40c; bu. \$1.50; not prepaid.

Sweet Potato Slips

Beginning about April 20th we will have Porto Rican Yam slips grown from Certified seed. Prices: 100 plants 40c; 500 plants \$1.50; 1,000 plants \$2.25; postpaid. Ask for prices on larger quantities.

Herbs

CULTURE—Most herbs thrive best in sandy soil and are better flavored when grown on poor soil. The soil should be carefully prepared and well cultivated as the young plants are easily choked out by weeds. Sow as early as the ground can be made ready in drills 16 to 18 inches apart, lightly pressing the soil over the seed. Most of them should be cut when in bloom, wilted in the sun and thoroughly dried in the shade.

CORIANDER—A hardy annual, cultivated for its seed which are used in confectioneries and to disguise the taste of medicine.

DILL—An annual of aromatic odor and warm pungent taste. Seeds are used for seasoning, produces medicinal properties but it is largely used for making dill pickles.

SAGE—One of the most extensively used herbs for seasoning. Cut the leaves in tender shoots just as the plant is coming into flower and dry quickly in the shade.

Postpaid prices: Pkt. 10c; 3 pkts. 25c.

Artichoke

SQUARE BRAND GREEN GLOBE—The scales and bottom of the flower heads are eaten, either boiled or as a salad. Sow in hotbeds or indoors until danger of frost is over. Then set in rows 4 feet apart and 2 feet apart in the row. Later in the fall cut off the old tops and thoroughly protect the rows with leaves or straw to prevent severe freezing. Postpaid: Pkt. 10c; ½ oz. 35c; oz. 65c.

Roots

ASPARAGUS—See page 16.

HORSERADISH—Horseradish can be grown successfully almost anywhere in the South, but gives best results in rich, rather moist, partly shaded locations. Postpaid: 40c per doz.; 25 roots 70c; 50 roots \$1.20; 100 roots \$2.15.

RHUBARB or PIE PLANT—The earliest plant you can use in the spring for pie-making and stewing. Also has great medicinal qualities. Recommended for Gulf Coast sections, but it does well in the central south and central north in moist, rich, heavily fertilized, partly shaded locations. Set out the roots in early spring. Postpaid: 25c each; \$2.50 per dozen.

Connecticut Field Pumpkin.

SMALL SUGAR PUMPKIN—A late, but very productive variety, thick, sweet flesh, adapted for all purposes. Fruits are round, and flat on the ends; with a deep orange color, and weigh from 6 to 7 pounds.

TENNESSEE SWEET POTATO—Fruits are pear shape, of medium size, and with a white skin, slightly mottled with green stripes of light shade. Fruits average 15 pounds in weight, and the flesh is a creamy white and very thick and sweet. Matures early and a very useful type.

WHITE CASHAW—Similar to the green striped strain but somewhat smaller, and the skin is pure white. Matures early and is a very pleasing variety.

Postpaid prices:

Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c.

KING OF MAMMOTH PUMPKIN—The largest of all pumpkins; often called Hundred Weight. Used largely for stock feeding, and for exhibition purposes. Bright lemon in color, mottled with orange color, round with a trace of ribbing. Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 35c; lb. \$1.00.

Pumpkins

CULTURE—May be planted in middle of spring among corn or in hills 8 to 10 feet apart each way. Four seeds in a hill. If planted in hills, they are cultivated in the same manner as melons and cucumbers. For winter use gather before frost and store in a warm, dry place. Use a packet to five hills; an ounce for 25 hills; 3 to 4 pounds per acre.

CONNECTICUT FIELD—Also called Big Tom. A standard cornfield variety, producing quantities of large orange-colored pumpkins, the fruits averaging 25 pounds in weight.

GREEN STRIPED CASHAW—Fruits are crook-necked, with the seed in the blossom end. Rind white, mottled with irregular green stripes. Average weight is about 12 pounds. Most popular of the Cashaw types. Early and very productive. Measures 16x10 inches.

JAPANESE PIE—Similar in shape to the Cashaw pumpkin, crook-necked, but the skin is a dark green, often showing a trace of lighter green stripes. A

very early popular variety, and furnishes a large amount of food for stock or canning. Fruits weigh from 10 to 12 pounds.

LARGE CHEESE—Fruits very flat, green-colored, and slightly ribbed. Widely used for canning purposes, keeps exceptionally well. Extremely prolific, and disease resistant. Fruits weigh 9 pounds.

KENTUCKY FIELD PUMPKIN—Used very largely for canning, and for stock feeding. Fruits flat; seed small and rough. A very hardy late variety. The fruits weigh 10 pounds, and measure 12x7 inches.

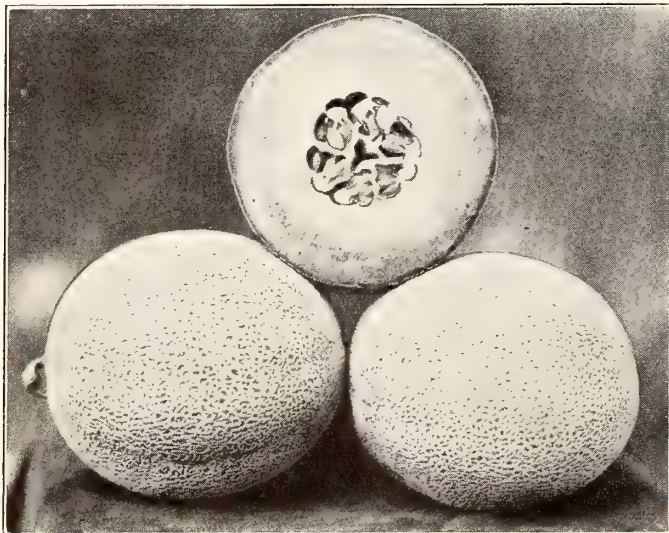

Postpaid prices: Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c.

Large Cheese Pumpkin.

Square Brand Cantaloupe or Muskmelon

CULTURE—After danger of frost is past, plant in rich soil, preferably sandy loam in hills of from 4 to 6 feet apart. Put 10 to 12 seeds in a hill, cover with about 1 inch of fine soil, firmly pressed down. When the plants begin to crowd, and the striped beetles are pretty well gone, thin to 4 of the most vigorous plants in the hill. Give frequent but shallow cultivation until the plants make runners. Rich earth for the young plants is far better than manure, but if the latter must be used, see that it is well rotted and thoroughly mixed with the soil. Use a packet to 16 hills; 1 ounce to 50 hills; 2 to 3 pounds to acre.

Gold Lined Rocky Ford.

Green Fleshed Varieties

GOLD LINED ROCKY FORD—A selected type from the green flesh Rocky Ford. Has a gold lining next to the seed cavity, making it unusually attractive when cut. Medium late in maturing. Flesh very thick, sweet and spicy; shape round with a complete covering of netting, and no ribs.

NETTED ROCK—This is a heavily netted type of the Rocky Ford with an almost absence of ribs. Flesh is green, sweet and spicy and has not been excelled by any other melon. Weighs 2½ pounds.

TEXAS CANNON BALL—Perfectly round green-fleshed melon, heavily netted. Early and its most remarkable feature is its thickness of the flesh. Melons weigh 3¼ pounds each.

EARLY GREEN NUTMEG—Fruits heavy ribbed and netted. This cantaloupe is small and almost round, but it is extremely prolific and a very early variety, and flesh is very delicious. The fact that it is so hardy and prolific makes it one of the most valuable of the early cantaloupes.

EARLY HACKENSACK—A melon demanded by many markets and extensively used in home gardens. Matures in 80 days. Fruits are medium large, nearly round, evenly and deeply ribbed and with a very coarse netting. Skin is green slightly tinted with yellow as fruits mature. Flesh green and medium fine texture, of very good flavor.

Postpaid prices: Pkt. 10c; oz. 15c; ¼ lb. 35c.

Hale's Best Cantaloupe.

Pollock 10-25.

IMPROVED PERFECTO—An early variety, ripening in 80 to 85 days. Seed cavity triangular, flesh a deeply tinted salmon color; shipping and keeping qualities excellent. Prices: Pkt. 10c; oz. 15c; ¼ lb. 30c; postpaid.

HONEY DEW—Shape of the Honey Dew is perfectly round, skin smooth, light cream in color. Matures quite late and does not grow to perfection except in the South. A very good shipping variety and if properly stored it will remain edible for months. Prices: Pkt. 10c; oz. 20c; ¼ lb. 50c; postpaid.

Mulch Paper

Will increase your yield of cantaloupes, berries, tomatoes, and other garden crops. Mulch paper conserves moisture, smothers weeds and effects enormous saving in labor. It is easy to apply. Write for our booklet "The Miracle of Mulch Paper". Type A, a light weight paper, is designed for annual field culture; Type B, a heavier weight, for biennial and perennial crops, especially fruits and flowers. Also used for home gardens. Type A, 900 ft. to the roll; Type B, 450 ft. to the roll.

	Shipping	F.O.B. Dallas
	Weight	Type A or B

36-Inch Width.....	60 lbs.	6.00 per roll

Hearts of Gold.

Square Brand Cantaloupes (Cont.)

Salmon Fleshed Varieties

HALE'S BEST—Salmon flesh of exceptional thickness. Shape is oval, with heavy netting and fairly prominent ribs. A remarkable, very early melon from the Imperial Valley in California. Prices: Pkt. 10c; oz. 15c; ¼ lb. 25c; postpaid.

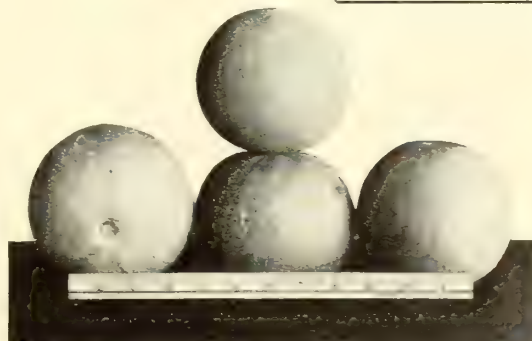

BURRELL GEM—An oval pink flesh melon, heavy netted. Ribs are not prominent, flesh very sweet and spicy. This melon ships very well. It yields abundantly and is second only to the Rocky Ford types in popularity for shipment. Melons are medium large. Postpaid prices: Pkt. 10c; oz. 15c; ¼ lb. 25c.

GOLDEN BEAUTY CASABA—The finest of the Casabas. Fruits nearly round. About 8 inches in diameter. Skin wrinkled. Golden colored

when ripe. Flesh white, very thick and sweet. Under proper conditions will keep 2 or 3 months. If you have not grown Casabas in the past, be sure to try them. Postpaid prices: Pkt. 10c; oz. 20c; ¼ lb. 50c.

HONEY BALL—A cross between the Texas Cannon Ball and Honey Dew Melon. The best drought-resisting melon that has ever been grown in Texas. A little larger in size than the Rocky Ford, is round and has a very thick wall of delicious green meat which can be eaten to the rind. Melons weigh 3½ pounds. Prices: Pkt. 10c; oz. 20c; ¼ lb. 50c; postpaid.

POLLOCK 10-25—A selection out of the Rocky Ford type; flesh salmon tinted instead of green; fruits uniform and heavily netted, with no trace of ribs; vines are rust resistant. Prices: Pkt. 10c; oz. 15c; ¼ lb. 30c; postpaid.

Honey Ball.

Improved Perfecto.

BANANA—An extremely long melon tapering at both ends; skin lemon colored when mature and the flesh pink; very delicious. Very vigorous and hardy, although rather late in maturing. Fruits measure 14x4 inches and weigh 7 pounds each. Prices: Pkt. 10c; oz. 15c; ¼ lb. 25c; postpaid.

HEARTS OF GOLD—Selection from Hoo Doo variety. Melons run very uniform in size. A splendid shipping variety steadily increasing in use. The seed cavity is remarkably small and the melon carries as well if not better than the Pollock types. Prices: Pkt. 10c; oz. 15c; postpaid.

Square Brand Southern Grown Watermelons

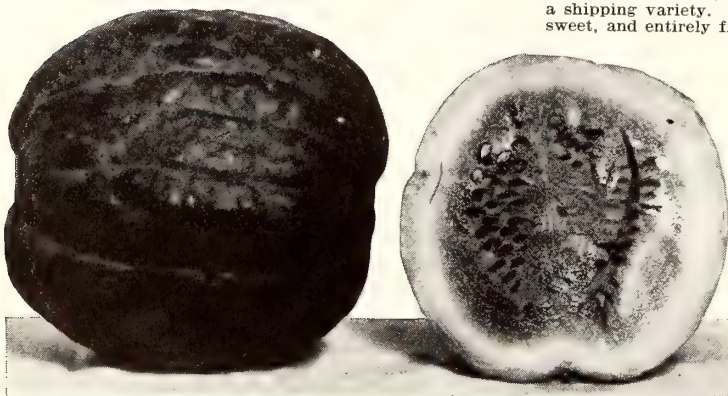

CULTURE—The seed should be planted in hills about 8 feet apart and it is well to work into the soil an abundance of well-rotted manure. It is important that the seed should not be planted before the ground becomes warm and dry, as the young plants are very sensitive to cold and wet. Put 10 to 12 seeds in a hill. When the plants have formed the first pair of rough leaves, they should be thinned so as to leave 2 or 3 of the strongest and best to each hill. Frequent watering of the plants, with liquid manure, will hasten the growth, thus diminishing the danger from insect pests. Cultivate until vines cover the ground. A packet will plant about 10 hills; an ounce 30 hills; 3 to 4 pounds per acre in hills.

Square Brand
Special.

Tom Watson
Watermelon.

Kleckley Sweet.

Stone Mountain.

STONE MOUNTAIN—An extra large and heavy melon, almost round. Rind dark green and medium tough. Flesh a rich scarlet, extra sweet, and free from stringiness. For home and nearby market use this variety stands up under most trying conditions, making fine crops of late melons that sell over any other melon. **Prices:** Pkt. 10c; oz. 20c; ¼ lb. 40c; lb. \$1.25; postpaid.

HALBERT HONEY—A medium early home market melon. Is second only to Kleckley Sweet in popularity for home gardens and nearby markets. Shape, long and cylindrical; rind a deep green with fine grains. Melons average 35 pounds. The flesh is a delicious crimson-red nearly to the rind; entirely free from any stringiness. **Prices:** Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; postpaid.

RADIO—A dark green melon striped with mingled lighter green. Thick rind, insuring long keeping and making it a good shipping variety. Flesh deep red and sweet, entirely free from hard centers and stringiness. Vines very prolific, matures in 90 days. **Postpaid prices:** Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. 75c.

SQUARE BRAND SPECIAL TOM WATSON—Seed grown for us in Parker County, from selected stock seed, and will produce the very best melons that can be grown. We sell large amounts of this seed to the truck growers in Texas, as it is necessary for them to produce the largest and very best melons in order to market them. Melons sometimes weigh over 90 pounds, and are entirely free from white hearts or stinginess and as sweet and luscious as any other melon. If you are growing melons for the market, you should plant this seed, as it will produce fruits that will sell at sight and bring the highest possible prices. **Prices:** Pkt. 10c; oz. 20c; ¼ lb. 45c; lb. \$1.50; postpaid.

ALABAMA SWEET—Another melon with deep green rind, irregularly striped with darker shade of green. Splendid shipper. Flesh dark red, fine grained, free of stringiness. Melons average 30 pounds in weight and mature in 90 days. **Postpaid prices:** Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. 75c.

KLECKLEY'S SWEET—Sometimes called Monte Carlo. Vines are vigorous and productive. Fruits medium to large, oblong, tapering slightly towards the stem end. The flesh is a very bright rich red and is exceedingly sweet; will not stand shipping well. Edible in 87 days. Widely used for the home garden and nearby market. **Prices:** Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; postpaid.

IRISH GREY—A long melon, rather large in size, and becoming more popular as a shipping variety. The rind is a light green color, flesh a sparkling red, very sweet, and entirely free from stringiness. Vines are vigorous, healthy, and hold up and produce fine melons late in the summer where other sorts die out. Average weight 35 pounds. **Prices:** Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; postpaid.

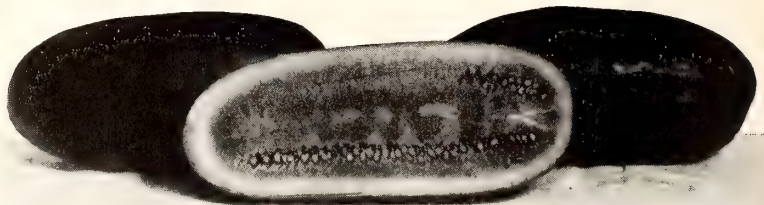

GOLDEN HONEY—The best of the yellow-fleshed melons. Oblong in shape, rind dark green with irregular stripes of a darker green. Average weight of the melons is 25 pounds, and they are edible in 90 days. The flesh is a speckled golden color, very attractive. **Prices:** Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; postpaid.

WONDER MELON—The most delicious flavored melon grown. Rich red flesh, full of flavor up to the rind and does not show hollow. The rind is thin but tough, insuring safe shipment for reasonable distances. It is large and long, resembling the Tom Watson, though it is thicker, and the color is a dark solid green that makes it very attractive in the markets. **Prices:** Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; postpaid.

TOM WATSON—Ideal for shipping. Rind a deep green, indistinctly veined and very tough and elastic. Shape long and cylindrical; flesh sweet, very firm, and crimson color. Very popular for home and market use. **Prices:** Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; postpaid.

ANGEL KISS—Oblong melon with mottled silver gray rind. Rind is very tough and thin. Bright red flesh which is solid and delicious flavored. A fine melon for home gardens, maturing in 90 days. **Postpaid prices:** Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. 75c.

GEORGIA RATTLESNAKE—Another light green melon, and one of the most popular shipping varieties. Flesh scarlet, tender and sweet. Rind is tough but thin. Matures in 95 days. **Postpaid prices:** Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. 75c.

Halbert Honey Melon.

Compressed Air Sprayers Sterling

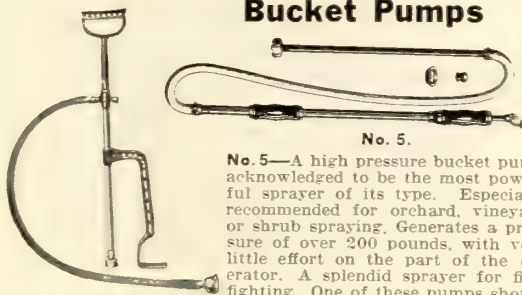

No. 115-G—Sterling Galvanized Tank, F. O. B. Dallas. \$4.95
No. 115-B—Sterling Copper Tank, F. O. B. Dallas. 6.25

Thrifty

For the small home owner, whose work does not justify a large capacity outfit. Capacity approximately 2½ gallons. Tank 6½ inches in diameter; 15 inches high. Pump 1¾ inches in diameter; 12 inches long. Packed one in a carton. Shipping weight approximately 7½ pounds.
No. 120-G—Thrifty Galvanized Tank, F. O. B. Dallas. \$3.95

Bucket Pumps

No. 5.

No. 5—A high pressure bucket pump acknowledged to be the most powerful sprayer of its type. Especially recommended for orchard, vineyard or shrub spraying. Generates a pressure of over 200 pounds, with very little effort on the part of the operator. A splendid sprayer for fire-fighting. One of these pumps should be available on every farm. Shipping weight, 3 pounds.

Price delivered to you. \$3.75 each

No. 6—A powerful bucket pump. Handle and foot rest of malleable iron. Pump of genuine brass throughout. Gives continuous even spray. Shipping weight, 6 pounds.

F. O. B. Dallas. \$3.25 each

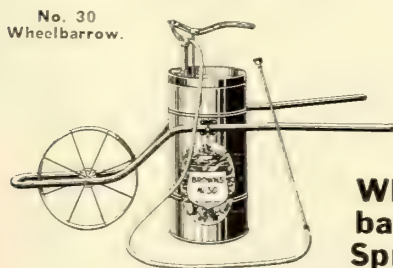

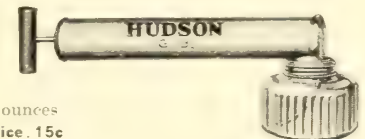

No. 7—A pump handle bucket pump of exceptionally durable construction. Equipped with air jet agitator. All pump parts and air chamber of solid brass. This pump is not equalled on the market. Shipping weight, 10 pounds. F. O. B. Dallas. \$4.75

No. 7.

Hand Sprayer

No. G-3½—Durable and useful glass jar sprayer. Large opening makes easy filling and cleaning. Curved syphon tube permits use in almost vertical position even when nearly empty. Capacity 4 ounces. Shipping weight, 2 lbs. F. O. B. Dallas price, 15c

Wheelbarrow Sprayer

We have only a few of these left in stock and when they are sold we will not have any more to offer at the exceptionally low price quoted.

This pump is built almost entirely of brass; vacuum cup agitator insures complete agitation. 12-gallon galvanized tank with a heavy truck frame and wheel. 6-foot hose; 2-foot iron extension. This is one of the biggest bargains ever offered. Shipping weight, 50 pounds.

Special F. O. B. Dallas price. \$12.50

Spray Bulb

This convenient small hand spray is very desirable for spraying ferns, window boxes, etc. Used extensively also for sprinkling clothes.

Postpaid to you. 75c

Continuous Hand Sprayers

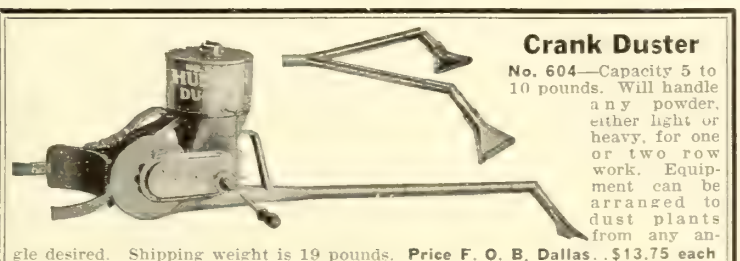

26-AG—A 26 type of continuous handsprayer with an easily cleanable glass container. This sprayer has proven to be very popular. Shipping weight, 3 pounds.

Price F. O. B. Dallas. \$1.10 each

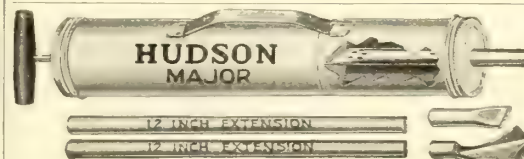

26-C—The same kind of sprayer as the 26 with a brass container. It is much more lasting than tin at very little additional cost. Shipping weight, 2 pounds.

F. O. B. Dallas. \$1.10 each

Crank Duster

No. 604—Capacity 5 to 10 pounds. Will handle any powder, either light or heavy, for one or two row work. Equipment can be arranged to dust plants from any angle desired. Shipping weight is 19 pounds. Price F. O. B. Dallas. \$13.75 each

Major Duster

Hand type. Powder reservoir 5 in. long, 2¾ in. in diameter. Special strainer prevents clogging. Comes complete with two 12-in. extensions and

two tins, as illustrated. Shipping weight, 2 pounds. No. 665—Major Duster, F. O. B. Dallas, \$1.25 each. No. 665-A—Major Duster (equipped with 12-inch flexible hose for Cyanogas use), F. O. B. Dallas, \$1.35 each.

The odor slowly emanating from the open tube will keep dogs at a distance—replaces unsightly wire screens or mechanical contrivances. Mailable. Tubes, 35c each; 3 for \$1.00.

DAWG-GONE—Protect your evergreens—keep dogs away. Remove cap and hang tube of DAWG-GONE (opening down) in the lower branches of trees at the points of approach. Not necessary to place tube in every tree unless standing alone.

Protect Your Plants From Insects

ASK FOR COMPLETE SPRAY CHART

ALL ROUND SPRAY—For flowers, vines, shrubs, roses, vegetables. All Round Spray contains the three leading remedies used by all large growers. Arsenate of lead, Nicotine Sulphate and Bordeaux Mixture. (Cannot be mailed.) Prices, F. O. B. Dallas: ¼ lb. 35c; 1 lb. 85c.

APHIS SPRAY—An improved nicotine spray combining a soft fish oil soap with Black Leaf 40, suitable for the control of all kinds of aphid (plant lice), thrip, leaf hopper and many more hardy insects infesting rose bushes, flowers, shrubs, vines, bushes and trees. Mixes easily with any kind of water. Complete directions found with every package. Price: 3 oz. collapsible tube 35c.

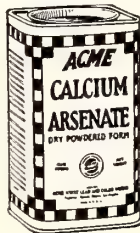

ARSENATE OF LEAD—Most favored arsenical insecticide. Safe to use on tender foliage and sticks well on the leaves. Recommended for fruit trees, vegetables, bushes and tobacco. Can be used as dust or spray. (Not mailable.) Prices: ½ lb. 25c; 1 lb. 35c; 4 lbs. 75c; F. O. B. Dallas.

BAIT-M—An effective insecticide bait which will throw a ring of protection around shrubs, flowers and plants in garden and lawn. For use against snails, slugs, cutworms, ear-wigs, sow bugs, grasshoppers and many other insects which migrate along the ground. Prices: Lb. 40c; 3 lbs. 75c; 15 lbs. \$2.75; F. O. B. Dallas.

BORDEAUX MIXTURE—Prevents large losses caused by blight, rot, mildew, scab, anthracnose and certain other fungous disease. It stimulates plant growth and greatly increases harvests. (Cannot be mailed.) Prices: F. O. B. Dallas, 1 lb. 35c; 4 lbs. 75c.

CALCIUM ARSENATE—Cheapest Arsenical insecticide on the market but efficient for certain purposes. Accepted as best for boll weevil poisoning on cotton, also recommended to combat chewing insects on potatoes, vegetables, cotton and certain fruit trees. (Not mailable.) Prices: F. O. B. Dallas, 1 lb. 30c; 4 lbs. 60c.

DUSTING SULPHUR—Keep your roses free from mildew, black spot, leaf spot and other hideous fungous diseases. Acme M-S-R Dusting Sulphur is a tonic for roses, chrysanthemums, phlox, delphiniums, sweet peas, lilacs, snapdragons and carnations—to make these flowers and many other plants yield their full measure of sweetness and beauty. Mailable. Price: 3 lb. sifter carton, 40c each; F. O. B. Dallas.

GARDEN GUARD—An insecticide and fungicide for use as a dust. Use on practically all forms of vegetables. Sifter carton. (Cannot be mailed.) Prices: Lb. 35c. F. O. B. Dallas.

SPRAY SOAP—Ideal for use with insecticides needing a spreader, and also used as a wash preventing spread of scale. Prices: Lb. 30c; 5 lbs. \$1.25; F. O. B. Dallas.

TWO WAY SPRAY—A combination of Arsenate of Lead and Bordeaux Mixture. Two results with one application. (Not mailable.) Prices: F. O. B. Dallas, 1 lb. 45c; 4 lbs. \$1.15.

LIME AND SULPHUR—Lime and sulphur converted into a dry powder. For use in dormant spraying against scale, peach-blight, leaf-blight, leaf-curl and twig borer. Summer spray against scab, soot, blotch, red spider and mite. (Cannot be mailed.) Prices: Lb. 35c; 5 lbs. \$1.40; 10 lbs. \$2.75; F. O. B. Dallas.

PARIS GREEN—A powerful poison carrying sure death to insects of the eating type. (Cannot be mailed.) Prices: ¼ lb. 20c; 1 lb. 50c; F. O. B. Dallas.

Antrol

Kills sweet loving, or grease loving ants **IN THE NEST**, at the source. It is safe to use around children or pets because there is no exposed poison. It is poured into a patented water, dirt and rust-proof glass container which keeps the syrup at the highest efficiency. It is easy to use—adapted to any size home or garden, and absolutely guaranteed to do the job, providing it is used according to directions and for the extermination of the small sweet and grease loving ants.

RAT-SCENT

A NATURAL FOOD FOR RATS—SURE POISON

RAT-SCENT is a poisoned grain—and grain is the natural food of a rat. When a rat approaches Rat-Scent, he smells it for the scent of the human body, but instead he smells a scent that has the same effect on him that fish has upon a cat. He tastes the bait and finds it better than it smells and he eats it greedily. It takes some little time for the blended poison to absorb into the blood stream, but after it does absorb, the rat has an uneasy feeling of suffocation and walks away from the bait, every step getting faster, running for fresh air until he drops. Other rats eating with him do not suspect that he is poisoned and therefore they keep on eating until they likewise experience the sense of suffocation.

MR. WILL C. OLIPHANT, Box 161, Friendswood, Texas, wrote us on September 4, 1933, after giving Rat-Scent a thorough trial: "The RAT-SCENT was just grand. The rats and mice were about to take the place. I had to keep everything covered up. They even ate papers and covers off of books and magazines. I put it out. It soon got rid of them. It is just wonderful."

Rat-Scent outwits the very keen sense of self-preservation possessed by every rat and therefore is an ideal exterminator. It is harmless to chickens; dogs and cats are not attracted to it because it is a whole grain, and it is extremely simple to use. Prices: F. O. B. Dallas, 35c and 50c.

Black Leaf 40 KILLS INSECTS

A highly concentrated nicotine solution for spraying. Does not injure foliage and is unquestionably one of the most effective poisons on the market against aphid, thrips, leaf-hoppers and many other insects. Used and endorsed by experiment stations and leading growers. (Cannot be mailed.) Prices: Oz. 35c; 5 oz. \$1.00; 1 lb. \$2.10; 2 lbs. \$3.10; 5 lbs. \$5.85; 10 lbs. \$9.85; F. O. B. Dallas.

Peach Borers

Should Be Killed With Paradichlorobenzene

The government-recommended control of the peach borer. Clean gum away from the tree trunk and clean ground around the base of the tree. Encircle the tree, two inches away from the trunk, with one ounce of Paradichlorobenzene and cover with fine earth. Pack down firmly. Cannot be mailed because it is a poison. Prices: F. O. B. Dallas, Lb. 75c; 5 lbs. \$3.25.

Oil Emulsion

Another government-recommended control for the spraying of orchards and shrubbery. It controls camphor scale, San Jose scale, white fly, purple scale, mealy bugs and other scale insects; also plant-lice and red spider. Prices: Qt. 35c; ½ gal. 65c; gal. \$1.00; 5 gal. \$4.50; 55-gal. drum, 55c per gal.; F. O. B. Dallas.

NEW EVER GREEN SPRAY

that 95% of gardeners will never need any other spray. Just mix the new improved Ever Green with water and spray. Nothing else is added. Its deadly pyrethrum content kills insects on plants such as aphids, leafrollers, rose beetles and many other of the more resistant insects—both chewing and sucking. It won't injure tenderest blossoms. It's non-poisonous to men and animals. One ounce makes as much as six gallons of spray.

Postpaid prices: 1 oz. 35c; 6 oz. \$1.00; 16 oz. \$2.00; 1 gallon \$12.00; mailable.

A NON-POISONOUS
WEED KILLER

ATLACIDE

CHLORATE WEED KILLER

VERY EFFECTIVE
ON POISON IVY

Atlacide, in contact with living plant sap, acts like blood poisoning in the human body and kills the entire plant system. In addition, it possesses certain other advantages not found in other Chlorates. Its effectiveness is increased because it is compounded particularly for weed killing purposes and is slightly acid in reaction. Its moist condition eliminates fire hazard. Sodium Chlorate has proven unsatisfactory as a weed killer because it dries immediately and is dangerously inflammable.

Atlacide has been used with entire satisfaction for killing weeds on thousands of farms throughout the country. Full results will not appear until the spring following application as chemical continues to work through the winter. Treated land may remain partially sterile during the summer following treatment, but Atlacide does not permanently affect soil fertility. Full instructions with each shipment.

Free From Chiggers!!

A repellent that keeps them off—harmless to the most delicate skin.

If you are susceptible to Chigger bites, you'll welcome this new freedom from their stings. No more welts—no more infections and no more danger of fevers. CHIGGER CHASER, a harmless, sweet-scented powder, dusted over your entire body positively repels chiggers and they will not bite.

Chigger Chaser

In sifter top cans.
Prices, postpaid:
2 oz. 25c; 5 oz. 50c.

Chigger Choke

A powder for application to your lawn, kills every chigger on the lawn, when properly applied. Price, F. O. B. Dallas, 5 lbs. (enough for an ordinary 50 ft. city lot), \$1.25; 100 lbs. \$15.00. This is a poison and cannot be mailed.

Tree Tanglefoot

STOPS ALL
CLIMBING INSECTS!

This is a sticky material for applying in bands around the trunks of trees and vines to combat the clinging and creeping type of destructive insect pests. It remains effective three to four months, outlasting ten to twenty times any other material. Easily applied with a wooden paddle. One pound makes fifteen or more lineal feet of bands.

Expands with growth of plants.

New Simple Way to Kill Garden Insects

Forget please—all complicated instructions about killing garden insects. New Ever Green kills such a wide range of insects

\$1,000.00 Bed Bug Killer

Because of the ease and rapidity with which they travel, and their ability to conceal themselves, Bed-Bugs are difficult to get rid of.

But when \$1000.00 Guaranteed Bed-Bug Killer is used it means sure death to the Bed-Bugs it reaches.

It is guaranteed when properly used to kill Bed-Bugs.

It is non-explosive and can be sprayed freely over a room, on the wall-paper, pictures, etc., without injury or stain.

The best results are obtained by using a hand sprayer which will force the liquid far into the cracks and crevices. In small homes an ordinary oil can or a spout on the Bug Killer can may be used.

Price, postpaid: 1 pint can 40c

Derrisol A SAFE GARDEN SPRAY

Destroys insects on flowers, fruits, vegetables and shrubs. Safe to use on delicate plants non-poisonous to humans and animals; odorless in solution. Requires no soap or spreader. Kills a great number of the important garden insects, including aphids, red spiders, thrips, leaf hoppers, cabbage worms, many leaf chewers and beetles. Recommended by Experimental Stations.

\$1,000.00 Guaranteed Ant-Bane

Of all the insect pests to which the household is subject, none is more difficult to get rid of than black and red ants. But not when \$1,000.00 Guaranteed Ant-Bane Powder is sifted about. It is a really effective and thorough Ant Remedy. When properly applied in accordance with directions, it is guaranteed to rid buildings of ants. The manufacturer will forfeit one thousand dollars if it can be proven to them that this preparation cannot rid buildings of these pests.

Postpaid price: 3 oz. can.....35c

A good sprayer is essential for the proper application of most insecticides. Refer to Page 23 for your sprayer.

\$1,000.00 Roach Killer

A positive guaranty of \$1,000.00 protects the use of this powder as an exterminator of roaches and water bugs. The manufacturers have not been called upon to pay this guaranty at any time, and the powder has been on the market for more than fifteen years. Roaches, water bugs and black beetles like and eat this powder. It is odorless and clean.

Price, postpaid: 3-oz. pkg...35c

Feed 3 times each year. You will be proud of your beautiful velvety lawn and handsome flowers.

Get Winter Profits from High Priced Eggs

Don't let your egg production drop way down when the weather gets cold. Use CEL-O-GLASS. And instead of fewer eggs, you'll have stronger, healthier hens that keep on producing just when egg prices are highest.

CEL-O-GLASS is the only window material with a wire mesh base with published scientific proof that it increases egg production. Back of CEL-O-GLASS is an 8-year record of performance on farms from coast to coast.

Many experiment stations have proved the value of CEL-O-GLASS. Use CEL-O-GLASS and you not only increase egg production, you practically eliminate thin-shelled eggs.

CEL-O-GLASS also keeps houses warmer, and pays for itself over and over again. Moreover, properly installed CEL-O-GLASS will last for years.

CEL-O-GLASS Poultry Houses are Health Houses

Other Uses for CEL-O-GLASS

CEL-O-GLASS in brooder houses prevents chick mortality, raises healthy chicks—in hog houses prevents weak legs. Good for dairy barns, cold frames, hot beds, back porches, storm windows, storm doors, and sleeping porches. It lets in the sunlight and keeps out the cold.

Write for free CEL-O-GLASS blueprints. Valuable whether you plan to build, remodel or install in present buildings

Oat Sprouters

Help Keep Up Winter Egg Production.

The frame is of steel, well braced and neatly painted. Has six heavy galvanized iron pans. Five of the pans have perforated bottoms to secure the proper drainage, and the bottom pan is solid to hold the drippings. Pans are interchangeable. Sectional frame can be quickly taken apart and stored in a small space.

The best results are obtained if the sprouter is placed in a cellar near the furnace or in a room with a temperature of 65 to 70 degrees. Use good oats and soak them in water for about 12 hours, then fill the trays to a depth of about 1 inch. Sprinkle and stir with a paddle EACH DAY until they sprout. Then discontinue stirring, but continue to sprinkle daily.

No lamp or heater required. Total height of frame, 3 feet. Size of pans, 16 inches by 18 inches. Packed knocked down, one in crate. No. 110—Oat Sprouter. Each, F. O. B. Dallas.....\$4.50

Sanitation Control Eliminates Diseases

The surest way to avoid poultry diseases—and thereby poultry losses—is to control the sanitation of your houses—yards—and insect pests on the poultry themselves. The listings below will aid you in keeping your premises clean and sanitary. They will also aid you to overcome the diseases which do attack your flock in the event your sanitation program does not work perfectly—or in the event you bring in diseased stock.

Kills Poultry Lice

The simplest way known to kill poultry lice. All you need to do is paint it on your roosts shortly before the fowls go in for the night. The heat from their bodies causes a slow release of fumes which penetrate the feathers and kill all lice and feather mites without discomfort to your fowls.

Black Leaf 40 does away with the need for individual handling. It does not interfere with egg production and it kills feather mites, as well as lice.

Apply one ounce to 12 or 15 running feet of roost or one pound to 200 feet of roost.

Black Leaf 40 is a poison and must be sent by express or freight. It is not accepted by the post office.

B-K Kills Germs and Deodorizes

A million poultry men, rabbit breeders, dairy-men and farmers use B-K because it is absolutely dependable in helping to prevent the spread of infectious diseases, and because it is so inexpensive to use. They know it is a powerful non-poisonous disinfectant, easy to apply—that has proved its efficacy as a germ killer for 20 years.

You, too, will find it helpful to use B-K to prevent the spread of infectious diseases. Full directions come with every bottle.

Postpaid prices: 4 oz. 30c; 10 oz. 50c; 1 qt. 90c; 1 gal. \$2.00; 5 gal. \$8.50.

B-K Powder

B-K in powder form, reduces the expense of shipping it around the country. It is of course not quite so convenient to use as in the liquid form. Full directions for its use come with each bottle. 9 1-3 oz. bottle, 75c; 1 3/4-lb. bottle (makes 3 gallons of 3 1/2 per cent sodium hypochlorite solution), \$1.50 each; postpaid.

Made from white mineral pigment, finely ground and combined with a disinfectant twenty times stronger than Carbolic Acid, but neither poisonous nor caustic to man, beast or bird. Kills germs, spiders and insects.

A disinfecting white paint, easily mixed with water, which can be applied WITH A BRUSH or sprayed on. Paints and disinfects, giving a smooth, white, creamy finish. Adheres to any surface and does not blister, flake or peel.

Can also be used in powder form as a dry disinfectant without causing moisture. In this form, it can be used in winter when it is not practical to disinfect livestock building with liquids. When mixed with water, one pound of Carbola is sufficient to cover 100 square feet.

Carbola is the finest thing for every house with a cellar.

Sodium Fluoride

A POSITIVE LICE CONTROL

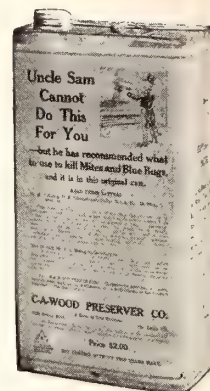

This frees poultry from lice when used as a dusting powder or dip. Also protects your home from roaches, flies, ants, etc. Whether this powder is dusted on your flock or the birds are dipped, you will find it will kill all the lice, provided the work is done right.

Carbolineum (C-A WOOD PRESERVER)

Kills Mites and Blue Bugs

The United States Government recommends a high boiled anthracene oil, known as carbolineum, for the extermination of mites and blue bugs. There are many grades of carbolineum offered the public and many of them are not carbolineum at all but simply a creosote oil. The value of carbolineum depends upon the slowness of evaporation and the carbolineum we are offering has the lowest point of evaporation that we are able to get. It evaporates so slowly that one application each year of C-A Wood Preserver will absolutely protect your fowls from mites and blue bugs, providing the application is made according to directions which come on each can. It will pay you to use C-A Wood Preserver one time each year and insure yourself against blood sucking mites and blue bugs. One gallon is sufficient for an 8x12 house.

PAR-I-NOX gets LICE and gets them NOW!

isfaction in fifteen minutes. **LOUSY HENS COST MONEY—DON'T WAIT**, but rid your flocks now of these blood-sucking pests. **PAR-I-NOX** costs only two cents per hen per year and with this economical lice destroyer you eliminate spraying, dusting and dipping, hours of needless work. Just sift a small amount of **PAR-I-NOX** in the dust wallows, nests, dropping boards, and on the floor and then watch the dead lice start dropping off your hens. **Delivered prices: 12 oz. 30c; 1 1/2 lbs. 50c; 3 lbs. 75c; 6 lbs. \$1.00; 25-lb. pails \$4.00.**

Double D Flock Wormer

AN ECONOMICAL WORMER

which is fed in the drinking water, and gives the entire flock treatment without the labor of handling each bird. This wormer gets the worms, cuts down your feed cost, and enables you to get more eggs. **Delivered prices: 8 oz. 50c; 16 oz. 95c.**

Kills Germs Deodorizes Disinfects

STERILAC has overcome all disadvantages of other chlorine disinfectants and germicides. It comes in powder form—and you do not have to pay heavy freight charges on water which can be added just as well by you as by anyone else. Being in powder form, there is less possibility of deterioration when subjected to air than when held in suspended form in water. It may be used in either hot or cold water, whereas in the past, such germicides deteriorated when placed in hot water.

STERILAC is 45 times stronger than carbolic acid as a germicide, yet it can be used without danger of poisoning.

STERILAC is especially effective for colds, roup, chicken pox and infectious bronchitis.

A one-pound bottle of **STERILAC** will make 480 gallons of sufficient strength for most purposes. Each gallon of solution will cost about one cent.

STERILAC is the most efficient disinfectant and deodorant for the dairy; the perfect sterilizer for the home. Write for Sterilac Booklets: "Sterilac for the Poultryman," "Sterilac for the Dairyman," "Sterilac in the Home."

Postpaid prices: 2 oz. bottle \$1.00; 8 oz. bottle \$2.50; 16 oz. bottle \$4.50; 5 lb. can \$18.00.

COUGHS, COLDS
and Simple
BRONCHITIS

Use

THE GREAT DOUBLE TREATMENT

Leemulsion and Vapo-Spray

These "twin remedies" have been used with best success for many years by thousands of flock owners. Simply spray Vapo-Spray in the air of the poultry house. Its soothing, germicidal oils, in vapor form, are breathed down through head, throat and wind-pipe. Leemulsion, fed in the mash allays cough and reduces temperature. ONE WORKS FROM THE INSIDE OUT AND THE OTHER WORKS IN FROM THE OUTSIDE. A common sense treatment.

LEEMULSION

12 oz. bottle \$1.00; 32 oz. bottle \$2.00.

LEE'S VAPO-SPRAY

1 quart can 75c; 1/2 gallon can \$1.25;
1 gallon can \$2.00.
Postpaid Prices.

Epsom Salts

A home remedy with which everyone is familiar. When tobacco dust is used for worming, salts should be fed afterward. Salts should be kept clean and dry at all times. We recommend that it be fed one pound to 125 fowls over six months old; one pound to 150 fowls from five to six months old; one pound to 300 fowls three to five months old; one pound to 400 fowls two to three months old, and one pound to 500 fowls six to eight weeks old.

F & E Chick Pick Remedy

A habit-breaking ointment that quickly overcomes cannibalism. It was originated and offered in one of the largest poultry districts in America—produced for one purpose only—to overcome the vicious picking habit of chicks and older birds.

Be sure to have a supply of this when you get your baby chicks. So many conditions may start the picking habit and it spreads rapidly once the birds taste blood. An immediate generous application of F. & E. Chick Pick Remedy, however, not only quickly breaks the birds of the vicious habit but assists in healing the raw flesh of the picked ones. Repeat application if necessary and follow carefully the directions shown on each can. Prices: Per can, postpaid, 50c; per dozen, postpaid, \$5.75.

Other Lee Remedies

The Geo. H. Lee Co. issues one of the most instructive books we have ever seen on poultry diseases. A free copy will be sent you gladly on request.

Germozone

A Life Saver for Chicks.

This is one product you should by all means give your baby chicks in their water. Full instructions comes with each package.

Sulphur

Another home remedy which is quite effective. A preventive of sorehead and chicken pox and often fed to remove lice. Many patent remedies for the removal of lice and mites are nothing but sulphur and water. We do not recommend this, since it does not destroy the pest and as soon as the remedy is discontinued, the fowl is back in the same condition. Sulphur is good for the prevention of sorehead and chicken pox, however. Feed 2 lbs. to the 100 lbs. of mash.

3 lbs., Postpaid.....25c

Tobacco Dust

This is a proven expellent, frequently recommended by State Experiment Stations. It is fed in the mash, 2 lbs. to the 100 lbs. of mash, for three days; then discontinued for three weeks; fed again for three days, discontinued for three weeks and a final three day feeding follows. After each feeding, some epsom salts should be fed for a day to remove the effects of the tobacco dust.

Guaranteed 1% tobacco dust. Prices: 3 lbs. 20c; 10 lbs. 65c; 100 lbs. \$5.95; F. O. B. Dallas.

Walko Poultry Remedy

One of the best known and most generally used diarrhoea remedies on the market. Good for roup and cholera. Price: Boxes 50c and \$1.00; postpaid.

Jahnke's Poultry Powder

For roup, colds, cholera, white diarrhoea, etc. Placed in the drinking water it promptly kills the germs. Does not color the drinking water. Sick chickens should be separated from well ones and treated vigorously. Price: Postpaid, 60c per box.

Barnes Emulsion

Vitality builder and worm control. Your chicks can be healthy and strong if they are hatched from good stock and brooded carefully, fed carefully and kept free from worms.

Barnes Emulsion aids digestion and assimilation of food. This means huskier chicks and greater freedom from all bowel troubles.

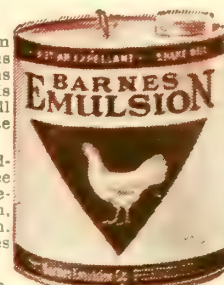

We recommend feeding Barnes Emulsion to your flock from the day-old chicks through the pullet stage, and continuously as laying hens. Our experience, and that of a number of poultrymen over the state, is that proper handling in this way invariably produces healthier fowls which reach maturity early and result in sound, healthy, high-production hens.

The most usual cause for non-development is malnutrition, due to worm infestation. The worms absorb the nutrients and the bird is slowly starved. It is a

well known fact that pullets should be free from worms before being placed in the laying house. It is also a fact that they should not be treated with poisons to free them from round worms. Barnes Emulsion is not a poison. It cannot harm your poultry and will assist assimilation of food nutrients and promote normal development.

Make a comparative test of Barnes Emulsion, feeding 10 baby chicks Barnes Emulsion the first three weeks of their lives and ten days each month thereafter and feed 10 more baby chicks of the same hatch, all other conditions identical without Barnes Emulsion. We are confident you will be a consistent Barnes Emulsion user from that time forward.

Delivered prices: Qt. \$1.00; gal. \$3.00; 5 gals. \$12.50; 30 gals. \$58.50.

Hatchery Supplies

Magnolia Shipping Box

GOOD CHICKS DESERVE GOOD BOXES

MAGNOLIA BOXES help you to build permanent customers by pleasing your customer at first sight, and by protecting your chicks so that they are in good condition when received.

This year's box is printed in 2 colors—corners are slotted so as to make assembly more attractive; partitions are scored so that they turn in one direction on one side, and in the reverse direction on the other; partitions are punched for more satisfactory ventilation; top of box con-

tains four holes in the center for better ventilation; and insides are slightly scored where partitions attach to box, for increased ease and speed in setting up.

The boxes are made of high grade, strong corrugated board, weather-proofed kraft outside and chip liner. All holes semi-punched, permitting complete control of ventilation.

All boxes wrapped 12 to the bundle, without staples. We do not break bundles.

15 Chick Bags

These bags are made of tough paper, 12x14 inches in size and make an ideal bag for carrying baby chicks in quantities of from 1 to 15. The bags are satisfactorily ventilated, have slotted hand holds, and they furnish a solution to small deliveries at reasonable price. They are packed 250 to the bundle and weigh 15 pounds per bundle. Prices, F. O. B. Dallas: Less than 250, \$1.65 per 100; 250 to 1,000, \$3.75 per bundle of 250; 1,000 and over, \$12.50 per thousand.

Reliable Egg Scale

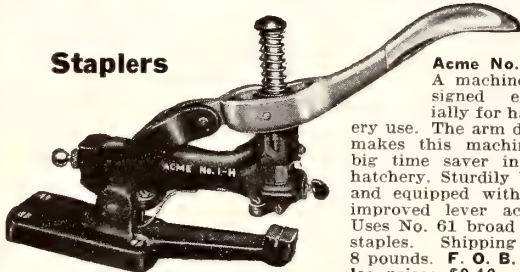

To conform with the code and trade regulations approved by the Government, it will be necessary for eggs which are set by hatcheries to weigh not less than one and five-sixths ounce per egg, and twenty-three ounces per dozen eggs, and for that reason we chose the Reliable Egg Scale as the most suitable for hatchery use because of its speed as well as efficiency. Being a beam type there are no loose weights to become lost. Its knife edge steel bearings insure accurate and rapid weighing. Wooden base is 12 3/4 x 2 3/4 inches and fits on the egg case. Cast iron stand supports brass beam on a steel knife edge with brass weight arranged so that it cannot come off of the beam. The accuracy of this scale is indisputable. Postpaid price... \$2.00

Blood Spot Eggs Reduce Your Grade and Displease Your Customers

They can be easily removed with this simple candler. Increases speed of candling and is one of the most practical instruments devised. Comes equipped with lamp. Each, postpaid... \$1.35

Grit, Oyster Shell and Charcoal

Laying hens need about three times as much lime and mineral matter as is furnished in grain and meat food. If this is not supplied there will be fewer eggs or soft-shelled eggs. Grit is the hen's teeth; oyster shell helps furnish lime for egg shells; charcoal is an absorber of gas. It aids digestion, sweetens the digestive tract and helps keep the bowels in good condition.

Glass Cloth

An Economical and Practical Substitute for Glass
For Use in Doors and Windows.

Chicks thrive amazingly under glass cloth. They get the ultra-violet sun rays and grow faster and healthier, feathering out into plump frying size several weeks earlier than when kept under glass.

A test with chicks at Iowa State College, at Ames, Iowa, proved that Glass Cloth is very valuable to the health of baby chicks. Of an equal number of chicks placed under glass and under glass cloth, 25 per cent of the chicks under glass died, while all under Glass Cloth lived. The 75 per cent that lived under glass gained only 180 per cent on their original weight, while those under Glass Cloth gained 250 per cent.

IDEAL FOR HOTBEDS

Light, strong and cheap. Glass Cloth is the ideal material for hotbeds and coldframes. Glass Cloth holds in the warmth and does not chill as quickly as window glass. Tender young plants need ultra-violet light, just as baby chicks do. Glass Cloth lets these rays through and as a result, you grow stronger, harder plants that will not be nearly so likely to burn up in the sun when you set them out.

Crystol Fabric

There are a number of substitutes for Glass Cloth on the market, but we find them from 35% to 70% less durable than this high grade product. The manufacturers of Glass Cloth, however, realizing that some people might want a cheaper fabric, have manufactured their Crystol Fabric to meet the demand for a lighter weight, less expensive cloth.

We recommend Crystol Fabric where a light weight fabric is desired to use for just a short time. Glass Cloth will outlast Crystol Fabric four times the normal life of Crystol Fabric; yet if you do not need long life, there is no advantage in paying for it. 36 in. wide.

No. 63—Easily fitted to any orange or ordinary wood box or coop and gives the breeder the opportunity to use a size nest best adaptable to his birds, with uniform automatic trap feature. Effectively traps the hen, yet allows ample ventilation. Easy to remove hen or clean the nest. 11 inches wide by 12 inches high. Size of opening, 8 inches by 9 inches. Packed 12 in box. Weight, per dozen, 16 lbs. Each, F. O. B. Dallas.....55c

Magnolia Fibre-Free Poultry Litter

This litter promotes exercise, cleanliness, and helps control the temperature and humidity of the poultry house.

Our Litter is selected from the highest grade of peat. It is dug from the central beds of the peat deposit belt in Germany. After drying in the sun for 12 to 15 months, practically all fibre is removed and it is ground and graded over screens. The portions best suited for litter are put up into well compressed bales. When opened and broken up, this moss increases greatly in volume and one bale is sufficient to cover a floor area of at least 80 square feet, three inches deep.

Here are some of the reasons why Magnolia Fibre-Free Poultry Litter is demanded:

1. It is a Labor Saver. It lasts for months.
2. It Prevents Dampness, because of its great absorbing power. It will absorb several times its own weight in water.
3. It is Sanitary. Laboratory tests have shown it to be remarkably free from bacterial and parasitic life.

4. It Prevents the Spread of Disease by keeping the house dry and clean.
5. It Absorbs Offensive Odors, keeping the atmosphere of the house clean and pleasant.
6. It Keeps the House Warmer In Winter by acting as an insulator. It keeps the birds off the cold, damp floor.
7. It is Economical. Though the original cost may be slightly higher, it outlasts other litter two or three times, and saves the labor of handling.
8. It Provides a Light, Springy Mat for the Birds. Heavy birds do not injure themselves when alighting, thereby reducing bumble foot and lameness.
9. It Prevents Fire, because it contains practically no fibre. It takes an intense heat even to make Magnolia Fibre-Free Poultry Litter smoulder, and it will never blaze.
10. It Makes a Valuable Fertilizer. Not only does it preserve the plant-food value of the droppings, but the organic matter in peat moss itself is highly beneficial to the soil.

Magnolia Fibre-Free Litter, because it is free of fibre, absorbs better, can be used longer, is practically fire-proof and makes a splendid fertilizer.

Per bale of approximately 20 to 22 bu.....\$3.95

Grit and Shell Boxes

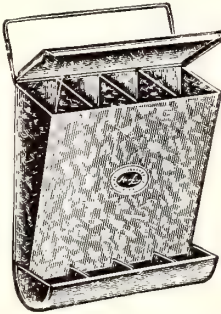

Feeding of grit, ground shells and charcoal is now recognized as an essential part of the diet to keep fowls in healthy, prime condition.

Our boxes are exceptionally economical and practical.

No. 45—For baby chicks, 2 compartments. Height 8 in., width 5 in., weight 2 lbs. Each, F. O. B. Dallas 40c

No. 9—3-compartment. Height 13 in., width 8½ in., weight 4 lbs. Each, F. O. B. Dallas 75c

No. 90—4-compartment. Height 13 in., width 11 in., weight 5 lbs. Each, F. O. B. Dallas 95c

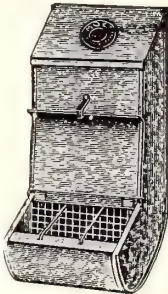

Dry Mash Hoppers

All the parts are accurately cut and stamped with dies, and the workmanship throughout is of the very best. The improved curved bottom keeps the feed within easy reach of the fowls and the taper shape of the hopper—larger at the bottom—prevents the feed from spilling and insures a gradual, automatic feed.

The wire grid and the wires running from the flange through the wire grid prevent the fowls from throwing out or wasting the feed.

The sloping top prevents them from roosting on the hopper. When both covers are closed it is rat, mouse and weather-proof.

Magnolia Adjustable Reel Feeders

This new feeder is designed along scientific lines to provide the most sanitary feeding conditions that can possibly be attained for chicks, starting at the day-old stage to the broiler age. The feeder may be used without the adjustable metal legs for day-old chicks, and as the chicks grow it may be raised by use of legs to any position from 1 1/4 inches to 3 inches off floor.

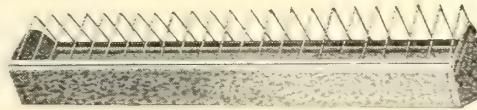

This feeder is made of the best grade galvanized iron. The 4-Fin reel is rust-proof, with case hardened pins at each end, and is painted green. Adjustable brackets which separate the reel at each end are held by rust-proof bolts and wing nuts, permitting easy and complete adjustment of headroom. You may raise your chicks from babies to broilers with this feeder.

Wire Guard Five Foot Feeders

A Five-Foot Feeder With Removable Trough.

The trough is made of extra heavy galvanized steel and holds 32 quarts of feed. It is five feet long, 8 inches wide and 5 inches deep. Has wide, turned-in flanges on each side to prevent waste of feed.

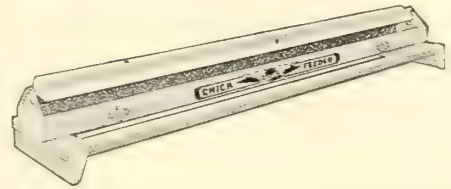

The wire guards are of heavy No. 7 hard galvanized wire, correctly spaced, and electrically welded. Hinged in one unit, so that the entire guard can be thrown back for filling and cleaning.

The trough rests securely on the stand, but is not bolted down and can be easily lifted off to dump and clean it. Stand has strong angle iron legs, well braced, complete with stout wooden perches. Total height on stand 27 inches.

Height of perches, 17 inches. Packed two in a crate. Shipping weight (two) 58 lbs.
No. 355—Complete with stand and wire guards.
Each, F. O. B. Dallas, \$4.75

Non-Spill Buttermilk Feeders

The adjustable Non-Spill Feeder is ideal for clabber or buttermilk because its exclusive construction prevents spilling when inverted after filling. Large free-flowing opening will not clog. Adapted for thin wet mash, dry mash or any liquids.

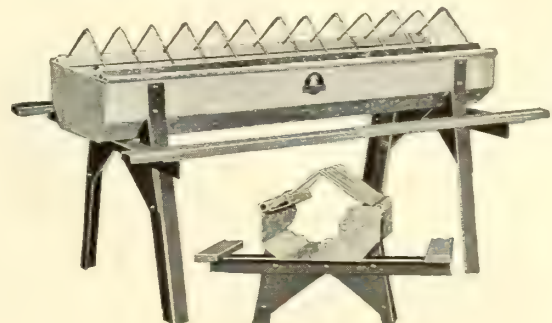

Four quarts. Packed 6 to crate. Shipping weight, 14 lbs. each.

Price each, F. O. B. Dallas, .85c

The Long Boy Feeder

A LONG TIME INVESTMENT

The heavy wire grid is firmly anchored in galvanized steel channels, which also act as a non-wasting guard. The grid is practically indestructible, simple and dependable in operation, snapping in and out. There are no hinges to give trouble. The trough, built of 26-gauge Prime Galvanized Steel, is of approved shape and size, with full rolled edge adding strength and improving appearance. The wide wooden perches are adjustable as to distance from the trough. The stand, built of 20-gauge black janned steel, is very substantial, easily capable of supporting 400 pounds dead weight. Grid and trough come assembled. Stand is shipped knocked down, but easily bolted together. Also come in reel, tumble guard.

**Spil-Pruf Crock Fount**

Eliminates splashing when inverted after filling. Made of best grade of stoneware. Especially desirable for sanitation. Easily cleaned and you know when it is clean.

Poultry raisers everywhere are realizing the advantage of stoneware feeders and founts. Those we are offering are of the simplest possible design for the proper feeding and watering of chicks, growing stock and grown stock. They require a minimum of attention, being fully glazed inside and out.

We like stoneware because it can be quickly cleaned and readily sterilized either with disinfectant and germicide or with boiling water. 4 quart, shipping weight 9 lbs., F. O. B. Dallas. 75c ea.

Use Pulvex for Fleas

This popular Flea Powder is based on an entirely different flea-killing principle. Its use always kills all the fleas and lice, instead of only stupefying them, allowing them later to revive and reinfest the animal. Pulvex not only kills the fleas and lice but keeps them off for 7 days or longer. Absolutely harmless, even if swallowed; non-irritating to the skin. Pulvex is ideal for cats and dogs as well as birds. Odorless, easy to use, economical. Pulvex will absolutely protect dogs, cats and birds against the discomforts and dangers of fleas.

2-oz. shaker can; postpaid. 50c

Large Capacity Fountain

VACUUM CONTROLLED— LAMP HEATED

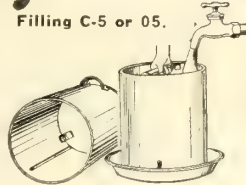

This fountain is of the double jacket, vacuum control type, and is quite satisfactory, although probably not quite so efficient as the float and valve type.

Water feed is automatic. Inner tank may be used for carrying water. Automatic shut-off valve prevents water from running from supply tank, while being filled. Cover locks onto inner jacket so that fountain can be lifted whether cover is in place or has been removed. Fountain is lifted from base to attend lamp. Lamp has 60 hour capacity.

Filling C-5 or 05.

Large Capacity Founts FLOAT AND VALVE CONTROLLED

Your egg production is dependent upon hens having available at all times, ample water supply. One hundred hens will drink from four to five gallons of water per day and egg production will stop within forty-eight hours if the water supply is cut off. Water should be kept fresh and clean and for that reason, large capacity containers are desirable. When the weather is cold, you must have protection from freezing. Our large capacity fountains are most practical for all purposes.

They are made of high grade galvanized rust resisting steel sheets, controlled by an improved adjustable float and valve arrangement, keeping the water at exactly the right level in the drinking pan. Drinking pan has two small round flues coming up to bottom of water container, allowing circulation of warm air and preventing water from getting too warm in the pan. This also prevents water from freezing in the large container. Easily cleaned and can be kept in an absolutely sanitary condition, with a minimum of labor. Lamp has 60-hour capacity.

Magnolia Automatic Fountain and Trough

Your water troubles are all over when you install a Magnolia Automatic. There are a quarter of a million now in use and you will hear them praised wherever they are installed. Any kind of pans or crocks may be used with this fountain with the best results. They are operated by gravity and the pressure of the water system should govern the size of the trough. They are frost-proof to the extent that they cannot be damaged by freezing.

Insulated Starting Brooder

PERFECT HEAT CONTROL IN EACH COMPARTMENT.

This brooder is designed to exactly meet the needs either of the poultryman who wishes a first-class unit to secure less mortality in brooding through the first three to five weeks, or for the hatcheryman needing a brooder to hold and display chicks in a store where the room temperature may drop to fifty degrees at night. It is also ideal for operators of battery plants who need a few starting batteries and do not wish to be under the necessity of controlling the room temperature. Besides being a remarkably economical unit, the Insulated Battery insures a great degree of safety under adverse conditions.

There is no comparison either from the angle of low operating cost, or the margin of safety secured by the use of genuine Masonite to enclose the brooding section instead of the usual galvanized steel. Masonite is extremely strong, a waterproof material formed of wood pulp subjected to great pressure at high temperature. It will last and retain heat for the life of the brooder. Floors are of finest screen wire, one-half inch mesh. The construction is exceptionally strong and the assembly of the brooder can be accomplished in a very short time. Head room 10½ inches, inside dimension 26 x 42 inches, and insulated space 26 x 14 inches.

Cut Out—Showing Heating Unit on Oil Brooder.

Electric equipment is the finest available. Each compartment is automatically controlled, has 150-watt element. The consumption is extremely low, being 2 kwh for 24 hours in rooms averaging 60 degrees. Temperature adjustments are made from outside and any compartment can be shut off entirely.

The oil heated type operates by admitting hot air into the compartments through thermostatically controlled intakes. No gas or fumes can enter. The design of the heater manifold

has been carefully perfected so that each compartment receives its share of heat. Chicks may be removed through swinging front and through hand hold provided at the back of brooding compartment. A false back attached to screen floor pulls out so that the chicks can be brought within easy reach at any time. Water and feed pans designed for most efficient operation. Four and Six Compartment brooders stocked in Dallas; Five Compartment will be shipped direct from factory.

Finishing Battery.

A battery designed especially for the commercial broiler producer, to raise chicks from five weeks to eight or ten weeks or older. Should not be used for handling young chicks.

It may be rolled through the ordinary door and can be stripped in a few minutes to a skeleton frame work for thorough cleaning. Being a moderate size it insures better ventilation. Its construction is so sturdy it overcomes the difficulties usually experienced with Battery Brooders in the way of leaning one way or another. Dropping pans are standard two-piece steel. Both halves pull out together from front and are instantly detachable. Two pans 26x21 inches are naturally much more convenient to handle than one large pan 26x42 inches, and of course far less likely to buckle

Finishing Battery

under continuous handling. Floors are of heavy ¾-inch mesh over a steel rod frame. Tinned after fabrication. A battery must have good floors, and all of our batteries do have good floors.

The front and side grids swing outward so that fowls may be removed at will from any side. Head room is 13 inches.

It handles about 25 birds per section to 2-lb. weight. 40 inches of feeders and 26 inches waterers per section are quite sufficient for this number. Feeders adjustable, upward or downward, which avoids feed waste.

Floor area 26x41 inches, or 1066 square inches. Capacity 100 2-lb. broilers, height 71 inches, width 32 inches, length 46 inches, shipping weight 210 lbs.

New Hen Battery

HEN BATTERIES INSURE HIGHER AVERAGE PRODUCTION

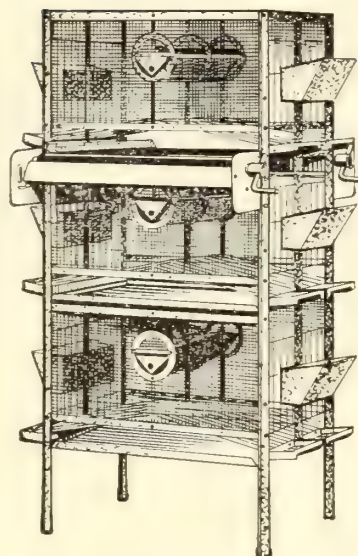

Automatic culling is an inbuilt feature in Hen Batteries and is far superior to trappeneing. It is impossible not to discover the slackers and non-producers. A card holder is built into the feed pans to carry the egg record. Ailing fowls are quickly observed with consequent greater opportunity to avoid a total loss. Battery culling means higher average production.

Decreased mortality may be confidently expected. Battery fowls avoid many of the hazards that the range bird must combat. Pick-outs, disease, worms, vermin and predatory birds and animals are successfully overcome by the laying battery. Hens are entirely comfortable and well content to occupy their apartment to the end of a long life.

Reduced feed cost is assured by the confinement and should exceed 10 pounds saving per hen annually. This alone more than pays substantial interest on the equipment. Labor is reduced when the 72 apartment laying battery, equipped with self-cleaning belts, is used.

Battery laid eggs are clean eggs. They roll gently forward and come to rest in the egg receivers at the front. They are uniform, are free from checks and generally of strong shell. They are kept out of the way of the hen so egg eating is practically unknown. Hen Laying Batteries are beyond the experimental period. They have been used consistently since 1924, although they are only now coming into general commercial use in a big way. The confinement seems to be unnatural but hens take kindly to it and it is practical and profitable to the owners.

wasting. The waterer is in the center and drain plug assists in cleaning and removing. Automatic running water system and self-cleaning belts are supplied for the 72 hen size only. We unhesitatingly recommend this Battery and urge its general use. It is far superior to any battery of which we know on the market today.

This battery is the final result of the operation of a MaKomb Hen Battery at the Century of Progress. One of these batteries was operated continuously from June 1st to the close of the "World Fair" in 1933. All weak points were determined and overcome. This new model profited from this long experience, and you will find it entirely practicable from all standpoints.

Each compartment is 18 inches long, 17½ inches high, 12 inches wide. Each 12 hen unit is 24 inches wide, 39 inches deep, 70 inches high.

Special attention is directed to waterers and feeders. It is essential that the waterers on a hen battery be as far as possible from the feeders, thus avoiding getting either water or feed into the other in any quantity. You thereby prevent mold and eliminate needless work. One big feeder serves two hens and is non-

Gro-Mor Brooders

This little brooder is fine for a small lot of chicks, or may be used in a heated room in considerable numbers.

Made of fiber board, with wire screen floor; durable and waterproof. Equipped with feed and water pans. The box is removable and can be replaced at nominal cost. Inside dimensions are 20 inches by 24 inches by 7½ inches high, giving ample head room for chicks three to four weeks old.

The illustration shows all details of construction, excepting the optional electrical equipment which consists of ten feet of cord, porcelain socket terminal plug, and circulating drum to enclose the bulb. Bulbs not furnished.

Silver Hen Electric.

Magnolia Silver Hen Brooder

This brooder will take care of your chicks in less space and with greater ease than any small brooder on the market.

It is the result of some years of experimenting and the last word in small brooder efficiency.

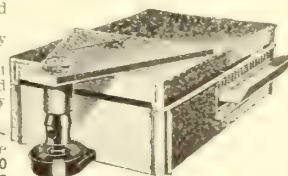

There is a heavy, well braced dropping pan under the finest wire screen, rust-proof floor we can secure. The feed holes are four inches long, with full turned edges and are fully adjustable so chicks, even the smallest, spryest leghorns, cannot escape. The adjusting slides perform double duty, as they support the feed and water pans and conveniently elevate them as needed. Feed pans are big, non-wasting. There is a chick exit in one side. The cover is handily hinged, and the back part bolts to the side walls. Built of heavy, prime galvanized steel throughout.

This brooder will care for 80 day old chicks, but the quantity placed in the brooder should be reduced regularly, as the chicks grow.

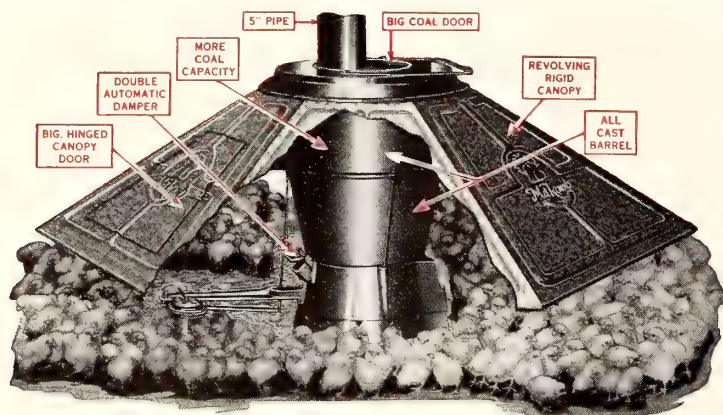

A rack for six units is available at moderate cost and makes up a reasonably satisfactory battery brooder. Inside dimensions, 24x30 inches.

Electrical equipment for 110 volt current includes thermostatic control and strip element, 10 feet cord and plug. Bulb type comes with 10 feet of cord and plug, but without bulb. Lamp heated equipment is slightly different in construction, being adjustable as to head size, and is thermostatically controlled.

Back View—Oil Heated Silver Hen.

Magnolia Standard Coal Brooder.

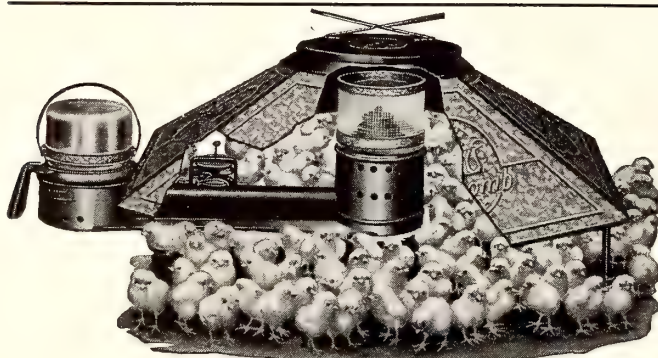

Junior Electric or Oil Heated Brooders

For small flocks this type of brooder is economical and practical. We illustrate the electric type, but it comes also in oil heated equipment.

For general use a 25-watt bulb provides ample heat, and with outside air touching freezing, a 40-watt bulb will maintain brooding temperatures. A galvanized steel drum encloses the bulb or oil lamp, preventing glare and producing steady circulation of the air throughout the brooder. The shell, canopy, is drawn of the best "Tite-Coat" Galvanized Steel, insulated with highly finished Masonite, which withstands long and hard use. The heavy, hemmed curtain is slit for chick convenience, and may be easily removed for cleaning. Packed complete with 10 feet of cord and screw plug, in strong shipping carton. The bulb is not furnished.

Magnolia Ker-O-Stat Brooder

ENTIRELY AUTOMATIC BLUE FLAME BROODER

This brooder has an automatic pilot light with thermostatic control offering complete automatic operation with no danger of flame going out. On warm days, only the pilot light burns, but it will relight the burner the minute outside temperature drops. Burner completely guarded by heavy steel shell with steel burner shield and heat diffuser. A drip pan below the burner catches any oil that might overflow and protects the floor from the burner's heat. High quality wire-woven asbestos lighting ring makes it possible to light the Ker-O-Stat without dangerous gasoline priming.

The $\frac{3}{8}$ -inch oil pipe line is a solid, one piece brazed unit, including the reservoir, connecting pipe and burner bowl. A drain plug at one end and two-way feed into the burner bowl gives safety from clogging.

This brooder is simple, positive and sturdy and you will be entirely pleased with it.

F. O. B.

55-inch	5- inch	500	53 lbs.	10.45	4.40	13.95

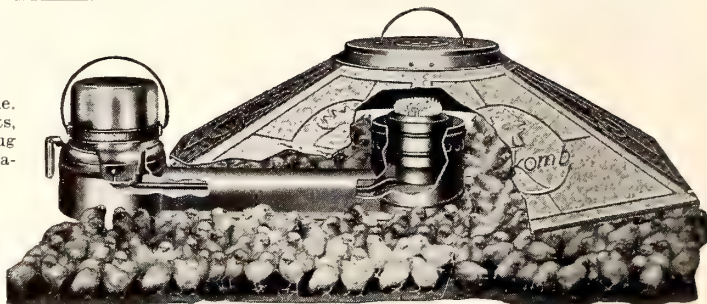

Magnolia Simplicity Brooder

A SPLENDID VALUE AT THE PRICE.

This brooder is simple to operate, very sturdy and durable. It maintains the flame at the point set, without valves, floats, or sliding joints. A $\frac{3}{8}$ -inch oil pipe line, with cleanout plug at end, is brazed from one end to the other to make it permanently leakproof.

Wire weave lighting ring eliminates bother and danger from gasoline priming. The "Never-Out" pilot light permits brooder to be turned off during warm days and started again at night without relighting. The heat deflecting shield protects the floor and a die drawn steel body, finished in lustrous enamel encloses and protects all parts.

Standard Coal Brooder

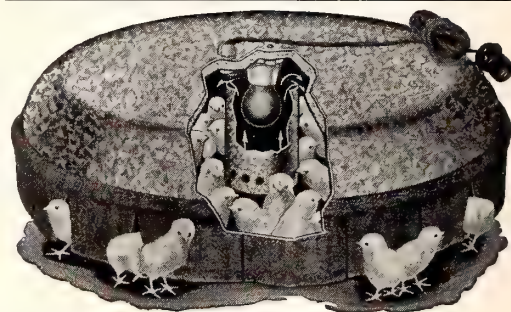

AN UNEXCELLED VALUE.

The large oversized barrels give increased radiating surface, and improved appearance. Lower damper, offset in cage, prevents possibility of ashes dropping on floor. New hexagonal canopy, of greater strength, with ring of heavy drawn steel, can be turned to any position. Big hinged door is provided in one section. The large Coal Door on top permits coaling direct from the scuttle. Shaker and Thermostat adjustment are easily accessible, through the revolving canopy.

The exclusive and unusual damper action makes the Standard remarkably dependable in operation. When the stove is forced, the lower damper is wide open to admit air under grates, while the upper check damper is closed. The check damper consists of two dampers cast together, operating as a unit. When the Automatic Control brings the check damper into operation, it works in two ways. The inner check damper rises into the flue opening and obstructs the draft, while the outer check damper opens to admit a checking flow of air above the fire and directly into the flue. This unusual design produces a positive checking action.

F.O.B. Dallas

56-in. Standard.....	600	56 lbs.	103 lbs. \$17.50
65-in. Standard.....	800	60 lbs.	112 lbs. 19.25

Junior Electric.

Magnolia Standard Oil-O-Stat Brooder

There is no brooder superior to this Standard Oil-O-Stat for ease of operation and control of heat. The stove is made of heavy metal (20 and 22 gauge). Combination drip pan and heat deflector, supported by lugs on legs absolutely prevent overheated floors and avoid any danger from drip. This deflector is notched so that by turning it slightly it will fall to the floor and permit underside of burner to be readily cleaned. Sixty inches of flexible copper tubing is furnished for use between valve and fuel tank, permitting installation of brooder with tank either inside or outside of building. A filter, placed in tank outlet, excludes all dirt from pipe line.

TWIN BLAST BURNER

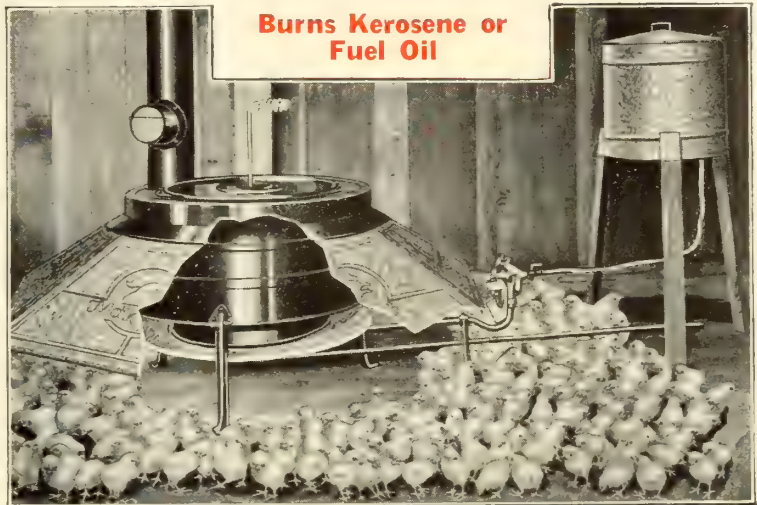

The twin Blast Burner has greater heating capacity than is ever required, even on coldest nights, yet it can burn so low that it holds less than a pilot flame. Its extraordinary capacity is due to its construction, forcing twin columns of super heated air both inside and outside of flame ring. Lighted without priming, it produces an intense blue white and pale yellow flame. Large pipe at the burner inlet removes danger of clogging up.

EASY CLEAN BURNER

A turn of the "Easy Clean" handle eliminates carbon. No doors to open or clean out.

AUTOMATIC CONTROL THERMOSTATIC VALVE

The Automatic Control Thermostatic Valve used on Oil-O-Stat we believe to be the most reliable and highly perfected in use on any brooder. It is constructed entirely of brass screw machine parts and die castings, and incorporates a sediment trap and glass enclosed positive sight drip feed. The brass working parts are ground to close limits ($\frac{1}{2}$ -1000 inch) and assembled as a complete unit before installation in the valve body. They can be easily removed as a unit for cleaning, if necessary. Adjustment of the valve is as simple as turning a screw. It cannot stick or bind, allow too heavy a flow of oil, or cut the oil below a minimum for safe operation.

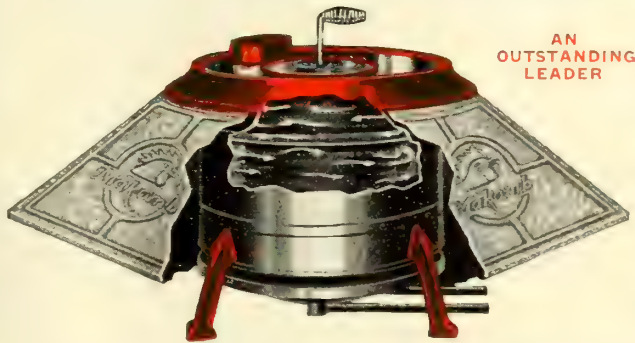

LONG FLAME TRAVEL

Exclusive baffle plates make flames travel three times around drum. This greatly increases heating efficiency, lowers fuel cost, and insures even temperature all around the heater.

The Oil-O-Stat comes complete with galvanized pipe cut and fitted, 9-gallon tank with screen, and automatic valve. No smoke pipe furnished.

F. O. B. Dallas.

Anniversary Oil-O-Stat

The Anniversary Oil-O-Stat is one of the largest selling on the market. Like all Oil-O-Stats this model burns fuel oil or distillate as well as kerosene, making a real saving in fuel expense. The Anniversary is second only to the Standard Oil-O-Stat.

The Anniversary offers drum type convenience and safety at a price very little higher than ordinary blue flame oil brooders, and its performance has more than satisfied thousands of users.

It has the same type of combination drip pan and heat deflector as the Standard, as well as the large type burner inlet. Uses the Easy Clean Burner and automatic valve, and has four feet of flexible tubing, burner, tank and valve as well as adequate over-flow pipe. Automatic draft adjuster is likewise standard equipment. Heater is 18 inches in diameter, built of 20 and 22 gauge heavy blue steel. Comes complete with nine gallon tank with filter. Only smoke pipe needed to install.

	Chick Capacity	Shpg. Wt.	F.O.B. Dallas

55-inch Canopy	1000	70	16.95

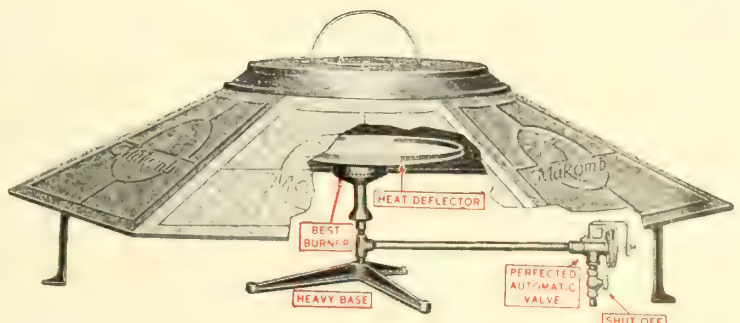

Magnolia Gas Brooder

Where gas is available at reasonable cost this brooder is among the most satisfactory of all brooders. It does the job with remarkably little attention.

The cast iron burner has an adjustable air shutter. Each brooder is equipped with two machined brass burner orifices, one for natural and the other for artificial gas. You can, therefore, burn either gas satisfactorily.

The automatic valve is one of the finest ever offered the poultry industry. The body is an alloy die casting, the valve stem carefully machined brass and the action extremely smooth. This cannot leak, has pilot adjustment with screw cap and is ideal for use on gas burning brooders.

The improved canopy is a rigid Hexagon with heavy steel ring, adjustable ventilator and sturdy legs. A cast iron tripod base firmly supports the burner and the heat deflector bolted to it. This brooder gives you a perfect gas installation.

LOVE BIRD SEED—An ideal mixture of a variety of essential foods necessary to promote good health. Relished by Parakeets, Large Finches, Nonpareils, Java Sparrows, Red Birds and Cardinals. **Postpaid, 25c.**

PARROT FOOD—An ideal mixture containing necessary Seeds, Grains, Nuts and Polly Crackers, all of which will be relished by your parrot. **Postpaid, 30c.**

BIRD GRAVEL—A supply of this gravel should be in the bottom of the cage all the time. Justrite Silver Gravel contains calcium carbonate and bird charcoal, and will not cake on the bird's feet. **Spout Can: Postpaid, 25c.**

OYSTER SHELLS—Especially desirable for breeding cages. Insure hens laying hard shelled eggs. Keep breeding cage or room sprinkled with Bird Gravel over which has been sprinkled Justrite Oyster Shells. **Shaker Top Can: Postpaid, 20c.**

Canaries—Song Birds of the Nation

No bird has more charm than the canary. Its bright cheery song endears it to its owner beyond any other pet known. Our birds are bred for us by some of the very best bird breeders in this country and in Germany.

OUR GUARANTY—We guarantee live delivery of every bird ordered from us. We further guarantee our birds to be exactly what they are represented to be.

St. Andreasberg Rollers

These birds are imported from the best breeders in the St. Andreasberg region of Germany. They are trained for their purity in tone, their range of notes and their volume of song. The birds are graded before being shipped to us and gradings are confirmed by us before delivery is made to you. Birds are not graded by color. Color preference should be stated in ordering, however. They can be had in pure yellow, spotted, or dark birds but it will be necessary for us to reserve the right

to change color preferences if correct tonal grading is not available in color specified. Prices F. O. B. Dallas:

President
Canna.

Border Lilies

WHITE—6 to 8 inches high. Bloom all during summer until frost. Multiply rapidly. Flower star-shaped. Not fragrant. Each 10c; 2 for 15c; 75c per dozen; postpaid.

ROSE PINK—Sometimes called Fairy Lilies. Very effective for massing or borders. About 8 inches high. Flowers in great profusion during entire spring and summer. Also suitable for pot culture. Each 25c; \$2.75 per dozen; postpaid.

HYBRANTHUS—Clusters of red flowers, 10 to 12 inches high. Foliage green all winter. Blooms in September. Does well in dense shade or full sun. Each 20c; \$2.00 per dozen; postpaid.

Crinum Lilies

Good for brightening up dark corners. Very hardy and do not require any special cultivation. Will grow in partial shade or full sun. The following collection bloom at different periods during spring and summer, making them very valuable especially to florists.

PURE WHITE—Blooms May, June and July. 8 to 9 beautiful blooms on a stalk at one time. Foliage about 2 feet tall.

DELICATE SOLID PINK—Blooms July until frost. Very hardy. Will grow in partial shade or full sun. Very beautiful.

LAVENDER STRIPE ON WHITE GROUND—Blooms July until frost. 8 to 9 blooms to stalk. Very striking.

DEAP-SEA LILY—Long trumpets, light pink stripe. Very fine.

Prices: Each 50c; \$5.00 per doz.; postpaid.

Hemerocallis

(Double Orange Day Lily)

A lily which produces exceptionally fine flowers for cut flower work. It will grow in part shade or in full sunlight and when planted in rich soil, freely watered, will bloom all summer. The flower is similar to the Crinum Lily except that it is double. It is a deep orange in color and especially handsome and pleasing. Postpaid: Each 25c; per dozen \$2.50.

Iris (Flags)

Irises are well adapted to our hot climate and increase in almost astounding numbers. Because they do increase so much, and because their flower does not last long they do not enjoy the popularity that they should. We can furnish in white, blue, purple or bronze. Roots, each 25c; 3 for 50c; \$1.50 per dozen; postpaid.

Cannas

The Canna is among the best adapted to all climates. It produces flowers from spring until frost kills the top of the plant, and where sufficient moisture is given them they multiply rapidly. Their reasonable price justifies everyone in having a large quantity about. These are the leading varieties:

CITY OF PORTLAND—3½ feet. Grows increasingly popular, largely because it does not fade in hot weather. It produces a deep pink bloom with flowers borne well above the foliage.

THE PRESIDENT—4 feet. A rich glowing scarlet with immense flowers sometimes seven inches across when full open. Flowers are produced on strong erect stalks well above the heavy foliage.

KING HUMBERT—3½ feet. Foliage bronze and the finest bronze leaved Canna. Its large orange scarlet flowers are streaked with crimson and gold. It is an orchid-flowering Canna that does remarkably well in this section of the country.

YELLOW KING HUMBERT—4 feet. Foliage a very dark green, flowers a deep rich yellow spotted and blotched with bright red. Another orchid-flowering canna with giant flowers which if given a lot of water will grow as high as six feet, very showy.

YELLOW PLUME—3½ feet. Pure beautiful delicate yellow flowers on long stems. Produces splendid cut flowers.

Postpaid: 15c each; \$1.25 per dozen.

Dahlias

The Dahlia is an old favorite which improves with continued cultivation. Often they will produce flowers six, eight and even ten inches in size. They are ideal for back grounds, or any place where striking colors and large flowers are desired. Dig the roots in the fall of the year and keep in dry and warm place during the winter, replanting in the spring.

JERSEY BEAUTY—This is probably the best known and most loved dahlia. It is in a class by itself, produces a perfect soft pink bloom carried high above the foliage on a long wiry stem.

JANE COWL—A large decorative flower of a warm buff and gold blending to a bright salmon at the center. The giant flowers are held on rigid stems producing a superb effect. Be sure to have some of these.

DAKOTA—A decorative giant, flame red, well adapted to hot weather. This is an especially pleasing decorative dahlia which should be in every garden where a giant red is desired.

Postpaid prices: 25c each; 6 for \$1.00; \$2.00 per dozen.

You may specify mixture at the quantity price.

QUEEN MARY—A decorative rose pink which is becoming better known annually. We recommend that you try this one this year believing you will want it in your garden regularly.

YELLOW DUKE—The popularity of this lovely show dahlia has never waned. It is a glowing yellow which has been demanded year after year by dahlia lovers everywhere.

D. M. MOORE—Another very popular show dahlia. Its deep velvety maroon flowers are almost black. One of the loveliest of the dahlias, if you like a dark color.

DARLENE—An exquisite shade of live shell-pink with a dainty blending of white at center. It is an early and continuous bloomer, excellent for florists' use. Flowers very uniform and perfect; are produced on long stiff stems well above the foliage. I can recommend this decorative dahlia highly for cut flowers and garden purposes.

FRANK A. WALKER

—A fine decorative cut-flower dahlia, which is a continuous and abundant bloomer. Very good for cut-flower purposes. Good florists' variety. In color a beautiful shade of lavender-pink, deeper pink at the center.

Postpaid prices: 20c each; 3 for 50c; \$1.85 per doz.

You may specify mixture at quantity price.

BASHFUL GIANT—One of the largest flowering decorative dahlias in existence. Its gigantic blooms are excellent for exhibition, not only because of size, but also for its beautiful coloring. An exquisite apricot with buff and gold tints. One of the best. A very free and continuous bloomer.

MRS. I. DE VER WARNER—A decorative blossom of soft orchid coloring and unquestionably a dahlia of great merit. Its charming color, very large flowers, and long, strong stems made it the cynosure for all eyes at recent exhibitions. A lovely deep, mauve-pink, of perfect form, a true decorative type which is impressive in its very large size. Extremely strong growing, very abundant blooming, and lending itself to either exhibition or garden uses with equal success.

JEAN KERR—A lovely show dahlia, and probably the most popular white dahlia grown. It is very similar in type to the Darlene, flowers being uniform and perfect and produced on long stems well above the foliage.

PRIDE OF CALIFORNIA—Mammoth rich "American Beauty" red; very tall vigorous grower, flowering continuously from early summer until late fall. Its perfectly formed flowers are produced on strong stems, well above the foliage. Decorative type. Exceptionally large.

Pride of
California
Dahlia.

GLADIOLUS

Last year our California grown Gladiolus proved so pleasing to our customers that we are again offering these exceptionally fine Glads, and at remarkably low prices, considering the varieties offered. These are all the better, hardy florist's varieties.

Gladiolus are not difficult to raise. Plant them in February or March in rich loose soil and you will secure abundant blooms.

ORANGE QUEEN—A beautiful deep bright orange. One of the loveliest tints of all gladioli. Every florist should plant some of these. It grows splendid strong bulbs and is one of the finest of the exhibition gladioli. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

BETTY NUTHALL—Warm coral pink with pale yellow throat, orange tinted. Tall straight spike with from 7 to 10 large flowers open in perfect placement. Does well everywhere. This is a fine bulb grower and propagator. It blooms rather late. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

BERTY SNOW—One of the handsomest of the lavenders. This is a flower that everyone should have in their Glad bed. It produces beautiful spikes of a gorgeous orchid coloring. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

DR. F. E. BENNETT—This is one of the finest of Glads. A type of which the florists cannot get enough. It is a fiery scarlet, extremely brilliant, many of the flowers open at one time, and buds are in color. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

MRS. LEON DOUGLAS—A giant begonia rose makes one of the largest and heaviest spikes. Unquestionably a winner in exhibition or florist work. Will open as many as 9 flowers at a time. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

HELEN WILLS—A tall, large flowered, creamy white with a deeper cream throat. This is a very attractive Glad, especially good for home markets. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

MRS. FRANK PENDLETON—This Glad has been a favorite for many years. It is a good heavy blotched pink. A very strong bulb and one for which too much cannot be said. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

SOUVENIR—A deep clear yellow that flowers splendidly and is sure to bloom. Very prolific and good for shipping, and it blooms quite early. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

LOS ANGELES—Bright fine colored Shrimp Pink, an exceptionally appealing shade. Always tall and strong. Cut it when first flower opens or it fades up the spike. This is a very lovely flower. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

MRS. VAN KONYNENBURG—A tall, clear, light violet blue. A good grower, tall and strong with 6 to 7 flowers open at a time. This is probably the best of the blues. Prices: 1/2 doz. 40c; doz. 75c; 100 \$3.50; postpaid.

The above Bulbs, may be mixed to make up total quantities.

Gladiolus.

Tuberoses

A native of this section which produces a beautiful wax-like flower of heavy fragrance. Harvest your bulbs very late in the fall after they have died down and separate before replanting in the spring. These bulbs flower from June until frost. Tuberoses stand more drouth than almost any bulb of which we know, and we recommend them unqualifiedly. Postpaid prices: 2 for 15c; 50c per doz.; \$3.00 per 100.

Caladiums

The large variety known as "Elephant Ears" which describes their huge green leaves perfectly. They make splendid backgrounds for other shrubby or flowers and are beautiful in sunken gardens requiring beds of high standing foliage. Postpaid prices: Small bulbs 20c; medium bulbs 25c; large bulbs 50c.

BULBS ARE PERMANENT INVESTMENTS

Our bulbs are selected not alone for beauty of their flower and the attractiveness of their color, but also for their vitality and permanence. While many bulbs will not last and reproduce indefinitely in our hot climate, with normal care the bulbs we offer will last from three to five years and if your soil conditions are right, often times indefinitely. Most bulbs should be taken up when tops die down and kept in temperature above freezing until next planting season.

Tuberose.

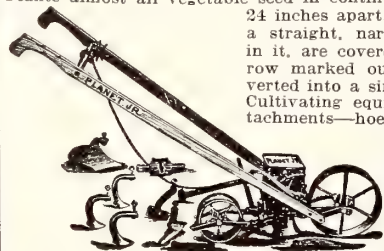

Caladiums.

PLANT AND CULTIVATE EFFICIENTLY WITH

No. 4 Combined Hill and Drill Seeder and Single Wheel Hoe

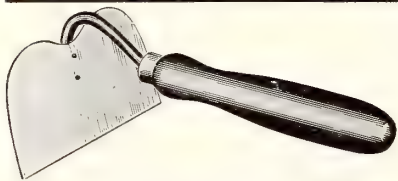

The No. 4 is a combination of the most useful tool for a home garden. Plants almost all vegetable seed in continuous rows or in hills 4, 6, 8, 12 or 24 inches apart. A plow adjustable for depth, opens a straight, narrow furrow, the seeds are dropped in it, are covered and the soil firmed, and the next row marked out all in the same operation. Converted into a single wheel hoe by changing one bolt. Cultivating equipment includes the most useful attachments—hoes for weeding and shallow cultivation—cultivator teeth for deeper and general cultivation—and the plow for furrowing and ridging.

Planet Jr. No. 4.

Shipping weight, 50 pounds. Price: \$18.00, F. O. B. Dallas.

No. 4-D—Same as No. 4, but without cultivating attachments. Shipping weight, 37 pounds. Price: \$14.25, F. O. B. Dallas.

20c

No. 1.

No. 0100.

Trowels

Everyone must have one of these convenient trowels for satisfactory work in the garden. Just the thing for transplanting. Can furnish either in the short handle or long handle.

No. 02—Wood handle, garden trowel, natural finish. Trowel 6 inches long. Postpaid.....15c

No. 0100—Extra heavy steel, polished blade, extra long handle, hand-turned, finely finished, length 14½ inches over-all. Postpaid.....30c

Owasco Grass Hooks

These hand scythes have dozens of uses. The Owasco is tempered, ground and whetted to a sharp keen edge, just what you need for cutting weeds, tall grass, etc. Postpaid.....50c

Hedge Shears

A popular priced general purpose shear that will cut the average household hedge easily, and do a perfect job. Designed for light trimming of small hedges and very efficient considering their low cost. The shear is properly balanced, cuts clean and easily, handles are hard wood, shaped to fit the hand, and fitted with heavy ferrules. This tool is light weight, but plenty strong for light work.

No. 46—6-inch blade. Postpaid.85c

No. 24N-8 — 8-inch blade. Postpaid \$1.25

No. 46.

Grass Shears

A very efficient proven type of grass shear much superior to the old sheep shear type. Nothing to wear out; easily sharpened and clean easy cutters. Malleable iron handles, hollow ground cutlery steel blades, beautifully finished. The easy adjustment stays just right, and the shear will give years of good service. Blades 6 inches long.

No. 017—Ring Clasp; green enameled finish. Postpaid.75c

No. 017.

Tip Top Tree Trimmer

SAVES DANGEROUS CLIMBING

No. 1312 Tip Top.

A strong but light aeroplane spruce pole, stained green, fit with simple, positive rugged joints that can be set up or taken down easily and quickly. Has hardened and tempered cutlery steel blades—nothing to get out of order. A pull on the rope cuts a branch and a spring opens the pruner for the next cut. Can be used as a 4, 8 or 12 ft. pruner, and additional 4 ft. sections can be added to

make it even longer. This is the only practical joint pruner selling at so low a price. Cuts one-inch limbs easily. Removes worm nests, trims climbers, prunes young fruit trees, high shrubs, berry briars and bushes, also picks high growing flowers.

No. 1312—Tip Top Tree Trimmer; packed in individual boxes 48x5x1¼ inches. Shipping weight 6 lbs. Postpaid.....\$2.45

No. 13-S—4 Ft. Section Pole for above. Shipping weight 2 lbs. Postpaid.....75c

Ezy-Cut Lopping Shears

A powerful and extremely strong pruner for heaviest cutting. Heavy tool steel forgings, heat treated and accurately ground, joined with bolt and nut and fitted with heavy slick ash handles with long strapped ferrules.

No. 26.

No. 26—30-inch handles. Postpaid.....\$3.85

Pruning Shears

Everyone must have a good pruning shear, even though you only have one or two shrubs. One of the two offerings below will fit your needs.

No. 06.

CALIFORNIA PATTERN—A low priced shear for light pruning, which will give very good results. Large cast iron handles with hardened polished blade, well made and a good value.

No. 06—Green enamel finish. Postpaid.....50c

SNAP CUT PRUNER—

It out cuts all other pruners on the market. The thin keen blades cut on to the soft metal anvil with a powerful drawing or sliding action that cuts a ¾-inch branch with surprising ease. Makes a perfectly clean cut on large or small branches. The small size light weight handles fit the hand of either man or woman and make pruning easy. Handles cannot pinch the hands, they are rust-proof chrome finish. All-steel construction—cannot break or bend. Blade is easily honed and will stay sharp. The soft anvil does not dull it.

No. 119.

No. 119—7¾ inches long. Postpaid.....\$1.75

Decorative Garden Birds

Beautiful garden ornaments to be used on lawns, trees, vines, plants and fences. Serve admirably as plant supports.

Birds are made in natural size and colored on both sides with weatherproof enamel in natural life-like colors. Swivel mounted on strong 22-inch green enamel stakes. Their natural swinging movement and life-like appearance attract song birds to your garden and lawn. Very decorative. Postpaid prices to you: Each 25c; 2 for 40c; 3 for 55c; 6 for \$1.00.

"THEY SWING WITH THE BREEZE"

Prepare Your Flower Beds Before Planting

There are no profound secrets about growing beautiful flowers: yet it is necessary to study them, just as you would anything else you attempt to raise. The few hints given below will be of assistance to you:

SOIL—Practically all plants like rich, sandy loam, but other types of soil will also produce very satisfactory flowers. Bear in mind, however, that heavy soils need applications of fibrous materials and must be thoroughly broken and cultivated. Sandy soils usually need fertilizers.

PREPARATION—This is one of the most important factors in gardening. Work the soil deeply and make the top, for three or four inches, as fine and loose as possible. If the soil needs fertilizers, and most soils do, consult your local SQUARE BRAND Seed Dealer, or write us and we shall be glad to recommend that best suited to your needs, if you will tell us the kind of soil you have.

PLANTING—Many gardeners err in their method of planting, resulting in weak plants which soon die, or fail to produce the results desired. In addition to the preparation of the soil, it is necessary that care be used to see that the seeds are placed the proper depth. Many small seeds can have only the smallest amount of soil above them; others of the larger varieties may be planted one or more inches below the soil. Be sure, also, to plant when heat and moisture

conditions are correct. A study of the seed is necessary to determine that—and again your seedsman or we shall be happy to be of assistance to you. Moisture should be within your control—especially for flowers. To retain moisture after planting, cover the seed immediately with fine, freshly prepared earth and press it down firmly and smoothly.

CULTIVATION—It is desirable to stir the surface soil during the period of growth, since it encourages root development, allows air to enter and by forming a mulch, preserves moisture—in addition to killing weeds. Cultivation may be deep at first, but as the plants grow, it should be shallower, since otherwise it might injure the root system.

Our flower seeds are put up in our own lithographed packets, with full cultural directions on the back of each packet. They are usually classed under one of the following three types:

Annuals—Plants that live and bloom only one season.

Biennials—Plants which bloom the second year, and then die.

Perennials—Plants which bloom the second year and live and bloom several years.

Biennials and Perennials are usually planted in the late summer and fall, blooming the next summer.

Desirable Foliage Plants

Amaranthus

CAUDATUS (Love Lies Bleeding)—Rapid growing annual with long drooping crimson flower spikes. Height about 3 feet Pkt. 10c; 3 pkts. 25c; oz. 35c; postpaid.

TRICOLOR (Joseph's Coat)—These plants afford brilliant contrasts of color, being useful for tall borders, groups and foliage effects. The leaves of this variety are red, yellow, and green, and plants are exceptionally attractive. Pkt. 10c; 3 pkts. 25c; oz. 65c; postpaid.

Cockscomb (Celosia)

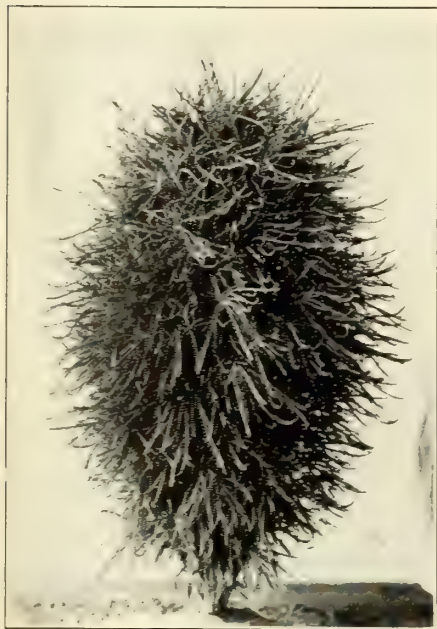

This plant comes in green or colored foliage and their flowers form a very brilliant mass. Is ideal decoration in beds and borders retaining their brilliant coloring from mid-summer until frost. Hardy annual which reseeds itself

DWARF VARIETIES—President Thiers or Glasgow Prize, green foliage.

EMPRESS—Dark foliage, dark red flowers

FINEST MIXED—A mixture of the best growing sorts.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.25.

Mexican Fire Bush.

Coleus.

Coleus

There are no finer decorative foliage plants for the South than our Hybrid Coleus. For beds, edging and boxes. Coleus makes magnificent ornamental foliage plants. A tender perennial.

MIXED HYBRIDUS—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$3.00.

Mexican Fire Bush (Kochia Childsii)

This is also known as Summer Cypress.

An easily grown foliage or hedge plant which remains green until frost and then turns a beautiful bronze red. A hardy annual which reseeds itself. Postpaid: Pkt. 10c; oz. 25c.

Cockscomb.

Amaranthus—Joseph's Coat.

Rapid Growing Climbers

Cardinal Climber

A dainty annual climber which does remarkably well when planted in warm, sunny locations. Frequently reaches a height of 20 feet. Flowers are very similar to those of Cypress but larger and quite brilliant. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.00.**

Cypress Vine

A beautiful rapid growing climber with delicate dark green feathery foliage and many small bright star shaped blooms. Susceptible to training and when planted by the side of a veranda or arbor is especially handsome. A hardy annual. Comes in Scarlet Red, White or Mixed. **Postpaid prices: Pkt. 10c; 3 pkts. 25c; oz. 50c.**

Morning Glory

A beautiful showy climber—a hardy annual. Flowers are most brilliant in the morning. Suitable for arbors, trellises and covering any unsightly object.

ROSE MARIE (Double Deep Rose)

—Early and free flowering. **Postpaid prices: Pkt. 10c; 3 pkts. 25c; oz. 75c.**

HEAVENLY BLUE—A lovely deep blue shading lighter toward the center. **Postpaid prices: Pkt. 10c; 3 pkts. 25c; oz. \$1.00.**

JAPANESE GIANT MIXED—**Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 35c.**

Hyacinth or Jack Bean (Dolichos)

This is an exceptional vine and rapid climber with clusters of purple and white flowers similar to a sweet pea and followed by ornamental seed pods. This is a hardy annual which grows from 10 to 15 feet high. **PURPLE or MIXED. Postpaid prices: Pkt. 10c; oz. 25c.**

Kudzu

(Jack and the Bean Stalk)

The most rapid growing vine in cultivation. A hardy perennial climber which grows from 40 to 60 feet in a single season after becoming established. Extremely valuable for covering verandas, pergolas and unsightly fences. Will thrive on any land that will support vegetable growth. Advisable to soak seed before planting. **Postpaid prices: Pkt. 10c; 3 pkts. 25c; oz. 50c.**

Cypress Vine.

Sweet Peas

We can furnish both the early and late Spencers in the annual sweet peas, but are listing only the late Spencer since it is the more popular. Flowers are exceptionally large. Standard and wings are frilled, and the general effect is remarkably graceful. We offer the following varieties:

ASTA OHN—Pinkish lavender.

BARBARA—Soft Salmon.

CHARITY—Rich Crimson.

COMMANDER GODSALL—Large violet blue.

COUNTESS SPENCER—Rose pink.

DEFIANCE—Glowing orange scarlet.

GLENEAGLES—Large pale blue lavender.

GLORIOUS—Brilliant rose cerise.

ROYAL PURPLE—A rich purple.

WARRIOR GIANT—Maroon.

MIXED—Mixture of above.

Postpaid prices: Pkt. 10c; oz. 25c; lb. \$2.00.

GLANDIFLORA MIXED—**Postpaid prices: Pkt. 10c; oz. 20c; lb. \$1.25.**

Perennial Sweet Peas (Lathyrus Latifolius)

A sturdy vine with luxuriant pea-like foliage and pea-shaped flowers borne in large clusters of 8 or 10 each. Waxy in appearance, they bloom for a long time. Can furnish in pink, red or mixed. **Postpaid prices: Pkt. 10c; 3 pkts. 25c; oz. 50c.**

Gourds

These trailing annual vines are used extensively for covering old fences and other unsightly objects because of their exceptionally rapid growth. Their fruits are much prized by children as toys.

JAPANESE NEST EGG—Fruits similar in shape to a hen egg.

DIPPER—Everybody knows the old-fashioned gourd dipper and it always remains interesting and attractive.

HERCULES CLUB—Fruits extremely long and large, tapering to the stem end. Vines are very thrifty and rapid climbers. Also known as Dish Rag Gourd.

MIXED—Mixtures of all the above varieties gives you an assortment of shapes and sizes.

Postpaid prices: Pkt. 10c; 3 pkts. 25c; oz. 40c.

Moon Flower

A very vigorous summer annual. Under favorable conditions will grow from 20 to 30 feet in a single season. Flowers often four inches across, and the leaves make excellent shade.

NOCTIFLORA WHITE—**Pkt. 10c; 3 pkts. 25c; oz. 50c; postpaid.**

HEAVENLY BLUE—**Pkt. 10c; 3 pkts. 25c; oz. \$1.00; postpaid.**

Scarlet Runner

Another rapid growing annual climber, bearing sprays of brilliant scarlet pea shaped blooms. Vines 10 to 12 feet high. May be used as a snap or shell bean for food as well as being desirable for ornamental purposes. **Postpaid prices: Pkt. 10c; oz. 15c.**

Sweet Peas.

Tall Growing Plants and Flowers For Backgrounds

Castor Beans (*Ricinus*)

Giant, strong growing plants, with ornamental foliage, well adapted for border backgrounds, temporary screen planting or as center plants in groups of Cannas, Dahlias, etc. Moles are kept away by planting Castor Beans in the borders. It attracts Japanese beetles, causing their death after they have eaten of the leaves. Grows from 10 to 12 feet tall. Pkt. 10c; oz. 25c; postpaid.

Cosmos

Very effective for autumn flowering in broad masses or backgrounds. A hardy and rapid growing annual, forming bush-like plants with feathery green foliage four to six feet high, covered with large flowers, somewhat resembling single dahlias. Crimson, Pink, or White, or Early Flowering Mammoth Mixed. Pkt. 10c; 3 pkts. 25c; oz. \$1.00; postpaid.

KLONDYKE—A gorgeous orange-yellow flower with very handsome foliage, more coarsely lacinated than others. Pkt. 10c; 3 pkts. 25c; oz. \$1.25; postpaid.

Dahlias

See Illustration, Page 44.

A favorite for summer and autumn flowering, blooming the first season from seeds if started early indoors and transplanted after danger of frost is over. Grows three to four feet high. By pinching off some of the buds, larger flowers can be produced. Plants will produce tubers which should be taken up in the fall and replanted the following spring.

Single Mixed—Pkt. 10c; 3 pkts. 25c; postpaid.

Double Mixed—Pkt. 10c; 3 pkts. 25c; postpaid.

Golden Glow (*Rudbeckia Laciniata*)

Hardy, free flowering and easily grown perennial, similar in appearance to cosmos. Grows 5 to 7 feet and blooms from July to October. Beautiful yellow flowers which produce good flowers for cutting, borne on long, graceful stems. Pkt. 10c; 3 pkts. 25c; postpaid.

Lantana

A tender perennial which makes a splendid display the first season from seed. Above the large green leaves rise in prolonged succession, verbenalike clusters of fragrant flowers in shades of crimson, rose, orange, and yellow, followed by green berries that turn later to a deep blue. Valuable for bedding, and also adapted to pot culture. A most interesting plant.

Finest Mixed—Pkt. 10c; 3 pkts. 25c; oz. \$1.00; postpaid.

Lantana.

Hollyhock

Too much cannot be said for these hardy perennials. Once established, they grow and bloom freely for years. Beautiful long spikes, filled with handsome flowers 4 to 6 inches across, crushed closely together. From 5 to 7 feet in height.

CHATER'S DOUBLE—Producing extremely double flowers that resemble small peonies with dense, closely-packed petals. Comes in Crimson, Deep Rose, Clear Yellow, and a splendid mixture of named varieties. Pkt. 10c; 3 pkts. 25c; oz. \$1.25; postpaid.

Hibiscus (Rose Mallow)

Large, shrub-like plants with handsome green foliage, bearing throughout the summer large bright flowers from 3 to 5 inches in diameter. Plants grow from 3 to 5 feet and grow very rapidly. Reseed themselves.

Pkt. 10c; 3 pkts. 25c; postpaid.

Low Growing Flowers

Periwinkle (*Vinca*)

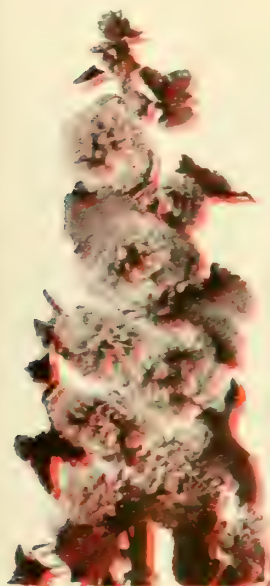

An attractive bedding plant adapted to the entire South. Produces round single flowers and exceptionally luxuriant foliage. A tender perennial treated like an annual. Can furnish in Pure White, Rose or White with Crimson Eye. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.00.

Four o'Clock (*Marvel of Peru*)

An old-fashioned annual especially adapted to the South, somewhat similar to Periwinkle in hardiness, reseeds itself, and is especially attractive for bedding and low-growing backgrounds. Shades of Red, Yellow, and White. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

Periwinkle (*Vinca*).

Hollyhock.

Hibiscus.

Medium and Low Growing Flowers for Beds, Borders, Boxes and Edging

Ageratum.

Gypsophila

(Baby's Breath)

Especially desirable for its mist like effect. Can be dried and used year round. This is a hardy annual which covers the plant with delicate star shaped flowers. All florists use quantities of it.

GRANDIFLORA ALBA—An improved large flowered white strain.

ROSEA—A beautiful shade of rose. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

Heliotrope

Universal favorite on account of the delightful fragrance of bloom. Seeds sown in the spring make fine outside plants. Grows very rapidly.

MIXED—Flowers ranging from dark blue to lilac.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.50.

Pansies

A hardy annual. Makes charming beds and fine for boxes also. For best results sow seeds early in protected seed beds, cover lightly and transplant later, setting out about 5 inches apart.

GIANTS OF CALIFORNIA—Special mixture.

Postpaid: Pkt. 25c; oz. \$5.00.

Pansy.

Ageratum

(Floss Flower)

This hardy annual is especially desirable for its blue coloring. Its feathery flowers are borne in dense clusters and very useful for bouquets. Cut and keep well.

BLUE PERFECTION—Light blue.

IMPERIAL WHITE—Clear white.

FINEST MIXED—Very desirable.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 75c.

Alyssum

An annual. Can be grown very rapidly either outdoors or in the house. By cutting back the plants properly, an almost constant succession of bloom may be had.

LITTLE GEM (Carpet of Snow)—Beautiful white variety which grows about 6 inches high and produces a compact mass of flowers.

SWEET ALYSSUM—A hardy variety with clusters of small white flowers very fragrant, and quite useful in small bouquets. Grows about 8 inches high.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

Sweet Alyssum.

Keep a Weeder Handy!

There are numerous needs for a small weeder. This is an exceptionally handy one to have about. Good for cultivating. Made in one piece. Postpaid to you, with packet seeds, 15c. When shipped alone, postpaid, 20c.

Moss Rose

(Portulaca)

A hardy annual with glossy cup shaped single flowers, and rose-like double flowers. Many shades of red, white, pink, orange, yellow, striped, etc. A low growing or creeping plant with thick, fleshy waxy stems. Desirable for edging, beds, or mounds.

FINEST SINGLE MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 90c.

DOUBLE MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$2.00.

Gypsophila.

Salvia

(Scarlet Sage)

A fine bedding plant. It forms compact bushes with large conspicuous flower spikes of fiery red raised over the foliage. Blooms all through the summer. **AMERICA (Globe of Fire, 16 inches high)**. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$3.50.

SPLENDENS (Scarlet Sage, 24 inches high). Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$2.00.

"Just the Garden Glove I've been Looking for"

That's what you'll say, too, when you put on this new and different glove which has been specially designed for garden wear. Its unique qualities have made it nationally popular with both men and women.

All-Leather SOFT AS KID, Dirt Proof, Washable

Sizes for women: Small, Medium, Large; for men: Medium and Large. Price: 75c a pair (2 pairs, \$1.40); postpaid.

Gauntlet gloves for women: (Flowered) Rose, Blue, or Yellow. Postpaid, 85c per pair.

Moss Rose (Portulaca).

Acroclinium.

Old Fashioned Popular Flowers

Acroclinium Everlasting

A hardy annual about 15 inches tall, very useful for fresh cut blooms and when dried for winter bouquets. The double daisy like flowers about one inch across, borne singly on long stems, are at first inclined and later stand erect. For use as everlasting cut when only partly expanded.

DOUBLE MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

Batchelor Buttons Gomphrena or Globe Amaranth

This is the old fashioned Batchelor Button. It is a showy annual everlasting with flower like heads. Frequently confused with Gomphrena flower. Be sure to order under the name of Gomphrena or Old Fashioned Batchelor Button. Comes in mixture of rose and white. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

Gaillardia.

Touch-Me-Not or Lady Slipper Balsam

This is an old-time favorite in southern homes. The blooms are somewhat similar to the individual flower of the snapdragon, slightly bell shaped in appearance, and are clustered along the stems of the bush and in the axils of the leaves. Plants are sturdy and bushy and like hot sun, rich soil and plenty of water. Grow from 1½ to 2 feet tall. Their colors frequently mix in the flower. Very interesting and easy to grow.

FINEST MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 65c.

Columbine Aquilegia

These are delightful old fashioned perennials used extensively for borders. They grow about 2 feet high and are quite hardy. Bloom profusely, early in the season and remain in bloom for a considerable period. We offer the long spurred variety in mixed colors, either single or double. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 75c.

Forget-Me-Not Myosotis

No spring flowers are more lovely than these half-hardy perennials that bloom the first year from seed. They are very attractive in masses, beds or borders. They are among the finest of the blue shades so popular in perennial borders. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 85c.

Columbine.

Centaurea Cyanus (Cornflower).

Blanket Flower

Gaillardia

The single variety grows wild in the South and is generally known as "Indian Blanket". We are offering only the double variety which is a hardy annual that re-seeds itself. It produces large brilliant flowers, borne singly on long stems. A lovely flower for cut flowers and used extensively for mass blooms in borders, beds, etc. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 75c.

Black Eyed Susan

Thunbergia

This is another flower which grows wild in the South. The wild flowers are usually yellow with black protruding centers. The cultivated Thunbergia, however, is a trailing plant with large showy flowers forming a dense mass of foliage and flowers of all colors. A very effective trailing plant. Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 75c.

MRS. H. M. WILKINS, Route 1, Glade-water, Texas, wrote us on July 6, 1933: "I am highly pleased with Magnolia seed for canaries. I use nothing else and my birds keep healthy."

Calliopsis Coreopsis

The annual Calliopsis flowers similar in form to the Coreopsis, but flowers are marked with bands or centers of contrasting tones. Colors include variations of yellow, orange, brown, maroon and almost crimson. The perennial Coreopsis comes only in shades of yellow with occasional bands of brownish red. This plant is a splendid mass bed plant.

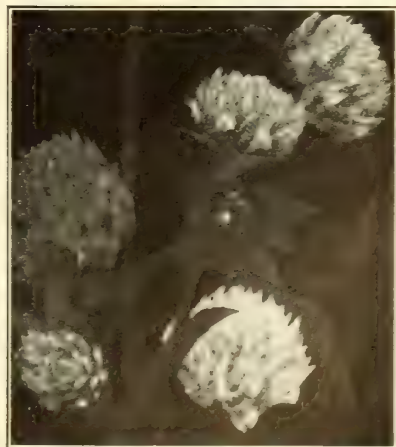

CALLIOPSIS MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

COREOPSIS MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.00.

Cornflower Centaurea Cyanus

These well known flowers are very attractive and graceful. They are sometimes called Batchelor Button, but they are not the true old fashioned Batchelor Button which has a clover-like head and is known as Gomphrena or Globe Amaranth. Cornflowers are also known as "Ragged Sailor" or "Blue Bottle." They produce a large amount of very attractive flowers and while they are annuals they reseed themselves.

BLUE, LAVENDER, ROSE, WHITE or MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 35c.

Batchelor Button.

Pinks.

Pinks (Dianthus)

These are annuals, although they reseed themselves and are exceptionally hardy. Their variety of brilliant colors and the profusion of their bloom, have made the garden Pinks one of our most popular flowers. The plants grow about one foot high and are particularly fine when planted in masses in beds and borders. Sow the seed outdoors in the early spring and in a few weeks the plants will be up in full bloom. We recommend these to every owner of an old-fashioned garden, since no such garden is complete without them. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 35c.**

Painted Tongue (Salpiglossis)

A very easy growing annual, much prized by gardeners. Give it plenty of room. It's blooms are similar in shape to a petunia but are heavily veined, usually in golden colors, although the flower itself comes in practically every shade. This is a flower worth trying. We offer the GLOXINIAFLORA MIXED, a special selection made by a French Hybridizer. Flowers large and fancifully veined in contrasting colors. **Postpaid: Pkt. 10c; 3 pkts. 25c.**

American Legion Poppy.

Carnations, Pinks, Poppies and Painted Tongue

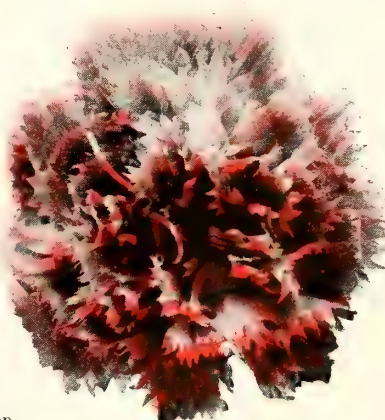

For cut flowers, mass borders, beds and backgrounds.

Carnations

These flowers can be grown in the South, providing proper location and care are given them, and they more than repay the gardener for this care. The variety we offer is the Marguerite Carnation which is the most popular as it begins flowering in a few weeks from time it is sown and bears an abundance of large double beautifully fringed, highly scented flowers on long strong stems. With a protection of litter or straw they stand the winter and flower freely the following spring. Their delicious fragrance and richness of color make them a general favorite. Try some this year. If you grow them one time you will not be without them again. **Mixed Colors—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.00.**

Poppies

There are a number of different types of Poppies, some of which are not well adapted to the climatic conditions of the South. Our listings, however, are selected for their hardiness and adaptability to soil and climatic conditions in the South and Southwest. We recommend planting Poppy seed in the fall of the year. They will bloom very early in the spring and last well into the summer. Poppies are not desirable for cut flower purposes, but are extremely handsome on the bushes.

Carnation.

Perennial Poppies

ICELAND POPPY—This plant forms a tuft of bright green fern-like foliage from which spring throughout the entire season a profusion of slender leafless stems one foot high, each graced with charming cup-shaped flowers.

SUNBEAM HYBRID—Finest Mixed. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 75c.**

California Poppy (Eschscholtzia)

Too much cannot be said for the California Poppy. It is the state flower of California, but it grows anywhere in the South and is outstanding for its gorgeous colors and the brilliancy of its mass beds. Seed should be sown in fall of the year for best results, but may also be sown in the very early spring.

CRIMSON, PINK or MIXED—Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

GOLDEN DAWN—A golden yellow California poppy, Ramona strain, a new compact and erect plant with flowers beautifully frilled and incurved. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.00.**

Peony Flowered Poppy.

Single Annual Poppies

AMERICAN LEGION—A giant orange scarlet flower of the Shirley type, held erect on long strong stems. It is a marvelous flower for beds and for planting among shrubbery. It is of a silky texture.

SINGLE SHIRLEY MIXED—These are by far the best of all single Poppies. They range in color from the purest white to the deepest crimson blood red through all the intermediate shades of pale pink, rose, and carmen. Many are daintily edged and striped and so varied are their colors that rarely are any two flowers alike. Known also as the "Silk Poppy."

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

Double Annual Poppies

PEONY FLOWERED—These are perhaps the most popular of all the Poppies in the South. Plant in the fall of the year and they are blooming among the earliest of the spring flowers. Produce immense blooms ranging from 3 to 5 inches. These Poppies reseed themselves and multiply extensively. We can furnish them in a Brilliant Rose, Cardinal Red, Light Lilac, Pure White, and Mixed. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.**

California Poppy.

Old Fashioned Popular Flowers For Baskets, Boxes, Mass Beds and Borders

Nasturtiums

No flower enjoys more popularity than Nasturtiums. They bloom from the moment the plant is strong enough until the last day of life in the garden. Taller varieties may be used for climbing over stone work or trellises or to shade porches and verandas. The dwarfs are excellent for bedding and edging.

GOLDEN GLEAM—The new and outstanding sweet scented Nasturtium which was given the Award of Merit from the Royal Horticultural Society of England; the first prize at the Southport Show in England; gold medals at the All-American Selection of Flower Seed Novelties; Seedmen's Association, U. S. A. 1932; 1931 Atlantic City Flower Show; and 1931 Boston Flower Show. Plant forms a vigorous, large bush producing runners averaging 18 inches. Flowers commence as soon as plant nears complete development and when well grown produce a blaze of color, the long-stem flowers standing well above and almost completely covering the foliage. **Postpaid: Pkt. 15c; oz. 40c.**

DWARF MIXED—Desirable shades in low growing flowers. **Postpaid: Pkt. 5c; oz. 15c; 1/4 lb. 25c.**

TALL MIXED—Desirable colors. **Postpaid: Pkt. 5c; oz. 15c; 1/4 lb. 25c.**

Petunias

A very popular plant, easily grown and especially desirable for mass beds. They are hardy annuals, usually unaffected by heat, rain and drouth.

We especially recommend the named varieties for one color beds or window or porch boxes.

Our ruffled giants and double Petunias are selected from the finest and largest of the new creations by the greatest hybridizers.

RUFFLED GIANTS—Mixed shades, Ramona Strain. Flowers beautiful, ruffled and fringed with open, well-marked throats. **Postpaid: Pkt. 15c; 2 pkts. 25c.**

DOUBLE PETUNIA—Marvelous Mixture, Double Finest Fringed, a very fine mixture producing a large percentage of doubles. **Postpaid: Pkt. 25c; 3 pkts. 50c.**

SINGLE

GENERAL DODDS—Blood Red.

LORD COURTNEY—Golden Rose.

ROSE KING—Rich Rose.

VIOLACEA—Deep Violet.

ALBA—White.

SPECIAL MIXTURE—Includes all above varieties.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.50.

Phlox.

Fringed Petunia.

Geranium

A tender perennial usually grown from cuttings, but which does well from seeds also. Part of the charm of growing Geraniums is their changeability. Plant mixed seeds and watch the attractiveness of your flowers. Extensively grown in pots. **Postpaid: Pkt. 15c; 2 pkts. 25c.**

Ice Plant

A trailing plant especially desirable for hanging baskets, rock work, fences and edges. Leaves and stems succulent and appear to be covered with ice crystals. Tiny flowers, usually a dainty lavender in color. A hardy annual of trailing habit and one of rare charm. **Postpaid: Pkt. 10c; 3 pkts. 25c.**

Geranium.

Golden Glean Nasturtium.

Sweet William (Dianthus Barbatius)

Extensively used, sweet scented perennial for bedding and borders. Flower similar to that of Phlox but with a much wider range of colors. These vary from white through many shades of rose, lilac, red, carmine, crimson, and maroon, to nearly black. Usually two shades to each plant. **FINEST DOUBLE MIXED**—Pkt. 10c; 3 pkts. 25c; oz. \$1.00.

Verbena

A well-known annual of low-growing, trailing habit. Very desirable for massing in beds or borders. Suitable also for window boxes. Bloom from early spring until heavy frost. Are used extensively for raised mounds, and their drouth resistance and brilliant coloring make them much in demand in the South. We offer only the mammoth type.

DEFIANCE—Bright scarlet.

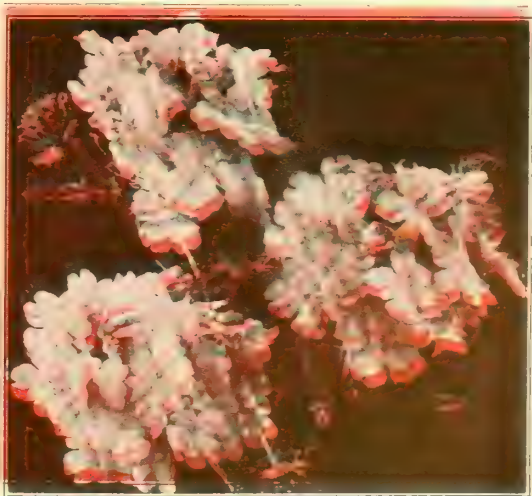

HELEN WILLMOTT—A new pink, exceptionally fine.

PURPLE MANTLE—A deep fine purple.

BLUE SHADES—A complete range of blue coloring, shading into lavender.

FINEST MIXED—A mixture from above varieties.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.50.

Verbena.

Phlox Drummondii

One of the easiest grown of all the annual flowers in the South. Produces a magnificent display of many and brilliantly colored flowers. Plants are hardy and bushy, about one foot high. Particularly attractive in large masses or clumps. Also used for boxes and cut flowers.

CHAMOIS ROSE—Rose carmen eye.

CRIMSON—Deep Red.

STAR MIXED—A very choice mixture.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.75.

Especially Pleasing Cut Flowers, Also Fine for Beds, Borders and Backgrounds

Asters

These flowers do well providing they are not sown in the same ground a second year. They are very susceptible to disease when sown the second year. We recommend fresh seed and fresh soil annually. They are among the most desirable of the cut flowers, embracing a wide range of size, color and type. For early blooming seed should be started indoors or in hot beds in December and January and transplanted when danger of frost is over. We offer the improved Giants of California in the following colors: Light Blue, Lavender, Dark Purple, Deep Rose, Scarlet, White, and a mixture of all. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.25.**

Shasta Daisy

Another splendid perennial which bears large single white flowers with yellow centers, borne on long stems and excellent for cutting. The plants produce an abundance of flowers and they are very handsome when used for borders. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. \$1.25.**

Aster.

English Daisy.

Calendula *Pot Marigold*

A fine old-fashioned annual, famous in gardens and used extensively by florists. Succeeds in most any soil and blooms from early summer until frost. Plants about one foot high.

ORANGE KING—Deep orange with dark center.

LEMON QUEEN—Solid lemon yellow.

RADIO—Deep orange with quilled petals.

MIXED—Mixture of above.

Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 50c.

BALLS GOLD—A deep golden yellow, especially fine. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 75c.**

Candytuft

GIANT WHITE HYACINTH FLOWERED—This is a distinct type used extensively by florists in cut flower work, and is very handsome for border planting. It produces large floral spikes each resembling a well formed hyacinth. Grouped upright on a stout stem. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 75c.**

UMBELLATA—A round flower quite different from the Hyacinth shaped. The flowers are in umbrellal form and they are delightful for bouquets. We offer a mixture which includes White, Red, Pink, Purple and Lilac shades. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 35c.**

Shasta Daisy.

Chrysanthemums

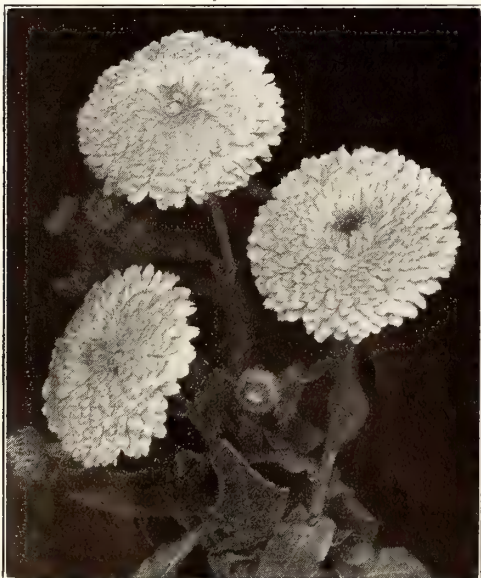

These flowers are especially desirable for fall planting. They are used extensively for backgrounds of mass bedding and produce fine flowers over a long period of time, blooming until heavy frost. They seed themselves, and also grow from roots. When grown from roots they should be divided and transplanted annually. We can furnish the double annual type in Yellow and White, or a mixture of both. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 40c.**

Painted Daisy *Single Annual Chrysanthemums*

Painted Daisies are growing in popularity because they are beautiful when used as cut flowers, and they bloom over a long period of time. Their flower is almost identical with the Shasta Daisy. They come in a wide range of shades of yellow, red, purple, and mixed colors. **Postpaid: Pkt. 10c; 3 pkts. 25c; oz. 35c.**

English Daisy *Bellis*

A hardy perennial especially suited to cool and rather moist locations, blooms in shades of red, white and pink in the early spring and late fall. Flowers very double. Plants spread rapidly in rich soil and will last for years. They make fine low borders and margins, and are beautiful in clumps around the edge of the lawn. Grow 6 to 10 inches high. **Postpaid: Pkt. 10c; 3 pkts. 25c.**

Calendula.

Chrysanthemum.

Giant Hyacinth Candytuft.

Showy Annuals for Beds, Borders, Backgrounds and Cut Flowers

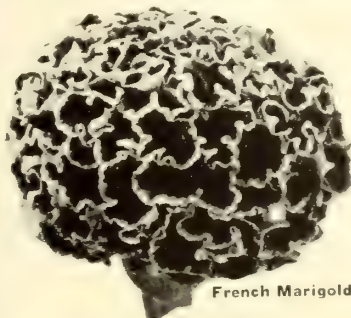

Mourning Bride.

Mourning Bride Scabrim

A lovely, fragrant flower. Flower stems are long and the blossoms keep well in water. Soft tones predominate. When given plenty of room and faded flowers are kept picked off, it will last through the whole summer. Owing to its sweetness, the bees are very fond of it and its flavors also attract all of the most beautiful types of butterflies to the neighborhood. Sometimes called the Pincushion Plant. Grows about 2½ ft. tall.

LARGE FLOWERING (Mixed)—Pkt. 10c; 3 pkts. 25c; oz. 50c; postpaid.

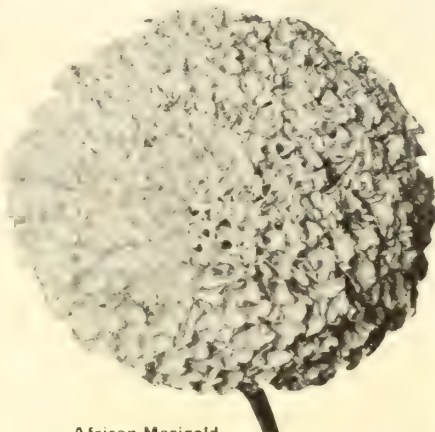

French Marigold.

MARIGOLDS

From midsummer to fall when many other plants are past their prime, marigolds afford a wealth of color that is invaluable. The tall African varieties produce large self-colored blossoms on long stems; the French flowers are smaller, but the colors and markings are interesting, some of the varieties being striped and spotted.

GUINEA GOLD (Carnation Flowered California Gold)—Illustrated on back cover. Distinctly new in type, of graceful pyramidal habit, Guinea Gold produces a neat, compact plant about 2½ feet high, literally covered with blossoms. The flowers, about 2½ inches across, are semi-double in character, and loosely ruffled.

African Marigold.

The color is a brilliant golden orange—the color so much in demand by florists. The absence of the characteristic marigold odor has been in its favor, as well as its excellent keeping qualities when used as a cut flower.

Pkt. 15c; 2 pkts for 25c; oz. \$1.50; postpaid.

TALL AFRICAN MARIGOLD (Mixed)—Pkt. 10c; 3 pkts. 25c; oz. 50c; postpaid.

DWARF AFRICAN MARIGOLD (Mixed)—Pkt. 10c; 3 pkts. 25c; oz. 50c; postpaid.

TALL FRENCH MARIGOLD (Mixed)—Pkt. 10c; 3 pkts. 25c; oz. 50c; postpaid.

DWARF FRENCH MARIGOLD (Mixed)—Pkt. 10c; 3 pkts. 25c; oz. 50c; postpaid.

ZINNIAS

No other annual enjoys the popularity of the Zinnia. It produces the most brilliant, showy and satisfactory flower, with an enormous range of colors. Cut flowers last from ten days to two weeks in water. The plants withstand lots of heat and thrive splendidly in sunny locations. No garden is complete without a display of these flowers.

Our California Giant Zinnias

Are magnificent. They bear huge flat double flowers, often measuring six inches in diameter when in full bloom. We can furnish these in Crimson Red, Rose Pink, Deep Orange, Golden Yellow, Light Pink, Lavender, Purple, White and Mixed Colors. **Pkt. 10c; 3 pkts. 25c; oz. \$1.00; postpaid.**

Be sure to give your plants plenty of food and water. They cannot produce beautiful flowers if you do not feed them. Vigoro is a perfectly balanced plant food.

Double Giant Zinnia.

Dahlia Flowered Zinnias

Plants are of medium height, 2 to 3 ft., very robust, bearing many long stems of the fully double, huge flowers, which resemble the showy type of dahlias. The following varieties are the finest we can get.

Crimson Monarch—Deep crimson.

Golden Dawn—Golden yellow.

Polar Bear—Pure white.

Oriole—Orange and gold.

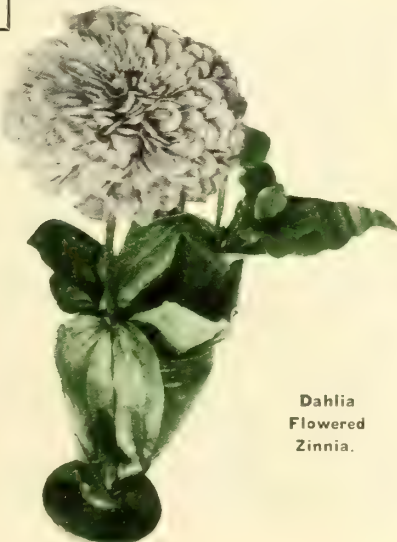

Dream—Deep lavender.

Illumination—Deep rose.

Purple Prince—Deep purple.

Finest Mixed.

Pkt. 10c; 3 pkts. 25c; oz. \$1.50; postpaid.

Dahlia Flowered Zinnia.

Double Lilliput Zinnias

Lilliputs are growing in popularity regularly for cut flower use. The flowers are small, compact and symmetrical, on strong stems. The following are fine colors:

Crimson Gem

Salmon Rose

Golden Gem

Scarlet Gem

Finest Mixed

Rosebud, Rose Pink

White Gem

Pkt. 10c; 3 pkts. 25c; oz. \$1.00; postpaid.

Lilliput Zinnias.

Flowering Spikes---Splendid Cut Flowers

The gracefulness of the spike flowers make them much desired for cut flowers, bouquets, baskets, etc.

Larkspur.

Stocks (Gilliflower)

Considered almost indispensable where a fine display of flowers is wanted and particularly valued for edgings, bedding and pot culture; also suitable for cutting. Produce dense spikes of very fragrant and beautiful double flowers in wide range of attractive colors. A hardy annual, growing from 12 to 18 inches high. Comes in Brilliant Rose, Canary Yellow, Carmine, Dark Blue, Lavender, or mixture of these colors. **Pkt. 10c; 3 pkts. 25c; oz. \$3.00.**

Stock.

Larkspur

No garden is complete without larkspur. They add a rare charm to rock gardens especially. Their long-clustered spikes of beautiful irregular flowers, often with long spurs, are especially valuable for their shades of blue. The annual forms are splendid for bedding. Colors range from white through pastel shades of blue, lavender and pink to brilliant hues. Plant in the fall or very early spring. Reseed themselves, but gradually lose color and should be replanted every two to three years. Hardy annual. Our tall, double stock flowered strain will please you. Note this wide range of colors:

Dark Blue, Lustrous Carmine, Empress Rose, Scarlet Rose, Sky Blue, Violet, Finest Mixed. Pkt. 10c; 3 Pkts. 25c; oz. 50c; postpaid.

LOS ANGELES—Brilliant Rose on Salmon. **Pkt. 10c; 3 Pkts. 25c; oz. 85c; postpaid.**

Lupins.

Delphinium (Perennial Larkspur)

Because the annual larkspurs reseed themselves so well, this variety is not exceedingly popular through the South. They do very well, however, and have a good range of colors. Our Gold Medal Hybrids are very fine, and we especially recommend them for their color mixture, which we are confident will please you. **Pkt. 10c; 3 pkts. 25c; oz. \$2.00; postpaid.**

Texas Bluebonnet (Lupins)

This lovely flower is becoming more and more generally used in preennial borders. While it is an annual, it reseeds itself and is so hardy that it will grow practically anywhere. Grows from 1 to 2 ft. in height and does exceptionally well on lime soils. Is a legume and enriches the soil where it grows. Plant in the fall or very early spring. **Pkt. 10c; oz. 25c; 1/4 lb. 65c; lb. \$2.00; postpaid.**

Lupins

Similar to the Texas Bluebonnet, but grows slightly taller and comes in rose, blue, orchid and white. Finest mixture of colors. **Pkt. 10c; 3 pkts. 25c; oz. 35c; postpaid.**

Snapdragon (Antirrhinum)

A border and bedding plant of long-blooming season. The long showy spikes of curiously shaped tubular flowers, with spreading lobes and finely marked throats are fragrant as well as brilliantly colored; very desirable for cutting. Seed may be sown in the fall or spring, but where winters are severe, the gardener who wants early flowers should start the seed quite early under glass and transplant to a sunny situation as soon as the ground is warm. Grow two to three feet high.

Brilliant (scarlet and yellow), Brilliant Rose (rose pink), Cardinal (dazzling scarlet), Crimson King (deep crimson, dark foliage), Golden King (fine yellow), Rose Queen (soft pink), Mixture of above. Pkt. 10c; 3 pkts. 25c; oz. \$1.00; postpaid.

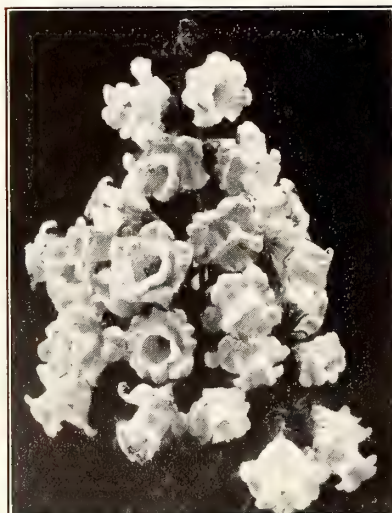

Snapdragon.

Foxglove (Digitalis)

A fine old-fashioned border plant, affording spikes of large, brilliantly colored flowers which are about half as long as the height of the plant. Very distinct and showy. Colors include White, Lavender, and Rose, many being spotted or splotted. Hardy perennial. Finest Mixed. **Pkt. 10c; 3 pkts. 25c; oz. 75c; postpaid.**

Fox Glove (Digitalis).

Campanula—Canterbury Bells.

Canterbury Bells (Campanula)

Large, beautiful and very important family for the flower garden. Charming for rock gardens. Grow wild in some parts of the South, but the cultivated plants are much more beautiful. Grows about 2 feet high. Sow seed in fall for spring blooming.

CAMPANULA MEDIUM—Mixed colors. **Pkt. 10c; 3 pkts. 25c; oz. 50c; postpaid.**

CAMPANULA PYRAMIDALIS—(Chimney Bellflower). A hardy, beautiful stately plant with large pyramidal spikes of flowers. 4 feet tall Mixed colors. **Pkt. 10c; 3 pkts. 25c; oz. \$1.00 postpaid.**

Square Brand Field Beans

INCREASE YOUR YIELD AND BUILD YOUR SOIL BY
INOCULATING BEAN SEED WITH NITRAGIN

MUNG BEANS—Mung Beans were introduced into America as far back as 1835. They are upright in growth, strong and vigorous, free from disease and make excellent hay, beans excellent for table use, the flavor being quite similar to cowpeas. The beans mature in 90 to 100 days. Plant same time as cowpeas. A splendid soil-builder. Five pounds will plant an acre with a drill in 3½ foot rows. Does well broadcast also. **Prices: Lb. 35c; 2 lbs. 65c; postpaid.**

Soy Beans

Soy Beans belong to the legume family, being wonderful soil builders. They take nitrogen from the air and store it in the nodules on their roots. They do well on same soil as corn, but will produce very satisfactorily on poorer soil. Land should be prepared as for cowpeas, and seed planted in drills. If wanted for hay crop, vines should be cut when the upper leaves begin to turn yellow, but if wanted for seed, gathering should be delayed until nearly all the leaves have fallen.

NEW LAREDO—A new variety that is a distinct addition to the forage crops of the Cotton Belt. Its value, when compared to other soy beans, is in the fineness of its stems, its yield of hay, its medium early maturity and its heavy yield of seed. One bushel will plant from 8 to 10 acres in 2½-foot rows. Seed should be dropped from 3 to 6 inches apart in the drill and covered 1 inch. It is both wilt-resistant and nematode-resistant.

MAMMOTH YELLOW—The most popular and largest yielder. Grows 3 to 5 feet high. Should not be planted until all danger of frost is past. For hay and as a soil builder sow 2½ bushels per acre broadcast; for beans plant from 15 to 30 pounds per acre in drills 3½ feet apart.

Prices: Lb. 25c; 2 lbs. 45c; postpaid.

Mammoth Yellow Soy Beans.

BLACK EYE—The most prolific and widely used of any of the varieties. Most popular for home gardens and table use and for market by truck growers. Usually brings better prices than other varieties. **Prices: Lb. 20c; 2 lbs. 45c; postpaid.**

BROWN CROWDER—A fine flavored table pea and one of the earliest to mature. Grows upright and very prolific. **Prices: Lb. 20c; 2 lbs. 35c; postpaid.**

WHITE CROWDER—A very popular variety of a delightful flavor for table use. **Prices: Lb. 25c; 2 lbs. 45c; postpaid.**

SEE SPECIAL LIST FOR QUANTITY PRICES.

SQUARE BRAND VELVET BEANS—Becoming very popular for forage crop and as a soil builder. Grows faster and more prolific than other forage plants. Splendid for grazing all kind of stock. Fine for planting in corn. Plant in rows 3 to 5 feet apart, 2 to 3 pecks per acre.

EARLY SPECKLED OR 100 DAY VINING—An extra Early variety. Can be planted in May and June and still mature before frost; also fine for September planting to be turned under as cover crop for improving soil.

Prices: Lb. 25c; 2 lbs. 45c; postpaid.

Whippocorwill Peas.

CREAM OR LADY—Extensively used for table use. Prolific bearer and can be used green or dry; also good soil builders. This variety produces peas in pods that are very tender and of good flavor when young. They can be cooked as a shell pea when dried and shelled.

MIXED COWPEAS—A mixture of the principal varieties listed above. Are very popular especially for hay and cover crops.

Prices: Lb. 25c; 2 lbs. 45c; postpaid.

Velvet Beans.

Field or Cow Peas

To Increase Your Yield and Build Your Soil
Inoculate Cowpeas With Nitragin.

Cowpeas are the old reliable leguminous crop for the South. Adapted to practically every kind of soil, besides being the cheapest and surest means of improving soil. They add nitrogen to the soil and improve its mechanical condition, besides yielding a prolific crop of nutritious hay. The seed are universally used for human food.

SPECKLED WHIPPOORWILL—The most popular and widely grown early variety. Grows upright, easily gathered. Brown speckled seed. **Prices: Lb. 20c; 2 lbs. 40c; postpaid.**

BRABHAM—An early wilt-proof, disease-resistant variety. Very similar to Whip-poorwills except much smaller seed requiring less for planting a given acreage. The foliage is valuable for hay. **Prices: Lb. 25c; 2 lbs. 45c; postpaid.**

CLAY—Matures a little late; medium sized seed. Vines long and leafy; exceptionally good as a soil builder. **Prices: Lb. 20c; 2 lbs. 45c; postpaid.**

WILL C. OLIPHANT, Box 16, Friendswood, Texas, wrote us on Sept. 4, 1933: "I do a lot of grubbing in tall grass; the Chiggers are terrible. I put Chigger-Chaser on my legs and am not bothered with them. If I forget the Chaser and get bitten I apply it and it soon kills them."

Brown Crowder Peas.

Increase Milk Production and Fatten Stock with Root and Green Crops

Mangel Wurzel Beets

Giant
Sludstrup.

These beets grow increasingly popular among dairymen and hog raisers. Recent experiments made by the Texas Experiment Stations show their high value to stock raisers. When well grown the root will yield an immense amount of valuable food. They may be grown in almost any soil, but deep loams are necessary for heavy yields of the long varieties.

CULTURE—Plow your land deep and prepare thoroughly. Plant early in the spring in drills 2 to 3 feet apart and cover the seed about 1½ inches. Cultivate frequently. When about three inches high, begin thinning and continue at intervals until the roots stand from 8 to 12 inches apart in the rows. Use an ounce to 100 feet or from 5 to 6 pounds per acre.

GIANT SLUDSTRUP—This is a variety especially valuable for the dairyman. It produces the highest yield of sugar content of all of the mangels. It is a long reddish-cream root which grows well out of the ground. The roots do not grow as long as that of the Mammoth Long Red but by actual test far exceed the other varieties in weight and feeding value. This is unquestionably the most desirable sort for dairymen since it radically increases the flow and quality of milk.

GIANT HALF-FEEDING SUGAR—Another very good variety. It yields a large crop of roots next in sugar yield

Postpaid prices: Pkt. 5c; oz. 10c; lb. 50c.

Giant Half Sugar Feeding Mangel.

to the Giant Sludstrup. The roots are light bronze above the ground and grayish white below with white flesh. This beet, growing largely out of the ground, can be harvested earlier than any other mangel crop. Good either for the dairyman or the hog raiser.

MAMMOTH LONG RED—Roots are very large, uniformly straight and well formed. Flesh is white tinged with rose. This variety is preferred by hog raisers because of its enormous tonnage. It yields a greater tonnage per acre than other varieties but the sugar content is lower. Keeps well and is very nutritious.

Mammoth French White Artichokes

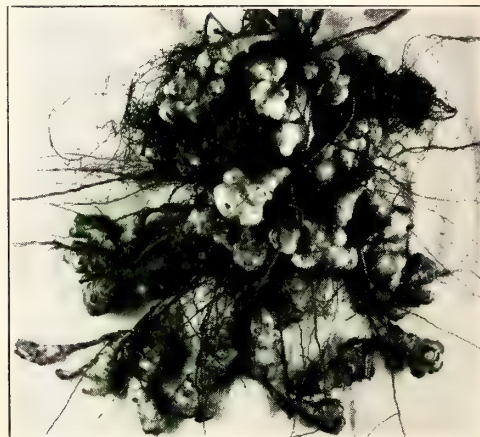

SUITABLE FOR BOTH HUMAN CONSUMPTION AND ANIMALS

These artichokes are suitable for either sandy or black soil. They grow enormous crops—really producing two crops, a forage crop consisting of plants that grow from 5 to 8 feet high followed by a root crop which produces from 9 to 14 tons of feed to the acre.

The roots or tubers have a very heavy sugar content. Their flavor is exceptionally appealing to people as well as to animals. For human consumption the Artichokes are prepared like ordinary white potatoes, being baked, boiled, fried and also being used in salads and soups.

While Artichokes are adapted to all soils except those that are very moist, they do better on poor soils than most tuber crops. They are easily cultivated because of their strong growing and wide branching habit, and their large heavy leaves. Their flower is similar in appearance to the smaller Sunflower. Freezing while under the soil does not harm them.

The tubers are extremely valuable as feed for cattle, sheep, hogs, horses and also poultry, turkeys, ducks and geese. We especially recommend Artichokes for hog feed. The tops and tubers are relished by milch cows and increase the flow of milk greatly.

One Stalk of Mammoth Artichokes.

CULTURE — Prepare the bed thoroughly. Small tubers planted whole are very satisfactory, large tubers may be cut in pieces for planting just as potatoes are. Plant about 4 inches deep in rows from 2½ to 3 feet apart and drop the tubers from 1½ to 2½ feet apart. 5 to 7 bushels per acre are required for planting. Cultivate same as corn—but not close to the plant.

Postpaid prices: Lb. 25c; 5 lbs. 75c.

Square Brand Seed Peanuts

For medium light, loamy or sandy land, peanuts are one of the most profitable crops that can be grown. Often yield as much as fifty bushels per acre on land too poor to plant corn. Produce ordinarily about a ton of excellent forage per acre in addition to the crop of nuts. In harvesting, plow the peanuts and then stack against stakes stuck into the ground, the roots with the peanuts on them, to the center, and the leaves outside.

SPANISH PEANUTS—This variety grows in more compact form than the Virginia peanuts, making it possible to grow them closer, which makes the cultivation easier. While the nuts are smaller, they are much sweeter and of finer flavor than the larger sorts, and contain a higher per cent of oil than do the others. The "pops" so common in large varieties are seldom found in the Spanish. The best crop in the South for fattening hogs, and no Southern farm, where stock is raised, should be without them. Pods usually contain two nuts or kernels and adhere well to plant when digging. Has sticks, trash and foreign material removed.

Postpaid prices: Lb. 25c; 2 lbs. 45c.

TENNESSEE LONG RED—Does well on black waxy land as well as sandy soil. Larger in size, with greater number of nuts than most varieties grown in the South. A splendid commercial variety and very productive.

IMPROVED VIRGINIA JUMBO—A standard variety for roasting. Planted almost exclusively by the peanut growers of Virginia. The vines furnish excellent foliage. Grows upright and easily cultivated.

Postpaid prices: Lb. 30c; 2 lbs. 55c.

Spanish Peanuts.

SEE SPECIAL LIST FOR QUANTITY PRICES.

Profitable Forage and Green Manure Crops

Austrian Winter Peas

PRODUCE AN IMMENSE AMOUNT OF FORAGE AND HEAVY GREEN MANURE CROP

Inoculating this seed with Nitragin increases yield and improves your soil.

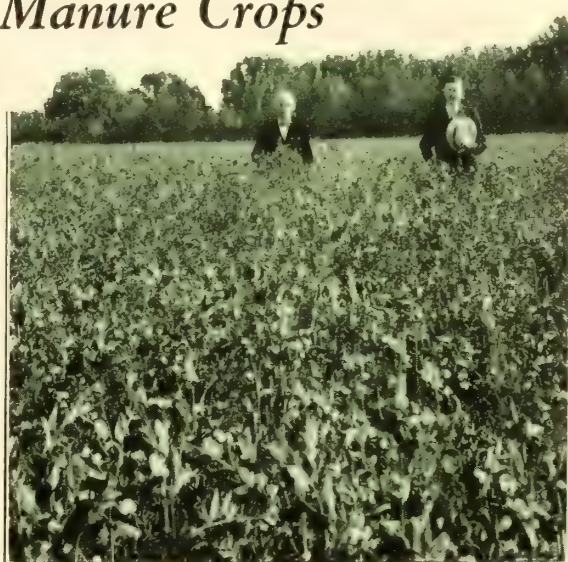

Austrian Winter Peas are growing in popularity annually. We feel this is due to their proven value to the stock farmers and fruit growers of the country. These peas resemble the English in size of seed, and the Canada pea in character of vine. They cannot be excelled as a winter cover crop thriving after being subjected to zero temperature. They will grow from 5 to 6 feet tall on fertile soil and make excellent hay in addition to furnishing grazing for live stock. The best time to plant is in September and October, but they may also be sown in January and February.

They are especially recommended to the fruit farmers for a green manure crop to be planted between the trees in the fall and plowed under in the spring. Many of our customers report them as delicious food for their tables. This is a leguminous crop which vastly increases the fertility of your soil. If planted following a cultivated crop it is not necessary to plow the ground, using a harrow before and after sowing followed by roller on loose soil. Plant 50 lbs. to the acre when planted alone. We recommend planting 30 to 40 lbs. to the acre with a bushel of Rye, Barley, or Wheat to hold vines off the ground. **Postpaid prices: Lb. 25c; 2 lbs. 45c.**

Canada Field Peas

For increased yield inoculate this seed with Nitragin

A fine combination legume for grazing, hay, cover crop and table use. Plant in October or November and again in the early spring. Grows from 4 to 6 feet high and can be grazed when 6 to 10 inches high; pasturing makes them stool better. A great soil builder even when grazed or cut for hay, on account of storing nitrogen in the roots. Exceptionally fine when turned under as green manure. We recommend sowing a bushel of Oats, Barley or Wheat with 40 or 50 pounds of peas per acre. If sown alone, use 75 pounds per acre. **Prices: Lb. 25c; 2 lbs. 45c; postpaid.**

A field of Square Brand Austrian Winter Peas—the ideal fall cover crop.

Square Brand Dwarf Essex Rape Seed

Here is one crop that too few of us appreciate at its full value and to which we would do well to give more attention, not only as a feed for hogs, but as a source of green feed for all livestock, including chickens—and the family as well. It will astonish anyone who has never planted it to see how much grazing an acre of this plant will give. Rape makes a very acceptable dish of greens for home use and may be grown as a substitute for turnip greens. Plants grow to a height of from one to four feet, depending on conditions of soil and climate. In shape and color of leaf it resembles the rutabaga. The leaves grow very rank and succulent, and are sweet and tender. Fall seeding is best, but early spring sowing is successful. The crop is not injured by ordinary winters in the South. It is ready for grazing in from 8 to 10 weeks. Yields of 30 tons per acre, green weight, are not rare. An acre of good rape will pasture 20 hogs two months. Sow in drills, 5 to 8 pounds per acre. **Prices: Lb. 25c; 2 lbs. 45c; postpaid.**

Dwarf Essex Rape.

Square Brand Vetch

Vetch is a very practical forage crop which many farmers are using as a substitute for clover on lands too poor to grow clovers. Covers the ground during the winter, preventing the leaching of valuable plant foods. Be sure to plant the Hairy Winter Vetch. There are other Vetches on the market which cost less but are not suitable for this territory. We especially recommend vetch for grazing and hay. The plant is very hardy; it should be sown in August or September for winter pasture, and may also be sown in early spring for summer pasture. It is a splendid nitrogenous soil improver.

Sow 50 lbs. per acre when planted alone. We recommend that equal amounts of Vetch and Oats be sown together so that Vetch will have proper support in growing. **Postpaid prices: Lb. 30c; 2 lbs. 55c.**

POULTRY PASTURAGE—The feeding of greens materially increases egg productions, for that reason we recommend that every poultryman plant an ample supply. Rape, Swiss Chard and Millet all furnish ideal green feeds and, of course, there is nothing better than sprouted oats. Be sure to have plenty of green feed consistently for your poultry.

SEE SPECIAL LIST FOR QUANTITY PRICES.

Eezy-Wear Garden Gloves

All-Leather—Dirt-Proof—Soft As Kid—Extra Pliable

Ideal gloves for men and women, made from select imported leather processed to render it amazingly soft and pliable, as well as durable. Permit almost bare-hand freedom with perfect comfort, yet insure complete protection from dirt, scratches, bruises, stains. Economical—outwear 6 pairs of fabric gloves.

Washable—Sizes for women: "Small," "Medium," "Large." For men: "Medium," and "Large."
Price: 75c a pair; 2 pair \$1.40; postpaid.

Square Brand Hairy Vetch—a splendid cover crop, ideal for soil building and the prevention of erosion.

Barley, Bearded.

Winter Rye

Winter Rye is a very valuable winter pasture crop, and is also frequently used as a winter cover crop to be turned under for green manure in the spring. While it adds a great deal of humus to the soil where cover crop is desired, we recommend a combination of Rye with Austrian Winter Peas or Winter Vetch since both of these crops bring nitrogen into the soil in addition to humus. Sow $1\frac{1}{4}$ to $2\frac{1}{4}$ bushels per acre.

PRICES—Because the market fluctuates so greatly on cereal grains we refer you for prices to our current price list. If your list is older than three months we suggest your writing for a new one.

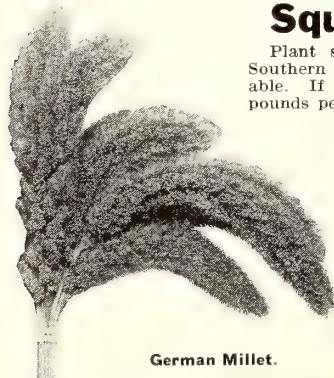

Square Brand Millet Seed

Plant some of your well-drained upland in Millet. Our Southern Grown Big German Millet is the finest grade obtainable. If grown for seed, drill and cultivate, planting 5 to 10 pounds per acre; for hay sow 20 to 25 pounds per acre.

SQUARE BRAND BIG GERMAN—Now recognized as the finest quality, becoming more popular each year. Extra large heads, grows rank, best variety for hay for which it should be cut when in full bloom. On good soil a yield of five tons per acre is not unusual. **Prices:** Lb. 20c; 2 lbs. 35c; postpaid.

PEARL OR CAT TAIL (Pencillaria)—Especially recommended for continuous cutting forage plant. Grows very tall but if cut when 3 to 4 feet high, will stool rapidly and can be cut three to four times in one season. Plant 5 pounds per acre in drills 3 feet apart or sow broadcast 20 to 30 pounds per acre. Do not sow before May. **Prices:** Lb. 30c; 2 lbs. 55c; postpaid.

HOG OR MANITOBA—This variety produces an extra large head and grain; high in feeding value for stock and poultry. **Prices:** Lb. 20c; 2 lbs. 35c; postpaid.

German Millet.

Square Brand Sunflower Seed

MAMMOTH RUSSIAN—Produces an enormous head, from 12 to 20 inches in diameter. On light, well drained, well tilled fertile soils yields from 30 to 50 bushels per acre. Plant and cultivate as you would corn. May be planted some earlier, using 8 to 10 pounds per acre. As a poultry food mixed with other grains it has no equal. **Prices:** Lb. 25c; 2 lbs. 45c; postpaid.

Mammoth Russian Sunflower.

Winter Barley

You can increase your yield by treating all Barley seeds with Ceresan before sowing.
SQUARE BRAND WINTER BARLEY—Makes a fine pasture and will yield from 30 to 60 bushels of seed per acre. Our seeds are grown from pedigreed seeds under supervision of expert growers. Barley has become increasingly popular in Texas for fall and winter grazing, and one of the cheapest pastures available. It provides a large amount of humus if plowed under for a green manure crop in the spring. Sow about 2 bushels per acre.

Because the market fluctuates so greatly on cereal grains we refer you for prices to our current price list. If older than three months we suggest your writing for a new one.

Oats

Ceresan increases your yield of oats.

CERTIFIED PEDIGREED NORTEX OATS—Grown by the Denton County Pedigreed Grain Association, inspected and tested—free from Johnson grass. An oat which will produce the highest possible yield for you.

FERGUSON RED RUST-PROOF OATS—Are grown from exceptionally fine stock seeds by growers who produce strictly for seed purposes. These oats are recognized as one of the finest strains of Red Rust-Proof and are in heavy demand by our customers.

PRICES—Because the market fluctuates so greatly on cereal grains we refer you for prices to our current price list. If your list is older than three months we suggest your writing for a new one.

Seed Wheat

Increase your yield by treating with Ceresan before sowing.

We offer the Mediterranean Bearded Seed Wheat grown for us in Denton County. From experience we know this to be the best variety of seed wheat on the market today. There has been a growing tendency the past few years to buy cheap seed wheat. Unless seeds are bred for vitality and productiveness they will gradually degenerate just as livestock or anything else does. We caution farmers, therefore, to be sure to get good stock, and we offer a seed wheat which is superior to the average wheat on the market.

PRICES—Because the market fluctuates so greatly on cereal grains we refer you for prices to our current price list. If your list is older than three months we suggest your writing for a new one.

Mediterranean Wheat.

Broom Corn

EVERGREEN DWARF—Most popular variety in Texas and Oklahoma. Noted for earliness in maturity. Robust and very productive. Brush, long fine quality and well fibred. It is also a great drouth resister and easy to thresh. **Prices:** Lb. 25c; 2 lbs. 45c; postpaid.

Buck Wheat

This crop should be more generally grown in the South for poultry feed. It is well adapted and it may be sown in the very early spring or late summer. It matures in about two months, is easily grown, desirable and profitable for large grain yields. The flower is a fine food for Bees and when turned under this is a good soil improver. Buckwheat smother weeds; it also makes a fine quality of flour and is a good drouth resister.

SILVER HULL BUCKWHEAT—Grains are a beautiful light gray color with thin husks. **Postpaid prices:** Lb. 20c.

SEE SPECIAL LIST FOR QUANTITY PRICES.

MR. J. A. CRESSLER, Keechi, Texas, wrote us on July 29, 1933, asking for prices on Winter Barley and Sweet Clover, and made this comment on Square Brand Seeds: "The spring seed I got from you all worked out fine; will make second crop of hay, sorghum and sudan grass."

Square Brand Seed Corn

At the low, per acre, cost no one can afford to plant inferior seed corn. It is one of our most important crops. Good seed costs only a few cents per acre more than poor seed. Yet the yield can easily double or triple the cash you receive for the crop. We recommend Southern grown seed in most instances, especially on good rich soil. We handle Northern grown corn for those wanting early maturity.

Southern Grown Varieties

SURECROPPER—The most popular early maturing corn. Its drouth resisting qualities make it desirable for summer planting as well as spring. Planted extensively on stubble after grain harvest. Large white grain on white cob. Medium large and well-formed ear. Matures in from 100 to 110 days.

YELLOW DENT—The best high-yielding yellow corn for the South—deep large yellow grain. Medium large ears. Withstands storms on account of large stalk. Matures in from 110 to 120 days.

WHITE WONDER—A large ear, with medium large grain and white medium sized cob. Used extensively in South Texas for roasting ears—medium early, maturing in from 110 to 120 days.

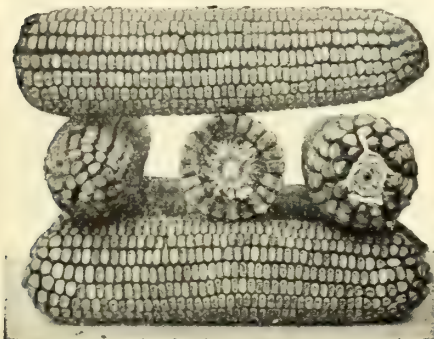

STRAWBERRY—A popular and high yielding corn in Texas and other Southern states. Large ear with strawberry colored kernels; a fine all-purpose corn. Matures in from 115 to 125 days.

BLOODY BUTCHER—A good yielder—well adapted to the South. Produces a beautiful deep red grain. Matures in 120 to 130 days.

HICKORY KING—A good drouth resister and medium yield. Large flat white grain, very small cob and largely planted for roasting ears.

CHISHOLM WHITE, RED COB—A native variety. Large ear, large deep creamy-white grain. Red cob. Has no equal as a milling corn. It is medium early, maturing in from 105 to 115 days.

DWARF MEXICAN JUNE—This is a dependable drouth-resisting corn which may be planted the latter part of May, June and July. It matures in from 100 to 110 days, and is popular for stubble planting and roasting ears. By all means be sure to include some Dwarf Mexican June in your garden.

Chisholm, Red Cob.

REID'S YELLOW DENT—This is one of the most popular corns in the United States, and is much used in the South due to early maturity. The grains are very deep, closely packed, butt and tips almost entirely covered over. Produces a good size ear and matures in from 100 to 110 days.

Postpaid prices: Lb. 20c; 2 lbs. 35c.

SEE SPECIAL LIST FOR QUANTITY PRICES.

CHARLES SCHROEDER, Route 3, Box 65, Sealy, Texas, in sending an order on Feb. 27, 1933, made the following statement: "I'd like to have the same corn I order 4 years ago from Sherman, Texas—Ferguson's Yellow Dent—it sure was good and made a fine crop."

Square Brand seeds are consistently of high quality. Great care is used in their growth and you are assured of the highest possible yield of marketable crops when you plant our seeds.

Protect Your Seed Corn With Stanley's Crow Repellent

This repellent protects and insures you against crows and other pests pulling corn while it is germinating, sprouting and rooting. Crows hate it. It saves loss of seed and labor of replanting. Positively will not clog any planter. Protects seed from rotting in the ground. It is non-poisonous and will not injure the seed of any kind of corn. It does not kill birds or animals but will keep them away and prevent destruction.

Easy to use. Economical. Costs only 10c to 12c per acre, depending on the quantity of seed used, in planting.

Postpaid Prices

1 Quart (enough for four bushels seed corn) \$1.75
1 Pint (enough for two bushels seed corn) 1.00
1/2 Pint (enough for one bushel seed corn) 60

TO INCREASE YIELD AND CONTROL DISEASE, TREAT CORN SEED WITH SEMESAN JR. BEFORE PLANTING

Yellow Dent.

SQUAW SEED CORN—A natural drouth-resisting variety. Grains are a combination of colors mostly blue and white. Large ears, good yield. Plant any time from March to August. Compare favorably with Mexican June Corn for late planting. Matures in from 105 to 115 days.

RED JUNE—This variety of June corn is growing more popular annually, principally because it has the greatest drouth-resistance of all corns. Its ear is slightly larger than that of the Dwarf Mexican June. It is not as yet so well known on the markets as is the White June but a large demand is being developed on it.

Postpaid prices: Lb. 20c; 2 lbs. 35c.

Northern Grown Varieties

SILVER MINE—Quick maturing and hardy; also splendid yielder. Pure white kernel, small white cob. Matures in from 90 to 100 days.

YELLOW LEAMING DENT—A standard variety, very popular in South on account of its early maturity. Deep, closely packed yellow grain. Medium sized ears.

EARLY WHITE PEARL—Largely used for roasting ears. Is the earliest maturing corn on the market. Produces large, uniform ears, with pure white kernels—with more fluid than Silver Mine.

These Profits are Worth Investigating

Semesan Jr. increased the yield of field corn 21.3 bushels per acre over the untreated seed, planted in the same field.

Not less than three bushels more corn per acre can be reasonably expected by any farmer who treats seed corn before planting. Field or sweet corn dusted with Semesan Jr. is protected from destructive root rots. Better germination, better stands and better yields of improved quality are obtained.

Early planting frequently makes larger yields possible, but early planted corn has always been handicapped by the seed rotting in the ground. Semesan Jr. affords seed corn protection from rotting in cold, wet soil.

Understand this is a seed disinfectant and not an insecticide, although some users claim that ants, bugs, gophers, etc., do not attack seed treated with Semesan Jr.

Treatment with Semesan Jr. costs less than 3c per acre, and pays a splendid profit on the cost. Easily and quickly applied as a dust, at rate of 2 ounces per bushel of seed. Prices: 4 oz. 50c; 1 lb. \$1.75; 5 lbs. \$8.00; postpaid.

Alfalfa.

SQUARE BRAND SWEET WHITE BLOSSOM, SCARIFIED—The most popular variety of all clover, being adapted to practically all Texas soils. It is a great sub-soiler, as the roots penetrate deep into the ground breaking up hardpan, and decompose, adding humus to the soil. We recommend planting in September and October; also February to April, at the rate of 15 pounds of clover with 1½ to 2 bushels of oats per acre in well settled soil, covering lightly, following with roller. May be planted alone also.

MELILOTUS INDICA (Annual Yellow Blossom Sweet Clover)—Sometimes called Sour Clover. Used extensively as a cover crop, especially in orchards. Very popular in South Texas where it grows all winter and produces a vast quantity of green manure to be turned under in the early spring. Can be sown in fall or spring, 15 to 20 pounds per acre.

HOP CLOVER—Bears a small yellow bloom, of rather upright growth. Grows 12 to 15 inches high. Sow in September and October.

KOBE LESPEDEZA—A mammoth late variety also producing well on black land and withstanding heat and dry weather. Matures about the same time as Common Lespedeza but much larger growth.

Sericea Lespedeza—Note the root systems six-months old plants.

KOREAN LESPEDEZA

—A mammoth early variety, withstanding dry hot weather. Does exceptionally well on black land; is about 30 days earlier than other varieties. Resistant to storm and a heavy seed yielder.

SERICEA LESPEDEZA—We are glad to recommend this variety to everyone. It is the twin brother of alfalfa and is replacing it in many districts. It will grow practically anywhere, as a perennial coming from the roots each spring and cuts from three to four times annually. The older your field gets the greater your yield will be. Sericea Lespedeza weighs 63 pounds to the bushel, and whereas Kobe and Korean require approximately 35 pounds to the acre, Sericea requires only 10 pounds to the acre. Attention is directed to the splendid root system shown in the adjoining picture. This is from a first year crop planted April 10, 1933, and was grown on our trial ground in Dallas County. It was grown in sand and without irrigation during one of the drouthiest seasons we have had. Sericea should be planted in the spring when all danger of frost is over and sown and cared for like alfalfa or clover. Stock likes it and it has a very high protein value.

WHITE DUTCH CLOVER—A hardy perennial spreading clover. Too small for hay. Recommended to mix with other grasses for lawn or pasture. Sow 6 to 8 pounds per acre.

Square Brand Alfalfa Seed

TO INCREASE PRODUCTION AND BUILD YOUR SOIL
INOCULATE ALFALFA SEED WITH NITRAGIN

Alfalfa is the most valuable leguminous permanent crop grown for pasture and hay. Its hardness makes it adaptable for almost any climate and type of soil except acid soil, which should be corrected by the use of lime and ample drainage. Alfalfa enriches the soil. Sow 20 pounds per acre on well prepared clean soil, covering about one inch with harrow, followed by roller. Keep weeds clipped down with mower until alfalfa thoroughly covers ground. The Cahoon or Cyclone seeder is recommended for use in sowing. Be sure to inoculate with Nitratin.

SQUARE BRAND ALFALFA—Carefully selected and double re-cleaned from the best American Grown seed produced by experienced alfalfa seed growers. Bright in color, high in germination and purity.

HAIRY PERUVIAN ALFALFA—A native of Peru, very popular in the South and Southwest, especially recommended for Texas. May be cut the year round for hay, when winter is mild. Because of the rapid fluctuation in price of alfalfa, we refer you to our Special Price List for prices.

Square Brand Clover Seed

TO INCREASE YOUR YIELD AND BUILD YOUR SOIL
INOCULATE CLOVER SEED WITH NITRAGIN

All varieties of Clover have exceptionally high feeding value, containing protein which is needed to build up muscle and beef and to increase the yield of milk. Clovers are soil renovators, being resistant to most insects and fungus disease, making possible a better system of crop rotation. One of the greatest needs of

the South is the use of more legumes to build up and improve the soil. Clover cannot be excelled as a gatherer of plant food and accumulator of nitrogen from the air—often adding 200 pounds of nitrogen per acre in a year. Do not use bur varieties where sheep are to be grazed, since burs reduce grade of wool.

Square Brand White Blossom Sweet Clover not only produces a wonderful pasture crop, but enriches soil and prevents erosion.

JAPAN or LESPEDEZA CLOVER—A good clover to plant in the South during the spring months; also planted in the fall. Thrives on poor land and is a great soil builder. Sow 20 to 25 pounds per acre on fresh disc or harrowed land, followed by roller.

BLACK MEDIC or TREFOIL (Medicago Lupulina)—A biennial. Has small yellow blossom. Plant is similar to alfalfa except that it spreads more and lays flat on the ground. Sow 15 pounds per acre in September and October; also in February, March and April. When sown with other clovers and grasses, sow 2 to 3 pounds to the acre.

SOUTHERN SPOTTED LEAF BUR CLOVER (In Bur)—Very popular in the South for winter pasture. Popular for sowing in Bermuda grass sod for permanent pasture. Disc over your Bermuda grass and sow in the fall, followed with roller. Also fine to sow with other grasses for permanent pasture. Grows well on any type of soil. Sow in August, September or October. Produces early grazing and lasts well.

PLEASE REFER TO SPECIAL LIST FOR PRICES.

Permanent Pasture Mixtures

An investment in permanent pastures has proven highly profitable to every farmer who has made it. Start with small acreage, and increase annually. It's the sure way to practical and profitable livestock raising. Our pasture mixtures are the result of study and experience, and our sales of these mixtures are increasing annually. If sheep are to be pastured, be sure to order your mixtures without bur clover, since the burs get in their wool and reduce the value of the wool.

NORTH AND CENTRAL TEXAS—

Bermuda, in North and Central Texas, should be sowed in clumps and since it spreads very rapidly, you will get a good stand quickly. At the same time you sod, or if you already have a Bermuda stand, you should plant our Pasture Mixture for North and Central Texas. This consists of Rye, Dallis and Rescue Grass, Black Medic, Spotted Leaf Bur and Sweet Clover, which should be sown at the rate of 20 to 25 pounds per acre.

GULF COAST—This pasture mixture consists of Carpet, Rhodes, Rescue, Rye, and Dallis Grass, and Lespedeza, White Dutch, Melilotus Indica and California Hulled Bur Clover, to be sown at the rate of 20 pounds to the acre.

EAST TEXAS SANDY UP-LANDS—In this section, also, it is very desirable to have a Bermuda base. Our pasture mixture for East Texas Sandy Up-Lands consists of Rescue, Dallis and Rye Grass, and Black Medic, Lespedeza and Spotted Leaf Bur Clover, which should be sown at the rate of 20 to 25 pounds per acre.

EAST TEXAS BLACK LANDS—Our pasture mixture for this territory consists of Bermuda, Rescue, Rye and Dallis Grass, and Black Medic, Hop and Sweet Clover, which is to be sown at the rate of 20 to 25 pounds per acre. Where a stand of Bermuda is already had, the mixture may be ordered without the Bermuda Grass Seed.

EAST TEXAS MOIST LANDS—Our Pasture Mixture for East Texas Moist Lands consists of Dallis, Rescue, Carpet and Red Top Grass, and Lespedeza and White Dutch Clover, which is to be sown at the rate of 20 pounds to the acre.

BOTTOM LANDS IN SOUTHEAST TEXAS—Our pasture mixture for this territory consists of Bermuda, Rye, Dallis and Carpet Grass, and Lespedeza, Hop, White Dutch and Black Medic Clover to be sown at the rate of 20 to 25 pounds to the acre.

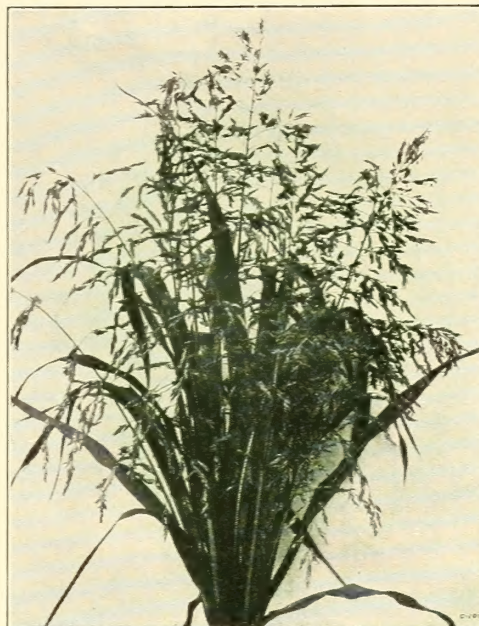

Other Pasture Grasses

ITALIAN RYE (American Grown)—Recommended as one of the best for winter use. Is easily grown and makes splendid winter grazing for all kinds of stock. Also produces a good early spring hay crop. A perennial, reseeding itself if allowed to go to seed, making it fine to mix with other grasses and clovers for permanent pasture. Sow in September or October, using 20 to 30 pounds per acre, if sown alone.

BERMUDA GRASS—A fine basis for permanent pastures in all soils except very light sand. The best known grass to prevent washing and erosion in gullies and on hill sides. Flourishes in sunshine but will not endure heavy shade. For pastures sow 10 to 15 pounds per acre on well prepared, firm seed bed, using roller. Should be sown in spring or late summer when it is warm and moist.

JOHNSON GRASS—Is hard to eradicate in the South, continues to grow year after year from the roots, except in climates with zero temperature. Makes the very best quality of hay, withstands drouth and very prolific.

AVOID DELAYS—Buford Briggs, Route 1, Kempner, Texas, congratulates us on two days shipping service and says: "Can recommend your company to anyone."

Sudan Grass.

RESCUE GRASS—This grass grows wild in some parts of Texas, makes a fine winter and early spring pasture, dying when hot weather arrives. It reseeds itself and will come up the following fall. Very good in permanent pasture mixtures. Broadcast in September and October, 20 to 25 pounds per acre.

DALLIS GRASS—A perennial, which grows continually except in freezing weather. Stands heavy grazing especially on moist ground and will gradually choke out Johnson grass and weeds. Especially good for stopping washes and gullies. Can be planted any time except in drouthy hot summer. 8 to 10 lbs. per acre.

CARPET GRASS—A perennial, does well on land lacking in lime. Makes splendid permanent pasture and its creeping habit of growth enables it to stand close grazing without injury. It is not a pest. One plowing will kill it. The Government recommends it more highly than Bermuda grass for coastal plains. Also good for lawns and golf courses. Plant in September and October; also February, March, and April, 10 to 15 lbs. per acre.

RED TOP OR HERD'S GRASS—Is recommended for heavy, moist lowlands as it withstands wet weather but also does well on most any good rich soil. Sow broadcast 15 to 20 pounds per acre.

MESQUITE or VELVET GRASS—A hardy long-lived perennial with soft broad leaves, never getting coarse. Grows from 8 to 10 inches high. Especially recommended to sow with other grasses or clovers for permanent pasture. Makes the very best quality of hay, but if planted alone does not yield as large tonnage as many other grasses. Sow in September or October; also in March or April, 20 to 25 pounds per acre.

SEE SPECIAL LIST FOR PRICES

A profitable permanent pasture.

Dwarf Yellow Milo.

Square Brand Hegari

Grown for us from certified seed. Hegari originated in Africa. It is a semi-dwarf plant producing a large head of creamy-white grain which is hard to shatter. Is fast becoming the most popular sorghum grain as the stalk makes splendid forage in addition to the large yield of grain. A drought resister. Plant 3 to 4 pounds per acre for seed or grain and 5 to 8 pounds per acre for combination grain and forage.

Schrock Kafir or Sagrain

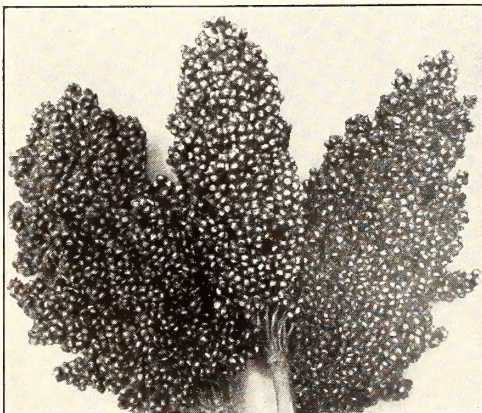

Originated in Oklahoma. Dwarf variety with an abundance of long broad leaves and a large spangled head with light brown grain which is excellent stock and poultry feed. One of the best varieties for combination forage and grain, as the stalk is sweet and brittle. It stools out making 6 to 8 stalks from one seed, all stalks making heads. Matures 10 to 14 days earlier than other varieties, therefore popular for late planting on stubble land.

Black Hull White Kafir

Grows an upright strong stem with broad leaves from 4 to 5 feet high. The stalk makes better forage than any of the non-saccharine sorghums, excepting Hegari and Schrock Kafir.

Square Brand Dwarf Yellow Milo

The most popular non-saccharine sorghum grown in Texas. It is the principal grain crop in Western and Southwestern Texas, on account of its hardiness and dependability under all kinds of conditions and is now grown in all parts of Texas. A heavy yielder of the finest kind of grain for all kinds of stock.

Black Hull White Kafir.

Square Brand Non-Saccharine Sorghums

This sorghum produces fine ensilage as well as an abundance of grain feed. Non-Saccharine Sorghum will produce high yields with limited rainfall where corn has made a failure. The heads make good chicken feed and can be fed ground or whole to all classes of live stock. We list the varieties of Non-Saccharine Sorghums best adapted to this section. Bear in mind that the leaves of the stalks have sufficient saccharine to make excellent forage.

Algeria or Bishop Kafir

A cross between Maize and Kafir. Grows from 4 to 5 feet tall, each plant stooling out making several stalks. Stock eat entire stalk with relish, on account of the heavy saccharine contents. The seed are softer and larger than Maize, with much larger heads. Drill 4 to 5 pounds per acre and thin as corn, not working too close to roots, until it has chance to stool.

Square Brand Darso

A dwarf variety with large stalk and heavy foliage. Has a uniform straight stalk which is very juicy and contains about 12 per cent saccharine, making it especially good for forage. Also a good grain yielder and excellent for silage. Drought-resistant and somewhat earlier than Kafir.

Spur Feterita

Has almost displaced common Feterita. Was developed at the Agricultural Experiment Station at Spur, Texas. Makes a shorter, stockier stalk with more leaves than common Feterita, making a better forage crop. Especially adapted to black lands in addition to the Western sorghum grain belt.

Grohoma

A new variety becoming very popular on account of its heavy yield of grain. It stools out each stalk making a full matured large head from 12 to 14 inches long. The grain is light brown and splendid for all kinds of stock. Requires a little longer to mature than Maize or Kafir, but yields much more grain per acre and does not shatter. Drill 2 to 4 lbs. per acre.

Double Dwarf Yellow Milo

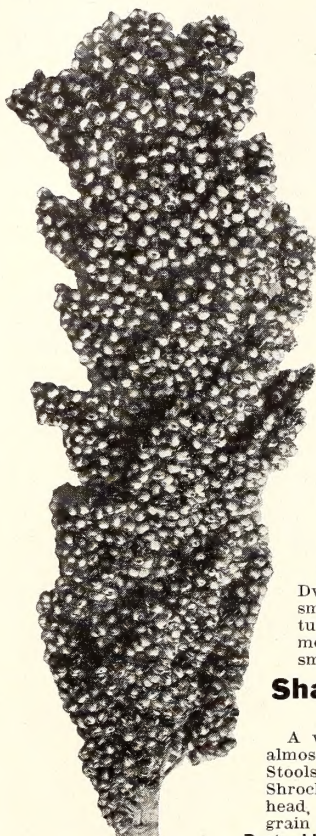

Almost identical with Dwarf Milo except a much smaller, shorter stalk. Matures quicker and will stand more drought on account of smaller stalks.

Shallu or Egyptian Wheat

A variety which does well in almost every part of Texas. Stools out from root similar to Schrock Kafir. Has large spangled head, a heavy yielder of both grain and fodder.

Postpaid prices: Lb. 20c; 2 lbs. 35c.

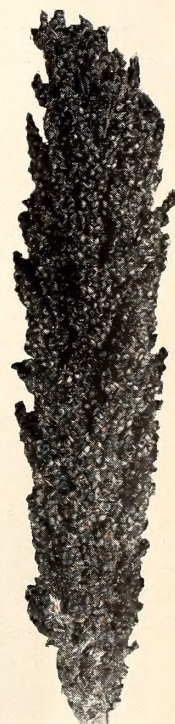

SEE SPECIAL LIST FOR
QUANTITY PRICES.

Spur Feterita.

Field of Square Brand Darso.

Grohoma.

Square Brand Saccharine Sorghums

The Sorghum plant is a strong, rapid grower, and a greedy feeder, so it succeeds best on a deep, rich, moist soil. Sorghum makes ideal syrup or forage and hay crops and we offer you the very finest bred-up seeds.

Cane Seed for Forage

The following varieties are used almost exclusively for forage. To reproduce seed, drill and cultivate planting 3 to 6 pounds per acre. For forage drill, 5 to 10 pounds per acre or broadcast 100 to 150 pounds per acre.

SQUARE BRAND RED TOP SUMAC—This variety is planted more extensively in the Southwest than any other forage crop. The seed is smaller than Amber or Orange Cane, and the plant makes the very finest fodder. Our seeds have been grown especially for us and the grains this year are very fine and plump. We are writing this description on November 23rd and our latest report, dated yesterday, indicates that we have a good yield of this high-grade seed. We have not, however, planted a large acreage so we suggest that you send your order early to be sure to get Square Brand seeds. If we do not have Square Brand when your order is received we will advise you, and quote on the seeds then on hand.

Special attention is directed to the contrast between a large field of ordinary Red Top Cane, and a field of Square Brand Red Top Cane, as illustrated below. These pictures were taken the same year on farms within a mile of each other so that the climatic conditions were identical. The two crops show the difference between cheap, inferior seeds and seeds bred for high yields of marketable crops.

SQUARE BRAND BLACK AMBER—A very popular Saccharine Sorghum for early green feed or ensilage purpose. It is the earliest sort, and makes fine hay, green or cured, which is relished by all stock. It will yield two or three cuttings each year, stooling out thicker each time it is cut.

Postpaid: Lb. 20c; 2 lbs. 35c.

Japanese Cane.

SQUARE BRAND EARLY ORANGE CANE—A later variety than the Black Amber Cane which is also used for forage and hay. It is a little taller and the stalks are a little heavier than Black Amber. A splendid producer but not as popular as Black Amber because it is not as early.

Postpaid: Lb. 20c; 2 lbs. 35c.

Cane Seed For Syrup

The following varieties used almost exclusively for making syrup but sometimes used for ensilage on account of enormous yields. Should be cut for syrup just before the seed ripens, as there is more saccharine at that stage of growth. Plant 4 to 8 pounds per acre. Cultivate like corn and chop out like cotton, leaving the plants 10 to 12 inches apart.

Crookneck Ribbon Cane Seed

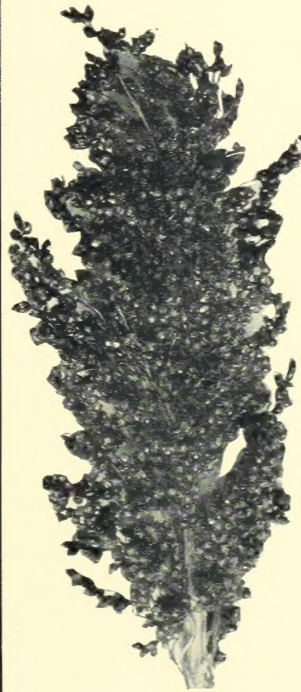

A very popular syrup cane. Yields from 300 to 400 gallons of the best syrup per acre. When grown for ensilage it produces an enormous yield. The stalks frequently grow from 10 to 15 feet high.

Japanese or Honey Drip

This is an extremely popular variety of cane, grows very tall with many joints in the stalk and a vigorous root system. Matures in 120 to 125 days and sends up two to four stalks which reach a height of from 11 to 15 feet. This is a favorite cane where sorghum production only is desired, and when the growing season is sufficiently long to mature it.

Postpaid: Lb. 20c; 2 lbs. 35c.

See Special List for quantity prices.

Amber Cane.

Cyclone Seed Sower

BROADCASTS SEEDS EVENLY

This sower will handle practically every type of seed, and is especially recommended for alfalfa, clover, bermuda and all of the small seeds so generally sown in pastures. Comfortable to carry and operate. Patent double feed makes it superior to all others on the market. Keeps two streams of seed flowing smoothly and steadily on to the distributing wheel. Set according to scale which has been scientifically worked out. Full directions and scale with each machine. Shipping weight 5 lbs. Price, \$2.50; delivered to you.

Noc-Out Fertilizer Distributor

An inexpensive labor saver. Distributes commercial fertilizer in vegetable and flower gardens, around shrubs, in truck patches, potato furrows, etc. Convenient for sowing lawn seed on small areas, or for dusting insecticides.

An oscillating knocker sets up vigorous vibrations when operated by short to-and-fro or small circle movements, resulting in steady, uniform flow through feed regulator. Made of good material. Capacity 1 1/2 quarts. Shipping weight 2 lbs. Price: \$1.25 postpaid.

Ordinary Red Top Cane.

Square Brand Red Top Cane. Note Uniformity of Heads.

GUINEA GOLD MARIGOLD

See Page Fifty-Five
